Marx Went Away But Karl Stayed Behind:

Marx Went Away--But Karl Stayed Behind, 2010 When it appeared in 1983 Caroline Humphrey's *Karl Marx Collective* was the first detailed study of the Soviet collective farm system Through careful ethnographic work on two collective farms operated in Buryat communities in Siberia the author presented an absorbing if dispiriting account of the actual functioning of a planned economy at the local level Now this classic work is back in print in a revised edition that adds new material from the author's most recent research in the former Soviet Union In two new chapters she documents what has happened to the two farms in the collapsing Russian economy She finds that collective farms are still the dominant agricultural forms not out of nostalgic sentiment or loyalty to the Soviet ideal but from economic and political necessity Today the collectives are based on households and small groups coming together out of choice There have been important resurgences in traditional thinking about kinship genealogy shamanism and mountain cults and yet all of this is newly formed by its attempt to deal with post Soviet realities *Marx Went Away* will appeal to students and scholars of anthropology political science economics and sociology The book should be on the shelf of every student of Soviet affairs *Times Literary Supplement* Caroline Humphrey is Fellow of King's College and Lecturer in Social Anthropology University of Cambridge

Facing the Fire, Taking the Stage Joseph J. Long, 2025-06-03 In the mid 2000s the Russian government began to merge Siberia's smallest Indigenous territories into larger administrative regions Among Buryat Mongols living to the west of Lake Baikal the state promoted a policy of National Cultural Autonomy which sought to separate culture from territory amid this consolidation of land and people Although public performances of Buryat culture were mobilized to show support for the policy Joseph Long's compelling ethnography provides alternative ways to understand the meanings attached to these displays At the same time the book documents how resurgent local rituals demonstrated enduring ties to the land Drawing on classic theories of ritual and performance *Facing the Fire Taking the Stage* explores how Buryat shamanism and state sanctioned performing arts have allowed Buryats to negotiate and express different kinds of belonging to people and land Based on several years of anthropological fieldwork in Western Buryat communities this book provides new insights into the ways that these forms have influenced one another over time While Buryat experience has been fundamentally shaped by Soviet communism and its aftermath *Facing the Fire Taking the Stage* shows how this history parallels the experience of Indigenous peoples worldwide

Wounded Cities Jane Schneider, Ida Susser, 2020-06-29 Although the seemingly apocalyptic scale of the World Trade Center disaster continues to haunt people across the globe it is only the most recent example of a city tragically wounded Cities are in fact perpetually caught up in cycles of degeneration and renewal As with the WTC from time to time these cycles are severely ruptured by a sudden unpredictable event In the wake of recent terrorist activities this timely book explores how urban populations are affected by wounds inflicted through violence civil wars overbuilding drug trafficking and the collapse

of infrastructures as well as natural disasters such as earthquakes Mexico City New York Beirut Belfast Bangkok and Baghdad are just a few examples of cities riddled with problems that undermine on a daily basis the quality of urban life What does it mean for urban dwellers when the infrastructure of a city collapses transport communication grids heat light roads water and sanitation What are the effects of foreign investment and huge construction projects on urban populations and how does this change the look and character of a city How does drug trafficking intersect with class race and gender and what impact does it have on vulnerable urban communities How do political corruption and mafia networks distort the built environment Drawing on in depth case studies from across the globe this book answers these intriguing questions through its rigorous consideration of changing global and national contexts social movements and corrosive urban events Adopting a grass roots up approach it places emphasis on peoples experiences of uneven development and inequality their engagement with memory in the face of continual change and the relevance of political activism to bettering their lives It is especially attentive to the historical interaction of particular cities with wider political and economic forces as these interactions have shaped local governance over time

Methodological Challenges and New Approaches to Research in International Development L. Camfield, 2014-05-29 Development researchers face many challenges in producing robust and persuasive analyses often within a short time frame This edited volume tackles these challenges head on using examples from other fields to provide practical guidance to research producers and users

