

The book cover features a two-part landscape painting. The top half shows a dark, silhouetted tree against a hazy, orange-tinted sky. The bottom half shows a marshy landscape with yellow-green vegetation and a body of water reflecting the sky. The title 'Marsh Mission' is centered in the upper half in a white serif font. Below it, the authors' names 'C.C. LOCKWOOD' and 'RHEA GARY' are on a dark, torn-edge banner. The subtitle 'Capturing the Vanishing Wetlands' is in the lower right.

Marsh Mission Capturing The Vanishing Wetlands:

Marsh Mission Rhea Gary, 2005 Nature photographer Lockwood and painter Gary joined forces for this photographic and oil painting chronicle of the endangered Louisiana coastal wetlands which are quickly disappearing at a rate of a football field size area every 38 minutes **Wetlands** William J. Mitsch, James G. Gosselink, Christopher J. Anderson, M. Siobhan Fennessy, 2023-07-12 WETLANDS The definitive guide to wetlands for students and professionals alike Wetlands rank among the most productive but also the most vulnerable ecosystems They break down toxins and help maintain aquatic ecosystems provide both permanent and temporary homes for key species and contribute enormously to biodiversity and global ecological health In recent years the importance of wetlands has been increasingly well understood and their management and restoration has become a particular focus of environmental research Wetlands provides a thorough and comprehensive overview of wetlands updated to reflect the latest research findings and methodological approaches as it has done for more than a generation The new edition has been optimized for classroom use breaking down the topic into four parts introduction to wetlands the wetland environment wetland ecosystems and wetland management Readers of the sixth edition of Wetlands will also find A detailed discussion of the role of wetlands in improving water quality protection from storm damage and other ecosystem services The latest approaches and examples of wetland creation and restoration A thorough discussion of the impacts of climate change on wetlands and how to mitigate them Wetlands is essential reading for students and professionals in ecology environmental engineering and water resource management **Facing Catastrophe** Robert R. M. Verchick, 2012-04-02 As Hurricane Katrina vividly revealed disaster policy in the United States is broken and needs reform What can we learn from past disasters storms floods earthquakes tsunamis landslides and wildfires about preparing for and responding to future catastrophes How can these lessons be applied in a future threatened by climate change In this bold contribution to environmental law Robert Verchick argues for a new perspective on disaster law that is based on the principles of environmental protection His prescription boils down to three simple commands Go Green Be Fair and Keep Safe Going green means minimizing exposure to hazards by preserving natural buffers and integrating those buffers into artificial systems like levees or seawalls Being fair means looking after public health safety and the environment without increasing personal and social vulnerabilities Keeping safe means a more cautionary approach when confronting disaster risks Verchick argues that government must assume a stronger regulatory role in managing natural infrastructure distributional fairness and public risk He proposes changes to the federal statutes governing environmental impact assessments wetlands development air emissions and flood control among others Making a strong case for more transparent governmental decision making Verchick offers a new vision of disaster law for the next generation **Walking to New Orleans** Robert R. N. Ross, Deanne E. B. Ross, 2008-09-22 Two and a half years after the devastation of Hurricanes Katrina and Rita New Orleans and south Louisiana continue to struggle in an unsettled gumbo of environmental social and rebuilding

chaos Citizens await the fruition of four successive recovery and reconstruction planning processes and the realization of essential infrastructure repairs Repopulation in Orleans Parish has slowed considerably the parish remains at best two thirds of its former size thousands of former residents who wish to return face barriers of many kinds Heroic efforts at rebuilding have occurred through the efforts of individual neighborhood associations and voluntary associations who have attempted to address serious losses in affordable housing and health care services Walking to New Orleans traces how a dominant but paradoxical model of the relation between the human and natural worlds in Western culture has informed many environmental and engineering dilemmas and has contributed to the history of social inequities and injustice that anteceded the disasters of the hurricanes and subsequent flooding It proposes a model for collaborative recovery that links principles of ethics and engineering in which citizens become active ongoing participants in the process of the reconstruction and redesign of their unique locus of habitation Equally important it gives voice to the citizens and associations who are desperately working to rebuild their homes and lives both in urban New Orleans and in the villages of coastal Louisiana

