Marxism And New Left Ideology:

Marxism and New Left Ideology Ileana Rodríguez, William L. Rowe, 1977 **Marxism and New Left Ideology** Ileana Rodríguez, William L. Rowe, 1977 New Left Ideology James L. Wood, 1975 *The Historical Development of West Germany's New Left after 1968* Matthias Dapprich, 2018-03-14

There is a gap in the existing literature as to why the New Left in West Germany entered a phase of rapid decline by the end of the 1970s. The overarching aim of this thesis is to offer a politico-theoretical explanation for the historical development of the New Left and why the red decade between 1967 and 1976 ended so abruptly. Within this context, the thesis will focus on the Maoist K Gruppen and particular emphasis will be placed on the Marxistische Gruppe which defied the general decline of West Germany's New Left and developed into its largest organisation during the 1980s. Furthermore, the Red Cells movement will be analysed from which both currents emerged in the wake of the student movement. In conclusion, this thesis will reveal that the influence of politico-theoretical aspects on the historical development of the New Left has been given too little consideration and that the New Left's fate cannot be adequately explained by external factors but demands the consideration of the very development of theories and the practical conclusions organisations reached regarding their social, economic and cultural circumstances. This work will be the first to provide an insight into the potential of such a theoretical explanation for an understanding of the specific developments of the post-1968 West German New Left.

Science and Ideology in the Policy Sciences Paul Diesing, 2017-07-05

The purpose of this book is to examine how ideology operates in the sense of influencing the conduct of inquiry in the policy sciences defined as economics, political science and sociology. The author seeks to identify the main ideologies and show how each ideology produces a preference for certain problems, methods and hypotheses, how it sensitizes scientists to certain phenomena and suggests certain interpretations of those phenomena and how it closes off other phenomena and concepts from investigation and testing or at least distorts that investigation. In this book, Diesing critically examines all the major schools of policy-related social thought from 1930 to 1975. He deals with Neoclassical Economics and its various applications, the Keynesians, the Systems Approach, the Schumpeter perspective, the Critical Intellectuals, the Pluralists, the J. K. Galbraith School, New Left Marxism and the Ecological Paradigm of Schumacher and

others The world looks different if your perspective is that of a rational small businessman working in a society of hypothetical perfect competition as opposed to that of a proletarian looking up at your oppressors Part One is descriptive and evaluative considering each ideology in turn Part Two considers the policy implications In 1982 Diesing published a remarkable book entitled *Science and Ideology in the Policy Sciences* When I interviewed Diesing in Buffalo in the summer of 1984 he told me that to date the publication had been reviewed in only two professional journals I was astounded *Science Ideology* was the best book I had read in a decade and it related directly to all the policy sciences The lack of professional response may partially reflect Diesing's disinterest in self promotion but beyond this is the community problem Scholars are recognized within disciplines but there is only a tiny community of social science I consider this to be the most brilliant of Diesing's books Like all of Diesing's works it remains highly relevant today from the introduction by Richard Hartwig

Classical Marxism in an Age of Capitalist Crisis William Briggs, 2019-03-14 Will capitalism survive forever Capitalism has always lived in and with crisis Wars revolutions economic depression and repeated recessions the threat of nuclear annihilation and ecological disaster have all failed to break the dominance of this economic and political system Challenging the predominance of capitalism in a world fraught with inequalities this book returns to classical Marxism to reaffirm its relevance It explores the contradictions within capitalism as well as explains why Marxism has been unable to mount a sustained challenge to capitalism In order to explore concrete alternatives in a period of increasing capitalist globalisation and crisis it goes on to present perspectives by which theory and practice might be reunited to building independent political and organisational structures A search for something better this volume will be an engaging read for scholars and researchers of politics especially political theory and political economy economics and sociology **Social Class and**