Russia's Unknown Agriculture Judith Pallot, Tat'yana Nefedova, 2007-08-23 Basing their findings on four years of research during which they studied rural districts drawn from a variety of contrasting regions of European Russia the authors discuss the place of rural households in Russia s agri food production system They show that far from being solely concerned with survival household plots in contemporary Russia are increasingly used to produce crops and livestock products for the market In the book they describe the rich variety of forms that small and independent farming takes today from highly localised clusters of cucumber or tomato producers to specialization in crop or animal husbandry at a higher spatial scale or associated with particular ethnic groups The authors systematically examine the influence on past and present practices of distance and the environment the state of the large farm sector local customs and ethnicity on what households produce and how they produce it often using case studies of people they have met plot holders farmers local officials to illustrate their point They criticise the tendency of the household production to be treated as the agricultural Other in post Soviet Russia and argue with the right incentives it has the potential for further development

Secularism Soviet Style Sonja Luehrmann, 2021-12-22 A study of the USSR s effort to build a society without gods or spirits that greatly enhances our understanding of the post Soviet revival of religion Review of Politics Combining archival research on atheist propaganda of the 1960s and 1970s with ethnographic fieldwork in the autonomous republic of Marij El in Russia s Volga region Sonja Luehrmann examines how secularist culture building reshaped religious practice and interreligious relations One of the most palpable legacies of atheist propaganda is a

widespread didactic orientation among the population and a faith in standardized programs of personal transformation as solutions to wider social problems This didactic trend has parallels in globalized forms of Protestantism and Islam but differs from older uses of religious knowledge in rural Russia At a time when the secularist modernization projects of the twentieth century are widely perceived to have failed Secularism Soviet Style emphasizes the affinities and shared histories of religious and atheist mobilizations

Dispersed Dispossession Alexander Vorbrugg,2025 This book provides a nuanced analysis of rural change in Russia during the 2010s a crucial and formative phase marked by the consolidation of giant agricultural companies large land deals soaring exports and spectacular failures of investment projects It contextualizes complex and often ambivalent empirical realities within historical and political economic frameworks Through extensive fieldwork Alexander Vorbrugg gives rare insights into the operations of large agricultural companies and reveals how the deterioration of material infrastructures social arrangements government and local supports and collective goods erode the conditions of rural inhabitants well being and agency Vorbrugg introduces dispersed dispossession a concept that helps to relate gradual degradation to appropriation and agency The concept captures losses that have been accumulated across Soviet reform and state capitalist phases and stick to places persons and potentialities These losses are perpetuated and exploited by

businesses and politicians and have profound implications for the conditions for resistance shaping the range of conceivable alternatives They are part of a history that is not fully past Provided by publisher **Markets and Moralities** Caroline Humphrey,Ruth Mandel,2020-08-05 Before the collapse of the Eastern Bloc private marketeering was regarded not only as criminal but even immoral by socialist regimes Ten years after taking on board western market orientated shock therapy post socialist societies are still struggling to come to terms with the clash between these deeply engrained moralities and the daily pressures to sell and consume This book explores the new market and its resulting contradictions in a rapidly developing Eastern Europe and Russia Will Western fast food industries irrevocably alter local culinary practices What effect has the privatization of land had upon ownership and exchange What role do new commodities play within the household Based on original first hand ethnography this book is a long awaited addition to existing literature on post socialist societies It will be essential reading for students of anthropology sociology European and cultural studies as well as professional groups

working in Eastern Europe and Russia including NGOs development organizations and businesses **The Telengits of Southern Siberia** Agnieszka Halemba,2006-04-18 In a new and engaging study Halemba explores the religion and world outlook of the Telengits of Altai The book provides an account of the Altai its peoples clans and political structures focusing particularly on on the Telengits whilst also considering the different elements of religious belief exhibited among these native peoples Paradoxically as the demand for national recognition grows among such people and with it the need for more formal state structures built around the nation religion too begins to become formalized and loses its natural all pervasive character With the Telengits whose natural religion includes elements of Buddhism this takes the form of a debate as to whether the

