Can Americans deal with their problems on their own or must they rely on political elites to manage their lives In this groundbreaking work Paul A Cantor explores the ways in which television shows such as Star Trek The X Files South Park and Deadwood and films such as The Aviator and Mars Attacks have portrayed both top down and bottom up models of order Drawing on the works of John Locke Adam Smith Alexis de Tocqueville and other proponents of freedom Cantor contrasts the classical liberal vision of America particularly its emphasis on the virtues of spontaneous order with the Marxist understanding of the culture industry and the Hobbesian model of absolute state control The Invisible Hand in Popular Culture concludes with a discussion of the impact of 9 11 on film and television and the new anxieties emerging in contemporary alien invasion narratives the fear of a global technocracy that seeks to destroy the nuclear family religious faith local government and other traditional bulwarks against the absolute state

The Representation of the American Presidency in Recent Hollywood Movies Marie Axland, 2009 Thesis M A from the year 1998 in the subject American Studies Culture and Applied Geography grade 1 0 LMU Munich language English abstract In Hollywood film history the U S president has had many images a brave leader an incompetent fool a lovable hero One thing is for certain No matter what era Presidents whether fictional or real are frequent fodder for filmmakers After Vietnam and the revelations of Watergate however the number of films with presidential portrayals steadily decreased and the depictions that did appear generally cast a corrupt or inept Chief Executive It is therefore more than surprising why filmmakers today have decided to produce such an incredibly large number of films as compared to the last two decades Presidents have been portrayed as minor characters in dozens of Hollywood films either for inspirational purposes or simply to keep the plot moving Lately not only the number of President films has increased significantly but there is also a clear tendency to let the Presidents move towards center stage and they are now often pictured as the protagonists This phenomenon opens up a whole range of questions How are the Presidents depicted Is there a certain trend in the portrayals Or are those portrayed all different from each other Are there differences or similarities to older characterizations What does this tell us about Hollywood's view of the Presidency Has it suddenly changed And what are the reasons for such a sudden boost in the number of films By taking a closer look at a selection of Hollywood productions this paper provides an attempt to find answers to these questions Of the string of fictional Presidents that American filmmakers have recently created some are more loathsome than their real life counterparts others more heroic Both types seem designed to connect with audiences hopes

and fears what the Hollywood dream factory does best Interestingly the portrayals have been all over *Tim Burton* Tim Burton, 2005 Collected interviews with the eclectic director of *Edward Scissorhands* *Beetlejuice* and *Ed Wood* **Off the Planet** Rebecca Leydon, Shuhei Hosokawa, Nabeel Zuberi, Neil Lerner, Rebecca Coyle, Paul Théberge, Michael Hannan, Melissa Carey, Karen Collins, Mark Evans, 2004-05-18 Essays on the use of music and sound in films from *Godzilla* to *Star Wars* and beyond In recent years music and sound have been increasingly recognized as an important if often neglected aspect of film production and film studies *Off the Planet* comprises a lively stimulating and diverse collection of essays on aspects of music sound and science fiction cinema Following a detailed historical introduction to the development of sound and music in the genre individual chapters analyze key films film series composers and directors in the postwar era The first part of the anthology profiles seminal 1950s productions such as *The Day the Earth Stood Still* the first *Godzilla* film and *Forbidden Planet* Later chapters analyze the work of composer John Williams the career of director David Cronenberg the *Mad Max* series James Cameron's *Terminators* and other notable SF films such as *Space Is the Place* *Blade Runner* *Mars Attacks* and *The Matrix* *Off the Planet* is an important contribution to the emerging body of work in music and film with contributors including leading film experts from Australia Canada Japan New Zealand the United Kingdom and the United States
