Marxism And Epistemology Bachelard Canguilhem And Foucault:

Marxism and Epistemology Dominique Lecourt, 2017-11-10 When this book was first published in English in 1975 the previous forty years had seen the emergence of a new tradition in the philosophy of the sciences or epistemology in France. The founder of this tradition was Gaston Bachelard. Rather than elaborating from existing philosophy a series of categories to judge science's claims to truth, Bachelard started from the twentieth century revolution in physics and critically examined existing philosophy on the basis of the achievements of this revolution and the scientific practice it exemplified. This critique of philosophy produced an epistemology radically different from traditional idealism and empiricism. Simultaneously it opened the way to a new history of the sciences which had been developed by Georges Canguilhem and Michel Foucault. This critique of empiricism and idealism in the name of science clearly parallels the theses of dialectical materialism. Hence a dialectical materialist analysis illuminates both the achievements and limitations of the tradition. In this book Dominique Lecourt presents an exposition of Bachelard's epistemological writings and then offers a critique of that epistemology and of the works of Canguilhem and Foucault from a Marxist Leninist viewpoint. In an introduction written especially for the English edition he compares Bachelard's positions with those of the different but in some respects analogous Anglo-Saxon traditions in epistemology descending from the works of Karl Popper in particular with Thomas Kuhn's *Structure of Scientific*

Major-Poetzel, 2017-10-10 The author argues that Foucault's archaeology is an attempt to separate historical and philosophical analysis from the evolutionary model of nineteenth century biology and to establish a new form of social thought based on principles similar to field theory in twentieth century physics. She examines Foucault's view of the relationship between power and knowledge and goes on to discuss the new concepts of space-time, subject and causality expressed in relativity theory, quantum mechanics, Saussurean linguistics and Foucault's literary essays. Among the characteristics that have made him influential is his insistent blurring of the border separating philosophy and literature and art carried out on the basis of his confronting the problem of modernism which he characterizes as a permanent task. To that end even his most explicitly historical or strictly epistemological and methodological enquiries which on their surface would seem not to have anything to do with literature

are full of allusions to modernist writers and artists like Mallarmé Baudelaire Artaud Klee Borges Broch sometimes fleetingly sometimes more extensively as is the case with Foucault's life long devotion to Bataille Klossowski Blanchot and de Sade

Understanding Foucault Understanding Modernism shows on the one hand that literature and the arts play a fundamental structural role in Foucault's works while on the other hand it shifts to the foreground what it presumes to be motivating Foucault the interrogation of the problem of modernism

Writing the History of the Mind Cristina Chimisso, 2016-02-11

For much of the twentieth century French intellectual life was dominated by theoreticians and historians of mentalité. Traditionally the study of the mind and of its limits and capabilities was the domain of philosophy however in the first decades of the twentieth century practitioners of the emergent human and social sciences were increasingly competing with philosophers in this field ethnologists sociologists psychologists and historians of science were all claiming to study how people think. Scholars including Gaston Bachelard Georges Canguilhem L. von Brunschvicg Lucien Lévy-Bruhl Lucien Febvre Abel Rey Alexandre Koyré and Hans Reif Metzger were all investigating the mind historically and participating in shared research projects. Yet as they have since been appropriated by the different disciplines literature on their findings has so far failed to recognise the connections between their research and their importance in intellectual history. In this exemplary book Cristina Chimisso reconstructs the world of these intellectuals and the key debates in the philosophy of mind particularly between those who studied specific mentalities by employing prevalently historical and philological methods and those who thought it possible to write a history of the mind outlining the evolution of ways of thinking that had produced the modern mentality. Dr Chimisso situates the key French scholars in their historical context and shows how their ideas and agendas were indissolubly linked with their social and institutional positions such as their political and religious allegiances their status in academia and their familial situation. The author employs a vast range of original research using philosophical and scientific texts as well as archive documents correspondence and seminar minutes from the period covered to recreate the milieu in which these relatively neglected scholars made advances in the history of philosophy and science and produced

Songs of Experience Martin Jay, 2005-01-10

Martin Jay is one of the most influential intellectual historians in contemporary America and here he shows once again a willingness to tackle the big issues in the Western cultural tradition. A remarkable history of ideas about the nature of human experience. Lloyd Kramer author of *Threshold of a New World* A magisterial study of one of the most elusive contested and pervasively important concepts of the Western philosophical tradition. Ranging from epistemology and aesthetics to the philosophy of history religion and politics *Songs of Experience* brilliantly traces the major lines of theory and debate. Insightful rich and masterfully narrated Jay's book sings with that well tempered voice of erudition synthetic intelligence and generous grace that has become his enviable trademark. Richard Shusterman author of *Pragmatist Aesthetics* This illuminating provocative volume consolidates Martin Jay's standing as our leading modern intellectual historian. Ranging sure footedly from ancient to postmodern discourse Jay offers finely balanced readings of thinkers who

have wrestled with the elusive concept of experience Because Jay respects and presents so clearly and sympathetically positions different from his own Songs of Experience gives readers the resources necessary to embrace or resist his own bold interpretations of philosophers from Kant and Burke through Dilthey and Dewey to Foucault and Rorty This book will prove as indispensable to intellectual historians as the idea of experience itself James T Kloppenberg author of The Virtues of Liberalism