state religion of their polity is to be Buddhism or contrary to the character of shamanism a formal structured fixed shamanism This is a comprehensive anthropological account of the contemporary religious life of the Telengits holding important implications for wider debates in sociology and politics **A Taste for Oppression** Ronan Hervouet,2021-03-03 Belarus has emerged from communism in a unique manner as an authoritarian regime The author who has lived in Belarus for several years highlights several mechanisms of tyranny beyond the regime s ability to control and repress which should not be underestimated The book immerses the reader in the depths of the Belarusian countryside among the kolkhozes and rural communities at the heart of this authoritarian regime under Alexander Lukashenko and offers vivid descriptions of the everyday life of Belarusians It sheds light on the reasons why part of the population supports Lukashenko and takes a fresh look at the functioning of what has been called the last dictatorship in Europe Narrating the Future in Siberia Olga Ulturgasheva,2012 The wider cultural universe of contemporary Eveny is a specific and revealing subset of post Soviet society From an anthropological perspective the author seeks to reveal not only the Eveny cultural universe but also the universe of the children and adolescents within this universe The first full length ethnographic study among the adolescence of Siberian indigenous peoples it presents the young people s narratives about their own future and shows how they form constructs of time space agency and personhood through the process of growing up and experiencing their social world The study brings a new perspective to the anthropology of childhood and uncovers a quite unexpected dynamic in narrating and foreshadowing the future while relating it to cultural patterns of prediction and fulfillment in nomadic cosmology *New Lithuania in Old Hands* Ida Harboe Knudsen,2012-05-01 Based on detailed ethnographic material *New Lithuania in Old Hands* analyzes the impact that European Union accession has had upon the country s aging smallscale farmers and describes how the reality of Lithuania s EU membership has been a far cry from the scenarios of wealth and overabundance once promised The text reveals that in many instances membership has resulted in a return to subsistence production increased insecurity and a reinforcement of kinship obligations Thus instead of treating the European Union as an elite project and voicing the support of various other segments of the population this volume shows how broad parts of the rural population have been affected by and engaged in processes of change following Lithuania s accession changes that threaten to have a large impact upon the future of the country s family structures and its farming demographic *Ruptures* Martin Holbraad,Bruce Kapferer,Julia F. Sauma,2019-06-25 *Ruptures* brings together leading and emerging international anthropologists to explore the concept of rupture Understood as radical and often forceful forms of discontinuity rupture is the active ingredient of the current sense of a world in turmoil lying at the heart of some of the most defining experiences of our time the rise of populist politics the corollary impulse towards protest and even revolutionary change as well as moves towards violence and terror and the responses these moves elicit Rupture is addressed in selected ethnographic and historical contexts images of the guillotine in the French revolution reactions to Trump s election in the USA the motivations

of young Danes who join ISIS in Syria butterfly effect activism among environmental anarchists in northern Europe the experiences of political trauma and its repair through privately sponsored museums of Mao's revolution in China people's experience of the devastating 2001 earthquake in Gujarat the inner rupture of Protestant faith among Danish nationalist theologians and the attempt to invent ex nihilo an alphabet for use in Christian prophetic movements in Congo and Angola Ruptures takes in new directions broader intellectual debates about continuity and change In particular by thematising rupture as a radical sometimes violent and even brutal form of discontinuity it adds a sharper critical edge to contemporary discourses both in social theory and public debate and policy

