Century, An Intellectual History - Volume I Roberto Marchionatti, 2020-05-20 This book set out over three volumes provides a
comprehensive history of economic thought in the 20th century with special attention to the cultural and historical
background in the development of theories to the leading or the peripheral research communities and their interactions or
controversies and finally to an assessment and critical appreciation of economic theories throughout these times It takes as
its subject matter the canon of publications by major thinkers who self consciously conceived of themselves as economists in
the modern academic sense of the term It is a history of how when and where the discipline of Economics took root in major
universities and scientific communities of economists and evaluates the emergence of different schools of thoughts Volume I
addresses economic theory in the golden age of capitalism It considers the contributions of Marshall Pareto Wicksteed
Schmoller Bohm Bawerk Schumpeter Wicksell Fisher Veblen and other major thinkers as well as the universities of
Cambridge Lausanne Vienna Berlin and some others in US before concluding with a look at the impact that the great war had
on the discipline This work provides a significant and original contribution to the history of economic thought and gives
insight to the thinking of some of the major international figures in economics as shown in major works published across the
last 130 years It will appeal to students scholars and the more informed reader wishing to further their understanding of the
history of the discipline **The Making of Marx's Capital Volume 1** Roman Rosdolsky, 1992-01-01 A major work of
interpretation and criticism written over fifteen years by one of the foremost representatives of the European Marxist
tradition Rosdolsky investigates the relationship between various versions of Capital and explains the reasons for Marx's
successive reworkings he provides a textual exegesis of Marx's Grundrisse now widely available and reveals its
methodological riches He presents a critique of later work in the Marxist tradition on the basis of Marx's fundamental
distinction between capital in general and capital in concrete reality The Making of Marx's Capital was first published in

1968 as *Zur Entstehungsgeschichte des Marx'schen Kapital* *The Value Dimension (Routledge Revivals)* Ben Fine, 2013-05-02 The essays in this edited collection first published in 1986 focus on important debates surrounding the central Marxian problem of the transformation of values into prices The collection brings together major contributions on the value theory debate from the decade prior to the book's publication and assesses the debate's significance for wider issues Value theory emerges as much more than a technical relation between labour time and prices and the structure of the capitalist economy is scrutinised This is a relevant and comprehensive work valuable to students academics and professionals with an interest in political and Marxist economy **Karl Marx's Economics** John Cunningham Wood, 2004-11 *Value and the World Economy Today* R. Westra, A. Zuege, 2003-11-30 Value and the World Economy Today brings together a diverse group of globally renowned scholars of international political economy and critical economics to examine the relevance of value theory for understanding the world economy today The book is unique in the way that it connects literatures that have for the most part developed in isolation from each other and therefore brings questions of theory to bear directly upon the problems of analyzing current global trends and formulating responses to them Main Currents in Sociological Thought: Volume One Raymond Aron, 2018-10-03 This is the first part of Raymond Aron's landmark two volume study of the sociological tradition arguably the definitive work of its kind More than a work of reconstruction Aron's study is at its deepest level an engagement with the very question of modernity how did the intellectual currents which emerged in the eighteenth century shape the modern political and philosophical order With scrupulous fairness Aron examines the thoughts and arguments of the major social thinkers to discern how they answered this question Volume One explores three traditions the French liberal school of political sociology represented by Montesquieu and Tocqueville the Comtean tradition anticipating Durkheim in its elevation of social unity and consensus and the Marxists who posited the struggle between classes and placed their faith in historical necessity In his customary clear and penetrating prose Aron argues that each of these schools offers its own theory of the diversity of societies and that each is inspired both by moral convictions and by scientific hypotheses This Routledge Classics edition includes an introduction by Daniel J Mahoney and Brian C Anderson

A History of Marxian Economics, Volume II Michael Charles Howard, John Edward King, 2014-07-14 This second volume completes a critical history of the social political and theoretical forces behind Marxian economics the only work in English to offer such comprehensive treatment Beginning with Marxian analyses of the Great Depression and Stalinism it explores the theories developed to explain the long boom in Western capitalism after the Second World War Later chapters deal with post Leninist theories of imperialism and continuing controversies in value theory and the theory of exploitation After outlining recent work on the second slump the integration of rational choice theory into Marxism and the political economy of socialism the book concludes with a review and evaluation of Marxian theory over the whole period since Marx's death Praise for the first volume Howard and King have done an excellent job One comes away with the impression of

