Marx For Our Times:

Marx for Our Times Daniel Bensaïd, 2002 Without denying the contradictory character of Marx's thought Daniel Bensaïd sets out to demonstrate that it was not a philosophy of the end of history an empirical sociology of classes or a positive science of economics positing an inexorable progress towards an ineluctable communism Instead Marx's critique of political economy encompassed three great critiques of the scientific and political canons of its age of historical reason sociological rationality and scientific positivism which make the thinker from the nineteenth century fully relevant to the twenty first century of global capitalism Indeed we find here a post postmodern Marx able to inhabit a contemporary world replete with contingency emergency and contradictory temporalities Published in France on the eve of the strikes of 1995 that signalled a profound revolt against *la pensée unique* Marx for Our Times is an invitation to rediscover our foremost contemporary Karl Marx

Marx for Our Times Daniel Bensaïd, 2020-05-05 The end of Soviet Socialism signalled to some observers that the ghost of Marx had finally been laid to rest But history's refusal to grind to a halt and the global credit crisis that began in 2008 have rekindled interest in capitalism's most persistent critic Written during the mid nineties a period of Western complacency and neo liberal reaction Marx for Our Times is a critical reading of dialectical materialism as a method of resistance Without denying the contradictory character of Marx's thought and with a sensitivity to the plurality of theories it has inspired Daniel Bensaïd sets out to discover what in Marx remains dynamic and relevant in our era of accelerating economic change Marx's theory emerges not as a doctrinal system but as an intellectual tool of social struggle and global transformation in a world where capital continues to dominate social relations

The Working Class from Marx to Our Times Marcelo Badaró Mattos, 2022-04-23 This book reviews Marx's contributions to the debate on the working class The first part of the work presents the synthesis of the main contributions of Marx and Engels and 20th century Marxist writers to the understanding of social classes the class struggle and the working class The remaining parts present exercises of dialogue between Marx's and Marxists discussions on the working class presented in the first part and empirical elements of class reality today as well as debates in the social sciences and historiography on the same issues The thesis defended in the book is simple the working class also called the proletariat as it appears in the work of Karl Marx had and has validity as an analytical category for the understanding of social life under capitalism Nevertheless Marx's discussion on the issue is complex and the category working class in his approach is wider than many Marxists have presented it

Marxism for Our Times Martin Glaberman, 1999 Rarely as in the collection here can one encounter an essayist novelist historian and political leader like the late C L R James in the working throes of forming and then fomenting personal political theory In Marxism for Our Times editor Martin Glaberman has gathered the writings and theoretical discussions of this noted Caribbean writer These pamphlets mimeographs letters and lectures by James were nearly inaccessible until now Within these works James works to situate himself within the classical Marxist tradition while rejecting the Vanguard Party as unsuitable for our times

The writings in this collection begin in the 1940s when Marxists were wrestling with acts that many deemed betrayals of the revolution Stalin's pact with Hitler and the war in Europe They end in the late sixties just before the dissolution of Facing Reality the final form of the American Marxist organization founded on James's principles For many years James born in Trinidad and Tobago was leader of the Trotskyists in the United States He continued his work even after his exile from America Of great value to scholars of Marxism are the papers in which James examines Marx Lenin and Trotsky and applies their theories to the class conflicts he was witnessing at mid century and to changes he foresaw in the future James argues for the rejection of historical principles and theories and urges Marxists to adapt themselves to changes occurring in capitalism and the working class Glaberman worked alongside James but sometimes disagreed with him in the movement James founded They were close associates for 45 years With Marxism for Our Times Glaberman not only has preserved and made available the political theories of a noted writer but he also has created a window on a turbulent period of optimism and failure a failure Glaberman calls rich in meanings and lessons for anyone interested in a democratic revolutionary Marxism C L R James is the author of the novel Minty Alley and The Black Jacobins the classic history of the Haitian Revolution and many other works Martin Glaberman is a professor emeritus at Wayne State University in Detroit He joined the socialist movement at age thirteen and worked for twenty years in the auto industry and as an active union member