Global Plantations in the Modern World Colette Le Petitcorps, Marta Macedo, Irene Peano, 2023-02-02 Taking a multidisciplinary and global approach this edited book examines the dynamic role of plantations as productive socio political and ecological forms throughout imperial and post colonial worlds spanning multiple and broad temporalities Showcasing an expansive range of case studies across different geographies the collection sheds light on the heterogeneity of plantations and offers insights into the afterlives spectres and remnants of systems that have been analysed as schemes of production extraction and authority Focusing on the expansion of plantation systems throughout various political economic and ecological projects and across the modern and post modern period allows the authors to move beyond analyses that often deal with individual empires through human centered lenses The contributors explore resistance to the mechanisms of extraction and control that plantations and their afterlives demanded shedding light on their excesses contradictions failures and deviations Offering a comprehensive treatment of global plantations this book provides valuable reading for researchers with an interest in the socio political and environmental effects of colonialism and imperialism in their various guises Chapters 1 8 and 11 are available open access under a Creative Commons Attribution 4.0 International License via link [springer.com](https://www.springer.com)

Ethnographies of alienated often occult responses to economic globalization

The Informal Post-Socialist Economy Jeremy Morris, Abel Polese, 2013-12-13 From smugglers to entrepreneurs blue collar workers and taxi drivers this book deals with the multitude of characters engaged in informal economic practices in the former socialist regions Going beyond a conception of informality as opposed to the formal sector its authors demonstrate the fluid nature of informal transactions straddling the crossroads between illegal illicit socially acceptable and symbolically meaningful practices Their argument is informed by a wide range of case studies from Central Europe to the Baltics and Central Asia each of which is constructed around a single informant Each chapter narrates the story of a composite person or household that was carefully selected or constructed by an author with long standing ethnographic research experience in the given field site Wide in geographical empirical and theoretical scope the book uses ethnographic narrative accounts of everyday life to make links between ordinary meanings of informality Challenging reductively economic perspectives on cross border trading undeclared work

and other informal activities the authors illustrate the wide variety of interpretive meanings that people ascribe to such practices. Alongside getting by and getting ahead in recently marketised societies these meanings relate to sociality, kinship, ties and solidarity along with more surprising political and moral reasonings. *Mapping Mongolia* Paula L.W. Sabloff, 2011-06-29

With its small population and low GDP, Mongolia is frequently deemed unique or tacked onto various area studies programs: Inner Asia, Central Asia, Northeast Asia, or Eurasia. This volume is a response to the concern that countries such as Mongolia are marginalized when academia and international diplomacy reconfigure area studies borders in the postsocialist era. Would marginalized countries such as Mongolia benefit from a reconfiguration of area studies programs or even from another way of thinking about grouping nations? This book uses Mongolia as a case study to critique the area studies methodology and test the efficacy of another grouping methodology: the scapes method proposed by Arjun Appadurai. Could the application of this approach for tracing individuals' social networks by theme—finance, ethnicity, ideology, media, and technology—be applied to nation states or peoples? Could it then prevent Mongolia from slipping through the cracks of academia and international diplomacy? Experts from ecology, genetics, archaeology, history, anthropology, and international diplomacy contemplate these issues in their chapters on Mongolia through the ages. Their work includes over 30 maps to help situate Mongolia in its geologic, geographic, economic, and cultural matrix. By comparing maps of different time periods and intellectual orientations, readers can consider for themselves the place of Mongolia in the world community and the relative benefits of these and other grouping methodologies. The Vanishing Hectare Katherine Verdery, 2018-05-31 In most countries in Eastern Europe and the former Soviet Union, the fall of communism opened up the possibility for individuals to acquire land. Based on Katherine Verdery's extensive fieldwork between 1990 and 2001, *The Vanishing Hectare* explores the importance of land and land ownership to the people of one Transylvanian community. Aurel Vlaicu Verdery traces how collectivized land was transformed into private property, how land was valued, what the new owners were able to do with it, and what it signified to each of the different groups vying for land rights. Verdery tells this story about transforming socialist property forms in a global context, showing the fruitfulness of conceptualizing property as a political symbol, as a complex of social relations among people and things, and as a process of assigning value. This book is a window on rural life after socialism, but it also provides a framework for assessing the neo-liberal economic policies that have prevailed elsewhere, such as in Latin America. Verdery shows how the trajectory of property after socialism was deeply conditioned by the forms property took in socialism itself; this is in contrast to the image of a tabula rasa that governed much thinking about post-socialist property reform.
