Martin Travers An Appreciation:

Martin Travers, 1886-1948 Rodney Warrenner, Michael Yelton, 2003 The first biographical study of Travers and his life s works Complete listing of all Travers actual and projected work *Outposts of the Faith* Michael Yelton, 2009 Outposts of the Faith offers ten compelling portraits of country churches where the Anglo Catholic movement flourished during the twentieth century Rightly famed for its dedicated and heroic work in poor inner city areas little is recorded about the impact of Anglo Catholicism in rural parishes nor have the stories of some of its more colourful rural priests and people been told nor of those forces at work in out of the way places which affected the wider church and subsequent direction of the movement From Cornwall to the Fens Michael Yelton has conducted visits interviews and archival research and has created vividly detailed and inspiring accounts Here we encounter some well known names about whom very little has been written We also meet some individuals who made outstanding contributions to Anglo Catholicism in their day but whose names and accomplishments have become almost forgotten Outposts of the Faith records devotion and eccentricity in generous measure we meet one priest who removed parts of his clerical clothing whenever any part of the 1662 Prayer Book was recited another who was shot by a parishioner another who faithfully served the same Devon parish for seventy years Winifred Holtby's Social Vision Lisa Regan, 2015-10-06 Winifred Holtby 1898 1935 is best known today for her friendship with fellow feminist and pacifist Vera Brittain and for her last novel South Riding This is the first monograph to provide a literary criticism of Holtby s social philosophy and presents in depth readings of all her major works as well as some of her less well known writing *The Oxford Handbook of the Oxford Movement* Stewart J. Brown, Peter Nockles, James Pereiro, 2018-01-25 The Oxford Handbook of the Oxford Movement reflects the rich and diverse nature of scholarship on the Oxford Movement and provides pointers to further study and new lines of enquiry Part I considers the origins and historical context of the Oxford Movement These chapters include studies of the legacy of the seventeenth century Caroline Divines and of the nature and influence of the eighteenth and early nineteenth century High Church movement within the Church of England Part II focuses on the beginnings and early years of the Oxford Movement paying particular attention to the people the distinctive Oxford context and the ecclesiastical controversies that inspired the birth of the Movement and its early intellectual and religious expressions In Part III the theme shifts from early history of the Oxford Movement to its distinctive theological developments This section analyses Tractarian views of religious knowledge and the notion of ethos the distinctive Tractarian views of tradition and development and Tractarian ecclesiology including ideas of the via media and the branch theory of the Church The years of crisis for the Oxford Movement between 1841 and 1845 including John Henry Newman s departure from the Church of England are covered in Part IV Part V then proceeds to a consideration of the broader cultural expressions and influences of the Oxford Movement Part VI focuses on the world outside England and examines the profound impact of the Oxford Movement on Churches beyond the English heartland as well as on the formation of a world wide Anglicanism In Part

VII the contributors show how the Oxford Movement remained a vital force in the twentieth century finding expression in the Anglo Catholic Congresses and in the Prayer Book Controversy of the 1920s within the Church of England The Handbook draws to a close in Part VIII with a set of more generalised reflections on the impact of the Oxford Movement including chapters on the judgement of the converts to Roman Catholicism over the Movement's loss of its original character on the spiritual life and efforts of those who remained within the Anglican Church to keep Tractarian ideas alive on the engagement of the Movement with Liberal Protestantism and Liberal Catholicism and on the often contentious historiography of the Oxford Movement which continued to be a source of church party division as late as the centennial commemorations of the Movement in 1933 An Afterword chapter assesses the continuing influence of the Oxford Movement in the world Anglican Communion today with special references to some of the conflicts and controversies that have shaken Anglicanism since the 1960s

Unlocking the Church William Whyte, 2017-09-29 The Victorians built tens of thousands of churches in the hundred years between 1800 and 1900 Wherever you might be in the English speaking world you will be close to a Victorian built or remodelled ecclesiastical building Contemporary experience of church buildings is almost entirely down to the zeal of Victorians such as John Henry Newman Henry Wilberforce and Augustus Pugin and their ideas about the role of architecture in our spiritual life and well being In *Unlocking the Church* William Whyte explores a forgotten revolution in social and architectural history and in the history of the Church He details the architectural and theological debates of the day explaining how the Tractarians of Oxford and the Ecclesiologists of Cambridge were embroiled in the aesthetics of architecture and how the Victorians profoundly changed the ways in which buildings were understood and experienced No longer mere receptacles for worship churches became active agents in their own rights capable of conveying theological ideas and designed to shape people's emotions These church buildings are now a challenge their maintenance repair or repurposing are pressing problems for parishes in age of declining attendance and dwindling funds By understanding their past unlocking the secrets of their space there might be answers in how to deal with the legacy of the Victorians now and into the future

