Customer Evaluations of Service Failure and Recovery Encounters Klaus Schöfer,2003-01-10 Inhaltsangabe Abstract Although many firms may aspire to offer zero defects service the possibility of service failures cannot be wholly eliminated simply because of the variety of factors that may

impact on the delivery process. Consequently, the manner in which firms respond to service failures is increasingly seen as a factor that may separate the more successful firms from the others. This response, termed service recovery, is defined as the process by which the firm attempts to rectify a service failure. Some researchers suggest that a firm's response to failures can either reinforce customer relationships or exacerbate the negative effects of the failure. In fact, some assert that it is often a firm's response to a failure rather than the failure itself that triggers discontent. Recoveries are critical because customers perceiving poor recovery efforts may dissolve the buyer-seller relationship and purchase elsewhere. Such customer turnover can be costly, especially given that it costs more to win new customers than it does to retain current ones. As a consequence, service failure and recovery encounters have been recognised as critical moments of truth for organisations in their efforts to satisfy and keep customers. Although there is a substantial literature on customer dissatisfaction and complaining behaviour, relatively little progress has been made in developing a theoretical understanding of how consumers evaluate a company's response to service failure and recovery encounters. Using perceived justice theory as a conceptual foundation, the current research develops and tests a model that 1) explains how customers evaluate service failure and recovery encounters and 2) how these evaluations affect customer satisfaction and subsequent post-purchase behaviour and attitudes. The study employed a two-stage research strategy. The first phase of the research included an extensive literature review and exploratory research involving semi-structured interviews and experiments. This first stage resulted in the development of a research model establishing the links between the antecedents and outcomes of customer satisfaction judgments involving service failure and recovery encounters. In the second phase, the proposed conceptual model was evaluated through a self-administered cross-sectional survey. Respondents were requested to recall a time when they complained to a travel and tourism services provider about a failed

Handbook of Research on the Interplay Between Service Quality and Customer Delight Sarma, Sarmistha, Gupta, Neha, 2023-01-31 Research in the field of service quality and consumer behavior has developed in many dimensions in the past decade. A number of models have been developed to determine the factors leading to satisfaction; however, within the past few years, scholars have proved that satisfaction is not sufficient to leave a strong mark in the minds of the customers. Service quality and customer delight have been the buzzwords in the business world in recent times as scholars have proven that customer delight is the key to customer retention. The *Handbook of Research on the Interplay Between Service Quality and Customer Delight* considers how companies around the world in a cross-cultural environment are dealing with service quality and customer delight and proposes a global outlook on the current trends, tactics, and opportunities. Covering key topics such as buyer funnels, consumer dissonance, and digital solutions, this reference work is ideal for business owners, managers, industry professionals, researchers, scholars, practitioners, academicians, instructors, and students.