The Louisiana Coast Gay M. Gomez, 2008-10-09 Hurricane Katrina gave the nation an urgent reminder of the extent and value of Louisiana's wetlands when daily discussions of subsidence and sedimentation revealed how much ordinary coastal processes affect humanity and vice versa Now with a native Louisiana naturalist as a guide readers can learn how best to enjoy appreciate and protect this vanishing landscape Part natural history and part field guide *The Louisiana Coast* takes readers across one of only three major chenier plains in the world to the Atchafalaya Basin the largest river basin swamp on the continent and through the network of bayous natural levees cypress swamps marshes and barrier islands of the Deltaic Plain Color photographs illustrate chapters on vegetation wildlife and the rich human culture that defines Louisiana With the intimate knowledge of one whose life has been shaped by this remarkable environment author Gay M Gomez leads visitors to nature trails wildlife refuges Audubon sanctuaries and parks A visitor's guide at the end of the book features destinations open to the public for wildlife watching photography and even hunting fishing crabbing and cast netting Everyone who lives in or visits Louisiana and anyone interested in the conservation ecology natural history and geography of the region will appreciate Gomez's exploration of the land its people its resources and its vulnerabilities *The Louisiana Coast* will encourage readers to share the author's love for this vital distinct and beautiful place

C. C. Lockwood's Atchafalaya C. C. Lockwood, 2007-09-01 At nearly 1 4 million acres the Atchafalaya Basin in south central Louisiana comprises America's largest swamp wilderness Award winning nature photographer C C Lockwood is the foremost chronicler of this natural treasure What began as a curious side trip in 1973 became a decades long love affair and for more than thirty years Lockwood has explored the Atchafalaya's waters and captured its haunting beauty on film Now twenty five years after the publication of his first book he returns to his favorite subject in *C C Lockwood's Atchafalaya* His passion for the Atchafalaya as expressed in his photographs can be compared to John James Audubon's exuberant appreciation for the state's abundant

bird life as depicted in his prints more than 150 years ago The art of both exalts Louisiana s wildlife and cautions against taking it for granted Lockwood revisits and reflects on the places he has frequented most in the swamp recalling his escapades both long past and recent among gators and skeeters He shares the thoughts of basin residents about how the Atchafalaya has changed over time for better and for worse Increases and decreases in various bird and other animal populations changes in water levels and consistency flora mainstays and trees gone missing burgeoning aquatic vegetation all are keenly observed by this explorer Lockwood finds undiminished the seductive seasonal and diurnal moods of the swamp autumn and spring sunset and moonrise as breathtaking now as in the past In nearly one hundred dazzling color photographs Lockwood brilliantly documents the Atchafalaya s timeless beauty He shows amazingly diverse and abundant wildlife rookeries with thousands of egrets and herons waters with billions of crawfish and ridges with deer squirrel and woodcock Waters run deep in Lockwood s soul as evidenced in his intimate treatment of the meandering bayous fringed with bald cypress trees the many glassy lakes reflecting vegetation into double images and the mighty Atchafalaya River the lifeline of the swamp No place in the world gives me such a feeling of peace as America s largest river basin swamp writes Lockwood In these pages he pays homage to the queen of U S wetlands **Marsh Mission** ,2007 *Expressions of Place* John R. Kemp,2016-09-27 *Expressions of Place* embarks on a journey across the rural and urban landscapes of Louisiana via the talents of thirty seven artists located all around the state Many are acclaimed professionals whose paintings are included in major private and public collections regionally and nationally Others have found their followings closer to home All however strive to express impressions of the land with artistic styles that range from traditional to the symbolic and almost totally abstract Such a variety of interpretation becomes possible in a landscape that changes from dark cypress shrouded bayous trembling earth grassy prairies the gritty streets of inner city New Orleans to vast wind swept coastal marshes and the piney hills of north and central Louisiana Rather than stand as an encyclopedia catalog or history of the visual arts in Louisiana Kemp s book is instead a celebration of the state s evocative landscape in the work of accomplished contemporary artists It includes an introductory essay which places these creators and their works in historical context *Expressions of Place* provides readers with individual essays and biographical sketches in which the artists in their own words give insight as to what they paint how they paint where they paint and why they are drawn to the Louisiana landscape Particularly inspiring the artists discuss their interpretations of that landscape directly with the viewing audience *Expressions of Place* remains as much about the landscape of the artists imaginations as it is about the land itself With each painting they have created visual poetry of a land and environment that has become a defining part of their lives *Creating and Consuming the American South* Martyn Bone,Brian Ward,William A. Link,2019-10-16 This book explores how an eclectic selection of narratives and images of the American South have been developed and disseminated The contributors emphasize how ideas of the South have real social political and economic ramifications and that they register at various local regional national and
