Effects of Alevi-Sunni Marriages on Children's Religious Education and Family Relations Dr. Fatma Kurttekin,2024-12-31 In this study the views of parents in Alevi Sunni marriages on the phenomenon of religion and their children s religious education are examined While there has been a growing body of research on the role and significance of religion in Alevi Sunni families limited attention has been paid to their attitudes towards their children s religious education particularly within the context of cross religious marriages Based on this this study aims to fill this research gap by examining the perspectives of parents in Alevi Sunni marriages on their children s religious education and family dynamics using qualitative methods to provide in depth insights Ten families living in Sivas Ankara and Tunceli who were contacted through snowball and purposive sampling participated in the study in which qualitative research techniques were used The data used in the study were collected through questionnaires and semi structured interview forms The data was analzed with the content analysis It was determined that the Alevi Sunni difference did not have a significant impact on the participants religious attitudes or their children s religious education Almost all parents stated that they wanted their children to choose their own path by acquiring experience and knowledge about both religious interpretations understandings The study

identified two primary areas of difficulty in Alevi Sunni families: familial opposition to the participants' decision to marry and conflicts surrounding the children's religious education. These tensions may stem from societal pressures to conform to sectarian norms and the fear of losing religious identity through cross-mixed intrafaith marriages. Such pressures highlight the need for open dialogue and acceptance within families, which many participants reported as key to resolving conflicts. The provision of religious education in the family and the religious identity of children have been discussed in a separate study. Therefore, in this study, participants' views on compulsory religious education activities, which are also a subject of debate in society, were evaluated. In parallel with the findings in the literature, the participants' opinions were grouped into three categories: namely, abolishing the courses, making the courses optional, and improving the courses along with preserving their compulsory status. Following the interviews, it was seen that the participants could have arguments mostly due to external factors and that their own religious understanding did not have any impact on family life, religious attitudes, or child rearing. Attention was drawn to the need for freedom from prejudices, acceptance of the other as he/she is, honesty, trust, and a communicative environment of dialogue in order to reduce the tension in these two areas.

Handbook of Marriage and the Family Gary W. Peterson, Kevin R. Bush, 2012-09-14 The third edition of *Handbook of Marriage and the Family* describes, analyzes, synthesizes, and critiques the current research and theory about family relationships, family structural variations, and the role of families in society. This updated *Handbook* provides the most comprehensive state-of-the-art assessment of the existing knowledge of family life with particular attention to variations due to gender, socioeconomic, race, ethnic, cultural, and life style diversity. The *Handbook* also aims to provide the best synthesis of our existing scholarship on families that will be a primary source for scholars and professionals but also serve as the primary graduate text for graduate courses on family relationships and the roles of families in society. The Family and Family Relationships, 1500-1900 Rosemary O'Day, 1994-10-26 While historians have written with ease about the state and the church, the family has so far defied historical analysis. As the primary cell of human social organisation upon which both state and church depend, it is of crucial importance. In this concise, informative, and stimulating book, Rosemary O'Day seeks to explain the difficulties facing the historian of the family and to suggest strategies for their solution. She compares families and households in time, space, and economy over the period 1500

Handbook of Marriage and the Family Suzanne K. Steinmetz, Marvin B. Sussman, 2013-11-11 The lucid straightforward Preface of this Handbook by the two editors and the comprehensive perspectives offered in the Introduction by one of them leave little for a Foreword to add It is therefore limited to two relevant but not intrinsically related points vis a vis research on marriage and the family in the interval since the first Handbook Christensen 1964 appeared namely the impact on this research of the politicization of the New Right and of the Feminist Enlightenment beginning in the mid sixties about the time of the first Handbook In the late 1930s Willard Waller noted Fifty years or more ago about 1890 most people had the greatest respect for the institution called the family and wished to learn nothing whatever about it Everything that concerned the life of men and women and their children was shrouded from the light Today much of that has been changed Gone is the concealment of the way in which life begins gone the irrational sanctity of the home The aura of sentiment which once protected the family from discussion clings to it no more We want to learn as much about it as we can and to understand it as thoroughly as possible for there is a rising recognition in America that vast numbers of its families are sick from internal frustrations and from external buffeting We are engaged in the process of reconstructing our family institutions through criticism and discussion 1938 pp 3 4 *Family Relations* Timothy H. Brubaker, 1992-10-26 As the social world of American families feverishly changes single parent families dual career couples and blended families have quickly become the norm rather than the exception In *Family Relations* a distinguished group of leading family researchers including Joan Huber David Olson Hamilton McCubbin and Marilyn Coleman examines the social changes that have gripped society and explains their impact on family relationships and functioning Initial chapters address principal theories of change the remainder of the volume addresses the predominant challenges facing contemporary families such as work family interface violence family dysfunction family crisis divorce and the transition to marriage and parenthood The contributors make suggestions for change in family policy family therapy and family life education and conclude with an overview of the current state of families and future directions This comprehensive and interesting volume is for students family researchers sociologists psychologists counselors family life educators and policy analysts True to its aim it informs about the latest understandings and tools of intervention to help overcome the formidable challenges to the family there is some worthy scholarship to be found in this