Marxian economics being a vibrant subject relevant to the problems of these times and useful in practical matters Meghnad Desai The Times Higher Education Supplement Originally published in 1992 The Princeton Legacy Library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of Princeton University Press These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905

The Alienated Subject James A. Tyner, 2022-03-08 A timely and provocative discussion of alienation as an intersectional category of life under racial capitalism and white supremacy From the divisiveness of the Trump era to the Covid 19 pandemic alienation has become an all too familiar contemporary concept In this groundbreaking book James A Tyner offers a novel framework for understanding the alienated subject situating it within racial capitalism and white supremacy Directly addressing current economic trends and their rhetoric of xenophobia discrimination and violence The Alienated Subject exposes the universal whitewashing of alienation Drawing insight from a variety of sources including Marxism feminism existentialism and critical race theory Tyner develops a critique of both the liberal subject and the alienated subject Through an engagement with the recent pandemic and the Black Lives Matter movement he demonstrates how the alienated subject is capable of both compassion and cruelty it is a sadomasochist Tyner goes on to emphasize the importance of the particular places we find the alienated subject and how the revolutionary transformation of alienation is inherently a spatial struggle Returning to key interlocutors from Sartre to Fromm he examines political notions of distance and the spatial practices of everyday life as well as the capitalist conditions that give rise to the alienated subject For Tyner the alienated subject is not the iconic romanticized image of Marx's proletariat Here he calls for an affirmation of love as a revolutionary concept necessary for the transformation of a society marred by capitalism into an emancipated caring society conditioned by socially just relations

Economic Growth and Long Cycles Nikolaos Chatzarakis, Persefoni Tsaliki, Lefteris Tsoulfidis, 2024-06-03 Contemporary capitalism is characterized by periods of vigorous economic growth and periods of slow or even negative growth This book draws on the classical political economy approach to consider both economic cycles and economic growth and draw conclusions about the inherent instability of the modern economy The book shows that the work of the old classical economists Smith and Ricardo and Marx is theoretically sound and capable of providing answers to both growth and cycles It also demonstrates the potential and natural integration of growth and cycles in a single model The microeconomic foundation of this model is the labor theory of value which continues with the General Law of Capital Accumulation the Law of the Falling Rate of Profit and the movement of the Industrial Reserve Army of Labour Finally a dynamic model of growth cum cycles is constructed consisting of the evolution and interaction of five key variables namely the rate of profit the propensity to invest in fixed capital technological change the reserve army of labour and the rate of capital devaluation The analysis

demonstrates that economic growth and cycles are not disconnected from each other as they have been treated in the literature but rather interdependent aspects of the same evolutionary process of a capitalist economy This book will interest readers in the history of economic thought economic growth and development macroeconomics and political economy

Sraffa and the Reconstruction of Economic Theory: Volume Three E. Levrero,A. Palumbo,A. Stirati,2013-12-16

This book accounts for the work done around the two central aspects of Piero Sraffa s contribution to economic analysis namely the criticism of the neoclassical theory of value and distribution and the construction of economic theory along the lines of the Classical approach **Accounting for Value in Marx's Capital** Robert Bryer,2017-09-07 Many scholars discuss Marx s Capital from many perspectives but Accounting for Value uniquely advances and defends an accounting interpretation of his theory of value that he used it to explain capitalists accounts It confirms and builds on the Temporal Single System Interpretation s refutation of the charge that Marx s illustration of the transformation from values to prices is inconsistent and its defense of his Law of the Tendency of the Rate of Profit It rejects other interpretations by showing that only a temporal single system interpretation is consistent with Marx s accounting The book shows that Marx became seriously interested in accounts from the late 1850s during an important period in the development of his critique of political economy asking Engels for information and explanations Examining their letters in the context of Marx s evolving work it argues supports the hypothesis that discovering he could explain them with his theory of value gave him the breakthrough he needed to decide how to present his work and explains why in 1862 he decided to change its title to Capital Marx s explanations of capitalist accounting it concludes amount to an accounting theory that explains how individual capitalists and the capital market use what is for many the invisible hand of accounting to control the production and distribution of surplus value Marx claimed his theory of value was a work of science a critique of political economy that would deliver a theoretical blow from which the bourgeoisie would never recover He failed critics argue because his critique depends on hypothetical entities which we cannot directly observe such as value and abstract labour surplus value which means his theory is not open to empirical refutation The book however argues that he used his theory of value to explain the phenomenal forms of profit rate of profit etc by explaining the observable accounting principles and practices capitalists use to calculate and control them in which as he said we can glimpse the determination of value by socially necessary labor time which experience could have refuted Marx's Concept of the Alternative to Capitalism Peter Hudis,2012-07-25 This is the first book length study of Marx s concept of the alternative to capitalism It shows that his critique of capital flowed from a commitment to a specific vision of the kind of human relations that define a new society **Parallax** Dominik Finkelde,Slavoj Žižek,Christoph Menke,2021-07-15 Parallax or the change in the position of an object viewed along two different lines of sight and more precisely the assumption that this adjustment is not only due to a change of focus but a change in that object s ontological status has been a key philosophical concept throughout history Building upon Slavoj i ek s The Parallax View this volume