Values of Our Times Deshun Li, 2013-06-01 Philosophers have gradually accepted axiology as one branch of philosophy As a basic category belonging to axiology and philosophy value is the general abstraction of concrete value formation in various fields including utility ethics and appreciation of the beauty The problem of value is essentially a problem of historical activities of practice in human society The axiology based on the scientific practice view insists on the principle of unification between theory and practice truth and value In research of axiology the relation between subjectivity and objectivity of values is a problem that must be solved in the first place The modern conversation of value philosophy is the academic and practical demands of the value philosophy research in China Value evaluation is an important part of the axiology In order to deepen the research of value philosophy and to promote the development of current value philosophy we must have scientific mode of thinking suitable for the nature of value It is the base of value relation the origin of value needs the process of value creation and actualization and the fundamental way to proving one's value as a human being *Marx and We* Sun

Zhengyu, 2024-08-01 Marxist ideology is the only fully scientific ideology the only one able to guide mankind toward the settlement of fundamental social problems and to point out the royal road for the proletariat to take in its march toward socialism and communism Without Marxism modern people cannot establish true social ideals nor can they engage in the rational pursuit of values Without Marxism modern people cannot choose the correct path of development nor can they build up new forms of civilizations Without Marxism modern people would never base their commitments to schedule the consensus building effort and support the consensus building process on any irrefutably and sufficiently sound theoretical

foundations *Marx After Marx* Harry Harootunian, 2015-10-27 In *Marx After Marx* Harry Harootunian questions the claims of Western Marxism and its presumption of the final completion of capitalism. If this shift in Marxism reflected the recognition that the expected revolutions were not forthcoming in the years before World War II, its Cold War afterlife helped to both unify the West in its struggle with the Soviet Union and bolster the belief that capitalism remained dominant in the contest over progress. This book deprovincializes Marx and the West's cultural turn by returning to the theorist's earlier explanations of capital's origins and development, which followed a trajectory beyond Euro-America to Asia, Africa, and Latin America. Marx's expansive view shows how local circumstances, time, and culture intervened to reshape capital's system of production in these regions. His outline of a diversified global capitalism was much more robust than was his sketch of the English experience in *Capital* and helps explain the disparate routes that evolved during the twentieth century. Engaging with the texts of Lenin, Luxemburg, Gramsci, and other pivotal theorists, Harootunian strips contemporary Marxism of its cultural preoccupation by reasserting the deep relevance of history.

Marx at the Margins Kevin B. Anderson, 2024-05-31 In *Marx at the Margins*, Kevin Anderson uncovers a variety of extensive but neglected texts by Marx that cast what we thought we knew about his work in a startlingly different light. Analyzing a variety of Marx's writings, including journalistic work written for the *New York Tribune*, Anderson presents us with a Marx quite at odds with conventional interpretations. Rather than providing us with an account of Marx as an exclusively class-based thinker, Anderson here offers a portrait of Marx for the twenty-first century: a global theorist whose social critique was sensitive to the varieties of human social and historical development, including not just class but nationalism, race, and ethnicity as well. Through highly informed readings of work ranging from Marx's unpublished 1879-82 notebooks to his passionate writings about the antislavery cause in the United States, this volume delivers a groundbreaking and canon-changing vision of Karl Marx that is sure to provoke lively debate in Marxist scholarship and beyond. For this expanded edition, Anderson has written a new preface that discusses the additional 1879-82 notebook material as well as the influence of the Russian-American philosopher Raya Dunayevskaya on his thinking.