Marxism Neville Kirk, 2017-07-05 In recent years historians and other social scientists have widely questioned the continued relevance of social class as historical relationship as sociological category as philosophical concept and in terms of its enduring political significance The success of the British Conservative Party since 1979 combined with the weaknesses and failures of the Labour movement have led historians and social scientists to reconsider the general nature of connections between the social and the political and the specific relations between the working class and socialist and Labour politics This collection of essays is a multi disciplinary critique of the new revisionism which demonstrates the continued vitality and promise of non reductionist and non determinist modes of class analysis **Marxism and Education (RLE Edu L)** Madan Sarup, 2013-05-13 This book introduces the student to the various phenomenological and humanistic Marxist perspectives as they are being applied to education and provides an account of the strengths and weaknesses of these perspectives drawing on a variety of disciplines in order to explain the controversies described The opening chapters deal with the phenomenological perspective in the sociology of education discussing its adoption of a phenomenological model of man its use of anthropological studies the importance of classroom studies and its rejection of the liberal philosophy of education The

aim is to show the significance of these ideas for education with a discussion of the concept of alienation and schooling developments in Marxism such as the focus on the mode of production and the labour process and the political economy of education

New Left Revisited John Campbell McMillian, Paul Buhle, 2008 Starting with the premise that it is possible to say something significantly new about the 1960s and the New Left the contributors to this volume trace the social roots the various paths and the legacies of the movement that set out to change America As members of a younger generation of scholars none of them apart from Paul Buhle has first hand knowledge of the era Their perspective as non participants enables them to offer fresh interpretations of the regional and ideological differences that have been obscured in the standard histories and memoirs of the period Reflecting the diversity of goals the clashes of opinions and the tumult of the time these essays will engage seasoned scholars as well as students of the 60s

Philosophical Theology and East-West Dialogue Hisakazu Inagaki, J. Nelson Jennings, 2021-10-25 Philosophical Theology and East West Dialogue is a unique philosophical and theological analysis of certain key interactions between Eastern and Western thinkers The book on the one hand contrasts general traits of Eastern Buddhist thought and Western Greek thought However in doing so it focuses on influential philosophers and theologians who manifest particular instances of wider issues The result is a careful examination of basic questions that offers both broad implications and concrete specificity in its approach The book itself is an instance of East West dialogue Independently of each other both authors had previously engaged in serious cross cultural studies The Japanese Inagaki had researched Western science and philosophy then written in Japanese comparative studies of Japanese thought The North American Jennings had researched Japanese theology They brought these backgrounds together dialoguing with each other until the present study emerged Several creative Japanese thinkers as well as important Westerners are taken up The study follows the lead of many Eastern impulses but it also critically utilizes Western methods Contemporary thinking on religious plurality is carefully examined This new study is a must for those interested in philosophy and theology in general and East West interaction in particular

Critical Realism for Marxist Sociology of Education

Grant Banfield, 2015-09-16 This book offers a critical realist intervention into the field of Marxist Sociology of Education. Critical realism as developed by British philosopher Roy Bhaskar is known for its capacity to serve as a conceptual underlabourer to applied fields like education. Indeed its success in clarifying and resolving thorny issues of educational theory and practice is now well established. Given critical realism's sympathetic Marxist origins its productive and critical engagement with Marxism has an even longer history. To date there has been little sustained attention given to the application of critical realism to Marxist educational praxis. The book addresses this gap in existing scholarship. Its conceptual ground clearing of the field of Marxist Sociology of Education centres on two problematics well known in the social sciences: naturalism and the structure-agency relation. Marxist theory from the days of Marx to the present is shown to also be haunted by these problematics. This has resulted in considerable tension around the meaning and nature of, for example, reform, revolution, class determinism and class struggle. With its emergence in the 1970s as a child of Western Marxism the field continues to be an expression of these tensions that seriously limit its transformative potential. Addressing these issues and offering conceptual clarification in the interests of revolutionary educational practice, *Critical Realism for Marxist Sociology of Education* provides a new perspective on education which will be of interest to students, scholars and practitioners alike.