Formative Fictions Tobias Boes,2012-11-15 The Bildungsroman or novel of formation has long led a paradoxical life within literary studies having been construed both as a peculiarly German genre a marker of that country's cultural difference from Western Europe and as a universal expression of modernity In *Formative Fictions* Tobias Boes argues that the dual status of the Bildungsroman renders this novelistic form an elegant way to negotiate the diverging critical discourses surrounding national and world literature Since the late eighteenth century authors have employed the story of a protagonist's journey into maturity as a powerful tool with which to facilitate the creation of national communities among their readers Such attempts always stumble over what Boes calls cosmopolitan remainders identity claims that resist nationalism's aim for closure in the normative regime of the nation state These cosmopolitan remainders are responsible for the curiously hesitant endings of so many novels of formation In *Formative Fictions* Boes presents readings of a number of novels Goethe's *Wilhelm Meister's Apprenticeship* Karl Leberecht Immermann's *The Epigones* Gustav Freytag's *Debit and Credit* Alfred Döblin's *Berlin Alexanderplatz* and Thomas Mann's *Doctor Faustus* among them that have always been felt to be particularly German and compares them with novels by such authors as George Eliot and James Joyce to show that what seem to be markers of national particularity can productively be read as topics of world literature Recent Advances in Assistive Technologies to Support Children with Developmental Disorders Silton, Nava R.,2015-05-31 The greatest advantage of modern technology is its ability to improve the lives of all In particular new technologies have the potential to greatly mitigate cognitive motor and social impairments stemming from genetic or environmental factors *Recent Advances in Assistive Technologies to Support Children with Developmental Disorders* raises awareness of disabled children and what can be done to help them grow and develop alongside their peers Bringing together personal experiences with academic investigation this book is an essential reference for doctors pediatricians pre and primary school educators and scientists working to enhance the impact assistive technologies have on the youngest members of society **Divided City** Theresa Breslin,2014-01-01 A tale of two boys one a Catholic one a Protestant whose attempt to help an outsider is set against the sectarian prejudices around them in Glasgow when the annual Orange Walks begin *Debating Organization* Robert Westwood,Stewart Clegg,2009-02-04 This volume introduces readers to the central debates of organization studies through a series of point and counterpoint debates by major figures in the field Introduces readers to the central tensions and debates of organization studies Celebrates the productive heterogeneity of the field by placing competing perspectives side by side Includes contributions from major figures in the field Structured in an innovative point and counterpoint format **With Malice Aforethought** Louis Blom-Cooper,Terence Morris,2004-10-19 For more than three centuries the criminal law has given rise to a divergent set of approaches to the crime of homicide Whereas the law of murder has not conceptually changed the crime of manslaughter has resulted in some forms of homicide being visited with relatively minor penalties These various

categories of unlawful killing present considerable problems relating to intention or lack of it and the culpability of those whose behaviour while lacking in evident malice is characterised by the grossest recklessness. The reaction of the relatives of victims is generally simpler. They frequently find it impossible to understand how those who kill by dangerous or drunken driving may receive comparatively lenient sentences while those convicted of manslaughter following a drunken brawl may be dealt with more severely and yet others convicted of so called mercy killings are subject to the mandatory penalty of life imprisonment. This book addresses the powerful and controversial arguments for the current distinctions between murder, manslaughter and other specific categories of crime to be abolished and subsumed within a single crime of culpable homicide. In the course of this analysis the authors consider a number of issues of great contemporary importance including the presentation of expert evidence in cases involving unexplained infant death, corporate killing and the question of the defences available to the accused including self defence and provocation where popular notions of what is reasonable or justifiable may be at variance with legal precedent. While this book aims to consider criminal homicide in its social, historical and legal setting it also goes far beyond in setting out the case for radical reform.