Incorporating Marxist critical perspectives on history and theoretically informed insights, his scholarship has been vitally important for the world of Asian studies. *Uneven Moments* presents a selection of Harootunian's essays on Japan's intellectual and cultural history from the late Tokugawa period to the present that span the many phases of his distinguished career and point to new directions for Japanese studies. *Uneven Moments* begins with reflections on area studies as an academic field and how we go about studying a region. It then moves into discussions of key topics in modern Japanese history. Harootunian considers Japan's fateful encounter with capitalist modernity and the implications of uneven development, examining the combinations of older practices with new demands that characterized the twentieth century. The book examines the making of modern Japan, the transformations of everyday life, and the collision between the production of

forms of cultural expression and new political possibilities Finally Harootunian analyzes Japanese political identity and its forms of reckoning with the past Exploring the shifting relationship among culture the making of meaning and politics in rich reflections on Marxism and critical theory Uneven Moments presents Harootunian's intellectual trajectory and in so doing offers a unique assessment of Japanese history

The Necessity of Errors John Roberts, 2020-05-05 Truth and error are interdependent claims to truth can be made only in the light of previous error In The Necessity of Errors John Roberts explores how up to Hegel emphasis was placed on error as something that dissolves truth and needs to be eradicated Drawing on the fragmented corpus of writing on error from Locke to Luxemburg Adorno to Vaneigem and covering five key areas from philosophy to political praxis this wide ranging account explores how we learn from error under what conditions and with what means Errors Roberts finds are productive but not in any uniform sense or under all circumstances a theory of errors needs a dialectics of error

Karl Marx, Historian of Social Times and Spaces George García-Quesada, 2021-10-25 Through a discussion with current perspectives in philosophy of history especially with a critical approach to Paul Ricœur's work and a rigorous reading of Karl Marx's oeuvre Karl Marx Historian of Social Times and Spaces proposes an interpretation of Marx's concept and method of historical knowledge In this sense the examination of Marx's concepts of social space and social time serve to highlight the possibilities of his work in terms of the explanation of the dynamics of complex multilinear development of human societies and of capitalism in particular

Capitalism in the Anthropocene John Bellamy Foster, 2022-08-23 Over the last 11 700 years during which human civilization developed the earth has existed within what geologists refer to as the Holocene Epoch Now science is telling us that the Holocene Epoch in the geological time scale ended replaced by the onset of a new more dangerous Anthropocene Epoch which began around 1950 The Anthropocene Epoch is characterized by an anthropogenic rift in the biological cycles of the Earth System marking a changed reality in which human activities are now the main geological force impacting the earth as a whole generating at the same time an existential crisis for the world's population What caused this massive shift in the history of the earth In this comprehensive study John Bellamy Foster tells us that a globalized system of capital accumulation has induced humanity to foul its own nest The result is a planetary emergency that threatens all present and future generations throwing into question the continuation of civilization and ultimately the very survival of humanity itself Only by addressing the social aspects of the current planetary emergency exploring the theoretical historical and practical dimensions of the capitalism's alteration of the planetary environment is it possible to develop the ecological and social resources for a new journey of hope

A Contemporary History of Marx's Capital Paolo Favilli, 2025-09-03 Paolo Favilli provides both students and scholars with an original reading of themes and issues found in Karl Marx's Das Kapital and its connections with present day challenges By way of continuous cross referencing between present and past Favilli demonstrates claims that the scientific status of Das Kapital advanced by countless texts since its original publication are themselves deeply imbued by the spirit of the times If in 1963 Jean Paul Sartre could write that Marxism was the unsurpassable philosophical horizon of our times what could make an undergraduate student today consider such a claim plausible Informed by the latest research on Marxist theory and decades teaching the Philosophy of History Favilli employs a didactic approach stimulating student engagement and learning opportunities in the classroom This approach allows for a better understanding of relationship between the present and the multiple temporalities that characterise and periodise the contemporary era What follows is a critique of the contemporary academy for its hangover of post 1989 *nuovismo* cult of

novelty and inability to make the proper distinctions between Marxism as party state the works of Karl Marx and Marxism as an object of history This led to the spectacle where after 1989 those who had spent most of their careers as Marxist hued scholars not only abandoned this identity but also spurned any recognition that Marx and Marxism were worthwhile objects of inquiry This book was first published in Italian as *A proposito de Il capitale Il lungo presente e I miei studenti* Corso di storia contemporanea Milan FrancoAngeli 2021 This English translation includes a new foreword by the author
