Marxism And The Metropolis New Perspectives In Urban Political Economy:

Marxism and the Metropolis William K. Tabb, Larry Sawers, 1978 *Urban Sprawl* Gregory D. Squires, 2002-05-02 Urban Sprawl is not simply a development that undercuts the quality of life for suburbanites It has raised alarms across the nation as fair housing advocates environmentalists land use planners and even many suburban employers who cannot find the workers they need have recognized that the costs go far beyond aesthetics Despite the agreement that something needs to be done there is no consensus on what works Urban Sprawl Causes Consequences and Policy Responses assembles leading scholars who analyze the major causes and consequences of urban sprawl and the policy initiatives that are being explored in response to these developments **The City in Cultural Context** John Agnew, John Mercer, David Sopher, 2013-02-01 Routledge Library Editions The City reprints some of the most important works in urban studies published in the last century For further information on this collection please email info.research@routledge.co.uk *The Political Economy of City Branding* Ari-Veikko Anttiroiko, 2014-02-24 Globalization affects urban communities in many ways One of its manifestations is increased intercity competition which compels cities to increase their attractiveness in terms of capital entrepreneurship information expertise and consumption This competition takes place in an asymmetric field with cities trying to find the best possible ways of using their natural and created assets the latter including a naturally evolving reputation or consciously developed competitive identity or brand The Political Economy of City Branding discusses this phenomenon from the perspective of numerous post industrial cities in North America Europe East Asia and Australasia Special attention is given to local economic development policy and industrial profiling and global city rankings are used to provide empirical evidence for cities characteristics and positions in the global urban hierarchy On top of this social and urban challenges such as creative class struggle are also discussed The core message of the book is that cities should apply the tools of city branding in their industrial promotion and specialization but at the same time take into account the special nature of their urban communities and be open and inclusive in their brand policies in order to ensure optimal results This book will be of interest to scholars and practitioners working in the areas of local economic development urban planning public management and branding **Reconstructing Urban Economics** Franklin Obeng-Odoom, 2016-08-15 Neoclassical economics the intellectual bedrock of modern capitalism faces growing criticisms as many of its key assumptions and policy prescriptions are systematically challenged Yet there remains one field of economics where these limitations continue virtually unchallenged the study of cities and regions in built environment economics In this book Franklin Obeng Odoom draws on institutional Georgist and Marxist economics to clearly but comprehensively show what the key issues are today in thinking about urban economics In doing so he demonstrates the widespread tensions and contradictions in the status quo showing how to reconstruct urban economics in order to create a more just society and environment **Gentrification of the City** Neil Smith, Peter Williams, 2013-10-15 The author and contributors of this book seek to present alternatives to the

mainstream discussions of gentrification It does not present a single coherent vision of the causes effects and experiences of gentrification but a number of different views that do not always coincide What the authors have in common is the attempt to escape a naive empiricism which has dominated much mainstream research as well as the conviction that questions of social class lie at the heart of this issue This book was first published in 1986 *Splintering Urbanism* Steve Graham, Simon Marvin, 2002-09-11 *Splintering Urbanism* makes an international and interdisciplinary analysis of the complex interactions between infrastructure networks and urban spaces It delivers a new and powerful way of understanding contemporary urban change bringing together discussions about globalization and the city technology and society urban space and urban networks infrastructure and the built environment developed developing and post communist worlds With a range of case studies illustrations and boxed examples from New York to Jakarta Johannesburg to Manila and Sao Paolo to Melbourne *Splintering Urbanism* demonstrates the latest social urban and technological theories which give us an understanding of our contemporary metropolis **America's Johannesburg** Bobby M. Wilson, 2019 Originally published by Rowman Littlefield Publishers an imprint of The Rowman Littlefield Publishing Group Inc Copyright 2000 Title page verso **Keep Out** Sidney Plotkin, 2023-04-28 This title is part of UC Press s Voices Revived program which commemorates University of California Press s mission to seek out and cultivate the brightest minds and give them voice reach and impact Drawing on a backlist dating to 1893 Voices Revived makes high quality peer reviewed scholarship accessible once again using print on demand technology This title was originally published in 1987 Comparative Sociological Research in the 1960s and 1970s Armer, Marsh, 2022-03-28 **The City Aroused** Damon Scott, 2024-01-02 A history of San Francisco that studies change in the postwar urban landscape in relation to the city s queer culture *The City Aroused* is a lively history of urban development and its influence on queer political identity in postwar San Francisco By reconstructing the planning and queer history of waterfront drinking establishments Damon Scott shows that urban renewal was a catalyst for community organizing among racially diverse operators and patrons with far reaching implications for the national gay rights movement Following the exclusion of suspected homosexuals from the maritime trades in West Coast ports in the early 1950s seamen s hangouts in the city came to resemble gay bars Local officials responded by containing the influx of gay men to a strip of bars on the central waterfront while also making plans to raze and rebuild the area This practice ended when city redevelopment officials began acquiring land in the early 1960s Aided by law enforcement they put these queer social clubs out of business replacing them with heteronormative desexualized land uses that served larger postwar urban development goals Scott argues that this shift from queer containment to displacement aroused a collective response among gay and transgender drinking publics who united in solidarity to secure a place in the rapidly changing urban landscape **Private Property and Public Power** Deborah Lynn Becher, 2014 This volume explores the legitimacy of government involvement in private economic actions by presenting a study of property takings In the first comprehensive study of a city s eminent domain acquisitions Debbie

Becher explores which properties Philadelphia pursued for private redevelopment and how stakeholders decided that government actions were either a use or abuse of power