shows how parallax is used as a figure of thought that proves how the incompatibility between the physical and the theoretical touches not only upon the ontological but also politics and aesthetics With articles written by internationally renowned philosophers such as Frank Ruda Graham Harman Paul Livingston and Zizek himself this book shows how modes of parallax remain in numerous modern theoretical disciplines such as the Marxian parallax in the critique of political economy and politics and the Hegelian parallax in the concept of the work of art while also being important to debates surrounding speculative realism and dialectical materialism Spanning philosophy parallax is then a rich and fruitful concept that can illuminate the studies of those working in epistemology ontology German Idealism political philosophy and critical theory

Perspectives In U.s. Marxist Anthropology David J. Hakken, Hanna Lessinger, June Nash, Florence Babb, 2019-06-04 An assessment of current trends in Marxist anthropology this collection of essays reflects both the unifying force of Marxist thought and the diversity of contemporary anthropology Linked by a common approach a shared commitment to Marxist analysis the contributors look at a variety of phenomena including the problems of labor and work in terms of a coherent theory of Marxism Examining political economic and ethnic situations the authors discuss social structures ideology and class formation This unique volume warrants the attention of both Marxists and non Marxists in anthropology and of scholars in other fields

Henryk Grossman Works, Volume 1 Henryk Grossman, 2018-11-26 This collection includes texts by Henryk Grossman that are primarily concerned with economic theory monographs articles essays letters and manuscript material Many have never been published in English before some in any language The first in four volumes of Grossman's works it provides the basis for a deeper understanding of Grossman's contributions to Marxist economic theory and critique of bourgeois economics Rick Kuhn's introduction explains the contexts in which the texts were written and establishes their contemporary relevance

Conversations on Social Choice and Welfare Theory - Vol. 1 Marc Fleurbaey, Maurice Salles, 2021-03-30 This volume presents interviews that have been conducted from the 1980s to the present with important scholars of social choice and welfare theory Starting with a brief history of social choice and welfare theory written by the book editors it features 15 conversations with four Nobel Laureates and other key scholars in the discipline The volume is divided into two parts The first part presents four conversations with the founding fathers of modern social choice and welfare theory Kenneth Arrow John Harsanyi Paul Samuelson and Amartya Sen The second part includes conversations with scholars who made important contributions to the discipline from the early 1970s onwards This book will appeal to anyone interested in the history of economics and the history of social choice and welfare theory in particular

Value and Unequal Exchange in International Trade Andrea Ricci, 2021-05-19 Contrary to the claims made by neoliberal governments and mainstream academics this book argues that the huge increase in trade in recent decades has not made the world a fairer place instead the age of globalization has become a time of mass migration caused by increasing global inequality The theory of unequal exchange challenges the free trade doctrine claiming that transfers of value from poorer to

richer countries are hidden behind apparently equivalent market transactions Following a critical review of the existing approaches the book proposes a general theory of unequal exchange in the light of an innovative reconstruction of Marx's international law of value in which money and exchange rates play a crucial role in decoupling value captured from value produced by different countries even in perfectly competitive world markets On this theoretical basis the book provides an empirical analysis of the international transfers of value in both traditional trade and Global Value Chains The resulting world mapping of unequal exchange shows the geographical hierarchy of capital global exploitation by revealing a world divided into two quite separate camps of donor and receiving countries the former being the poorer countries and the latter the richer countries This book is addressed to scholars and students of economics and social sciences as well as activists of the North and the South interested in a better understanding of the asymmetric power relations implied in global trade It makes a significant contribution to the literature on political economy trade Marxism international relations and economic geography