Marxist Politics Md. Ayub Mallick, 2022-12-15 This book deals with the main doctrines of Marxist politics. Clearly and simply written, the book explores the views of classical Marxists along with the findings of Western and Analytical Marxists. It also shows a distinction between Marxist and non-Marxist views on politics. Their points of difference as well as their common roots are thus clearly accounted for. Marxist politics is a coherent system of ideas and theories of class struggle, party, revolution and the state developed in response to a series of major and interrelated changes: the emergence of a capitalist economy, the rise of the modern nation state and the development of modern science which transformed both the society and politics. This book is intended to explore these ideas and theories. Particular emphasis has been put on the ideas and views of critical Marxists in a separate chapter. The book includes brief bibliographical details of major individual thinkers as well as an annotated bibliography for further reading. Print edition not for sale in South Asia, India, Sri Lanka, Nepal, Bangladesh, Pakistan and Bhutan.

Another Kind of War

John A. Lynn, 2019-07-23 An accessible and comprehensive history of terrorism from ancient times to the present. In the years since 9/11 there has been a massive surge in interest surrounding the study of terrorism. This volume applies distinguished military historian John Lynn's lifetime of research and teaching experience to this difficult topic. As a form of violence that implies the threat of future violence, terrorism breeds insecurity, vulnerability and a desire for retribution that has far-reaching consequences. Lynn distinguishes between the paralyzing effect of fear and the potentially dangerous and chaotic effects of moral outrage and righteous retaliation guiding counterterrorism efforts. In this accessible and comprehensive text, Lynn traces the evolution of terrorism over time, exposing

its constants and contrasts In doing so he contextualizes this violence and argues that a knowledge of the history and nature of terrorism can temper its psychological effects and can help us more accurately and carefully assess threats as well as develop informed and measured responses

Marxism, Class Analysis and Socialist Pluralism (RLE Marxism) Les Johnston, 2015-04-17 This book first published in 1986 presents a radical challenge to socialist orthodoxy subjecting a key component of that orthodoxy Marxism to sustained criticism Les Johnston argues that Marxism cannot provide the foundations for a rigorous socialist theory or an effective socialist politics A fundamental element of this criticism is the suggestion that the problem of reductionism which has preoccupied Marxists is a red herring Marxism's problem is not its reductionism but its theoretical incoherence Marxism is not deterministic for there is invariably an indeterminate relationship between the materialism it invokes and the forms of politics it adopts However materialism is an obstacle to socialist theory The contradictions and failures of Marxist class analysis suggest that the class concept is inadequate to the demands that socialists continue to place on it It is not merely class which is problematic however but the conception of political interests which is associated with it Even recent Marxist revisionists who dispense with class primacy are unwilling to come to terms with the question of how socialist political interests are constituted Socialist theory has to recognise the varied forces and interests on the left and an effective socialism will have to be a pluralistic one This means there can be no general theory of socialism since a pluralistic socialism has to be able to adjust to varying social conditions

The Charmed Circle of Ideology Geoff Boucher, 2009-03 Set against the collapse of social theory into a theory of ideological discourse Geoff Boucher sets to work a rigorous mapping of the contemporary field targeting the relativist implications of this new form of philosophical idealism Offering a detailed and immanent critique Boucher concentrates his critical attention on the postmarxism of Laclau and Mouffe Butler and Žižek In response Boucher points to intersubjectivity as an exit from postmarxist theory's charmed circle of ideology

Marx for Our Times Daniel Bensaïd, 2002 Without denying the contradictory character of Marx's thought Daniel Bensaïd sets out to demonstrate that it was not a philosophy of the end of history an empirical sociology of classes or a positive science of economics positing an inexorable progress towards an ineluctable communism Instead Marx's critique of political economy encompassed three great critiques of the scientific and political canons of its age of historical reason sociological rationality and scientific positivism which make the thinker from the nineteenth century fully relevant to the twenty first century of global capitalism Indeed we find here a post postmodern Marx able to inhabit a contemporary world replete with contingency emergency and contradictory temporalities Published in France on the eve of the strikes of 1995 that signalled a profound revolt against la pensée unique Marx for Our Times is an invitation to rediscover our foremost contemporary Karl Marx
