Placida House Thomas William, 2003-02-07 What do we as a society do with our aged and ailing A fortunate few spend their last years in small caring rest homes like Placida House where each resident is lovingly treated like a member of the family Baby Dog Benji rules the roost lavishing canine warmth and affection Lee and Svea are the expert cook and housemother absolutely indispensable and adored by all Henry does the maintenance and takes care of the grounds and occasionally saves somebody's life And Dr William is the all wise father figure who patiently steers Placida House safely through many a storm and keeps things running on an even keel Set aside the cares of the day for a moment and enter the safe haven of Placida House where there's plenty of laughter good spirits comic absurdity and heartwarming spiritual growth Here it is that men come to grips with their mortality and their prejudices and try to answer the questions of what's it all been about and what's it all for But mostly here is where they at last find peace protection happiness and sincere acceptance

1842-1899 is without doubt one of Norway's greatest scientific talents. His mathematical works have made him famous around the world, no less than Niels Henrik Abel. The terms Lie groups and Lie algebra are today part of the standard mathematical vocabulary. In his comprehensive biography, the author Arild Stubhaug lets us come close to both the person Sophus Lie and his time. We follow him through childhood at the vicarage in Nordfjordeid, his growing up in Moss, school and studying in Christiania, travelling in Europe and his contacts with the leading mathematicians of his time. The academic and scientific career brought Lie from Christiania to Leipzig as professor, before the attempt to call him back to Norway when she stood on the threshold to national sovereignty was successful.
