^AOxford Handbook of Women and Competition Maryanne L. Fisher, 2017-08-14 The Oxford Handbook of Women and Competition is one of the first scholarly volumes to focus specifically on competition and the competitive forces between women Chapters provide readers with a definitive view of the current state of research and collectively address the adaptive and socio cultural foundations of women's competitive behavior motivations and cognitions *The Limits of the Human Species in the Face of Sustainable Development* Alberto Roghi, 2023-06-16 This book is the product of the author's research into the possible causal links between the COVID 19 epidemic and the ongoing environmental catastrophe The research has confirmed not only the existence of the link but also the strict dependence of the survival of the human species on the radical modification of the current development model The book presents a critical reflection on the limits of our species in the face of climate change and introduces anthropological religious and philosophical issues that offer new tools for understanding and analysing the present and future of humanity **A Philosophy of the Human Being** Julian A. Davies, 2009-02-26 This book is an accessible text that explores what it means to be human It is designed for an introductory course in Philosophy of the Human Being and contains an abundance of current examples with embedded quotations from philosophers and selections from contemporary writers following the chapters The author provides an introduction to philosophy then discusses the topics of human sociability intelligence freedom duality individuality and immortality He concludes by highlighting the contrast between realism and materialism This systematic approach focuses on issues with a minimum of metaphysical superstructure and jargon and provides connections between the readings **Bioengineering of the Skin** Klaus-Peter Wilhelm, Peter Elsner, Enzo Berardesca, Howard I. Maibach, 2006-09-27 Spanning the many advancements that have taken place in the field since the First Edition of this book was published this Second Edition emphasizes the imaging of the skin in its entirety rather than focusing solely on surface layers The Second Edition includes new chapters on technologies such as in vivo confocal laser scanning microscopy Rama *Sex, Reproduction and Darwinism* Filomena de Sousa, Gonzalo Munévar, 2015-10-06 This collection of essays looks at sexuality and reproduction from an evolutionary perspective Covering experimental discoveries as well as theoretical investigations the volume explores the relationship between evolution and other areas of human behaviour *History beyond apartheid* Thula Simpson, 2023-04-18 This edited volume encompasses a range of themes and approaches relevant to the field of South African history today as viewed from the perspective of practicing historians at the cutting edge of research in the discipline The collection features the historians offering critical reflection on the theoretical and methodological aspects of their work This involves them both looking back at the inherited historiographical tradition in the respective areas of their research while also pointing forwards to possible future directions for scholarly engagement **The Caveman Mystique** Martha McCaughey, 2008 Has evolution made men promiscuous skirt chasers Pop Darwinian claims about men's irrepressible heterosexuality have become increasingly

common and increasingly common excuses for men's sexual aggression The Caveman Mystique traces such claims about the hairier sex through evolutionary science and popular culture After outlining the social and historical context of the rise of pop Darwinism's assertions about male sexuality and their appeal to many men Martha McCaughey shows how evolutionary discourse can get lived out as the biological truth of male sexuality Although evolutionary scientists want to use their theories to solve social problems evolutionary narratives get invoked by men looking for a Darwinian defense of bad boy behaviors McCaughey argues that evolution has nearly replaced religion as a moral guide for understanding who we are and what we must overcome to be good people Bringing together insights from the fields of science studies body studies feminist theory and queer theory The Caveman Mystique offers a fresh understanding of science science popularization and the impact of science on men's identities making a convincing case for deconstructing rather than defending the caveman *Human Ethology* Irenaus Eibl-Eibesfeldt, 2017-07-28 With the discovery of conditioned reflexes by I P Pavlov the possibilities for experimenting following the example set by the classical exact sciences were made available to the behavioral sciences Many psychologists hoped that the component parts of behavior had also been found from which the entire multifaceted cosmos of behavior could then be constructed An experimentally oriented psychology subsequently developed including the influential school of behaviorism This first text on human ethology presents itself as a unified work even though not every area could be treated with equal depth For example a branch of ethology has developed in the past decade which places particular emphasis on ecology and population genetics This field known as sociobiology has enriched discussion beyond the boundaries of behavioral biology through its stimulating and often provocative theses After vigorous debates between behaviorists anthropologists and sociologists we have entered a period of exchange of thoughts and a mutual approach which in many instances has led to cooperative projects of researchers from different disciplines This work offers a biological point of view for discussion and includes data from the author's cross cultural work and research from the staff of his institute It confirms above all else the astonishing unity of mankind and paints a basically positive picture of how we are moved by the same passions jealousies friendliness and active curiosity The need to understand ourselves has never been as great as it is today An ideologically torn humanity struggles for its survival Our species does not know how it should compensate its workers and it experiments with various economic systems constitutions and forms of government It struggles for freedom and stumbles into newer conflicts Population growth is apparently completely out of hand and at the same time many resources are being depleted We must consider our existence ratio Ideological Fixation Azar Gat, 2022 After theorists around 1960 proclaimed the death of ideology ideological divides and clashes have reemerged with renewed intensity throughout the world including in the liberal democracies In the United States they have become particularly venomous The other side is widely viewed as malicious irrational or downright stupid and often as barely legitimate The zeal of the opposing sides is often scarcely less than that which characterized the religious ideologies of old Indeed historical religious ideologies have largely been replaced

by secular religions or religion substitutes The book is not another survey of past and present ideologies It is an attempt to understand the cognitive emotional and social roots of ideology and ideological fixation It combines insights from evolutionary psychology regarding the nature of some of our deepest proclivities with a broad sweep through history

From Object to Experience Harry Francis Mallgrave, 2018-06-28 Harry Francis Mallgrave combines a history of ideas about architectural experience with the latest insights from the fields of neuroscience cognitive science and evolutionary biology to make a powerful argument about the nature and future of architectural design Today the sciences have granted us the tools to help us understand better than ever before the precise ways in which the built environment can affect the building user's individual experience Through an understanding of these tools architects should be able to become better designers prioritizing the experience of space the emotional and aesthetic responses and the sense of homeostatic well being of those who will occupy any designed environment In *From Object to Experience* Mallgrave goes further arguing that it should also be possible to build an effective new cultural ethos for architectural practice Drawing upon a range of humanistic and biological sources and emphasizing the far reaching implications of new neuroscientific discoveries and models this book brings up to date insights and theoretical clarity to a position that was once considered revolutionary but is fast becoming accepted in architecture
