Paradigms of Paranoia Samuel Chase Coale, 2019-05-14 An examination of the American fascination with conspiracy and the distrust it sows The recent popularity of The DaVinci Code and The Matrix trilogy exemplifies the fascination Americans have with conspiracy driven subjects Though scholars have suggested that in modern times the JFK assassination initiated an industry of conspiracy i e Vietnam and the Pentagon Papers Area 51 Iran Contra Affair Samuel Chase Coale reminds us in this book that conspiracy is foundational in American culture from the apocalyptic Biblical narratives in early Calvinist households to the fear of Mormon Catholic Jewish and immigrant populations in the 19th century Coale argues that contemporary culture a landscape characterized by doubt ambiguity fragmentation information overload and mistrust has fostered a radical skepticism so pervasive that the tendency to envision or construct conspiracies often provides the best explanation for the chaos that surrounds us Conspiracy as embodied in narrative form provides a fertile field for explorations of the anxiety lying at the heart of the postmodern experience Thomas Pynchon s The Crying of Lot 49 Don DeLillo s Underworld Toni Morrison s Jazz and Paradise Joan Didion s Democracy Tim O'Brien s In the Lake of the Woods and Paul Auster s New York City Trilogy are some of the texts Coale examines for their representations of isolated individuals at the center of massive anonymous master plots that lay beyond their control These narratives remind us that our historical sense of national identity has often been based on the demonizing of others and that American fiction arose and still flourishes with apocalyptic visions

Behavioral and Physiological Bases of Attentional Biases: Paradigms, Participants, and Stimuli Daniela M. Pfabigan, Ulrich S. Tran, 2015-08-21 Attentional biases ABs play a prominent role in the development and maintenance of clinically relevant symptoms of for example anxiety and depression In particular increased attentional orienting and preoccupation with biologically relevant and mood congruent stimuli has been observed suggesting that the visual attentional system is overly sensitive towards threat cues and avoidant of cues of reward in these disorders First several experimental paradigms have been used to assess ABs e g the dot probe task the emotional stroop task and the spatial cueing task amongst others Yet these paradigms are based on different theoretical backgrounds and target different stages of the attentional process Thus different paradigms provided converging as well as diverging evidence with regard to ABs However it is often not entirely clear to what extent this reflects real differences and commonalities or is caused by differences in methodology For example behavioral reaction time data can only provide a snapshot of selective attention Measuring event related potentials eye movements or functional brain imaging data enables exploring the exact temporal

and spatial dynamics of attentional processes Moreover neuroimaging data reveal specific cortical networks involved in directing attention toward a stimulus or disengaging from it Second ABs have been mainly discussed as symptoms of psychopathology while results in healthy participants are still scarce previous studies mostly compared extreme groups However a comprehensive theoretical and empirical account of ABs in psychopathology also requires a thorough account of ABs in the general healthy population Moreover the effect of gender as an important contributing factor in processing of emotional stimuli has also not been considered systematically in previous research Third a variety of stimuli has been used in the assessment of ABs So far mostly facial or word stimuli have been applied However in everyday life not only facial emotion recognition but also a fast evaluation of complex social situations is important to be effective in social interactions Recent research started using more complex stimuli to raise ecological validity However the use of ecologically valid stimuli poses some methodological challenges and needs to be applied more systematically The aim of this research topic is to integrate different paradigms and stimuli addressing individuals from the whole range of the population continuum and to apply different methodological approaches It is intended to bring together expertise in stimulus selection timing and implementing issues advancing and broadening the overall understanding of ABs

Outsider Theory Jonathan Eburne, 2018-09-18 A vital and timely reminder that modern life owes as much to outlandish thinking as to dominant ideologies What do the Nag Hammadi library Dan Brown's *The Da Vinci Code* speculative feminist historiography Marcus Garvey's finances and maps drawn by asylum patients have in common Jonathan P Eburne explores this question as never before in *Outsider Theory* a timely book about outlandish ideas Eburne brings readers on an adventure in intellectual history that stresses the urgency of taking seriously especially in an era of fake news ideas that might otherwise be discarded or regarded as errant unfashionable or even unreasonable Examining the role of such thinking in contemporary intellectual history Eburne challenges the categorical demarcation of good ideas from flawed wild or bad ones addressing the surprising extent to which speculative inquiry extends beyond the work of professional intellectuals to include that of nonprofessionals as well whether amateurs unfashionable observers or the clinically insane Considering the work of a variety of such figures from popular occult writers and gnostics to so called outsider artists and pseudoscientists Eburne argues that an understanding of its circulation and recirculation is indispensable to the history of ideas He devotes close attention to ideas and texts usually omitted from or marginalized within orthodox histories of literary modernism critical theory and continental philosophy yet which have long garnered the critical attention of specialists in religion science studies critical race theory and the history of the occult In doing so he not only sheds new light on a fascinating body of creative thought but also proposes new approaches for situating contemporary humanities scholarship

within the history of ideas However important it might be to protect ourselves from bad ideas Outsider Theory shows how crucial it is for us to know how and why such ideas have left their impression on modern day thinking and continue to shape its evolution

The Maximalist Novel Stefano Ercolino,2014-06-19 The Maximalist Novel sets out to define a new genre of contemporary fiction that developed in the United States from the early 1970s and then gained popularity in Europe in the early twenty first century The maximalist novel has a very strong symbolic and morphological identity Ercolino sets out ten particular elements which define and structure it as a complex literary form length an encyclopedic mode dissonant chorality diegetic exuberance completeness narratorial omniscience paranoid imagination inter semiocity ethical commitment and hybrid realism These ten characteristics are common to all of the seven works that centre his discussion Gravity's Rainbow by Thomas Pynchon Infinite Jest by David Foster Wallace Underworld by Don DeLillo White Teeth by Zadie Smith The Corrections by Jonathan Franzen 2666 by Roberto Bolaño and 2005 dopo Cristo by the Babette Factory Though the ten features are not all present in the same way or form in every single text they are all decisive in defining the genre of the maximalist novel insofar as they are systematically co present Taken singularly they can be easily found both in modernist and postmodern novels which are not maximalist Nevertheless it is precisely their co presence as well as their reciprocal articulation which make them fundamental in demarcating the maximalist novel as a genre

Conspiracy Theories in the United States and the Middle East Michael Butter,Maurus Reinkowski,2014-02-27 Conspiracy Theories in the United States and the Middle East is the first book to approach conspiracy theorizing from a decidedly comparative and interdisciplinary perspective Whereas previous studies have engaged with conspiracy theories within national frameworks only this collection of essays draws attention to the fact that conspiracist visions are transnational narratives that travel between and connect different cultures It focuses on the United States and the Middle East because these two regions of the world are entangled

in manifold ways and conspiracy theories are currently extremely prominent in both The contributors to the volume are scholars of Middle Eastern Studies Anthropology History Political Science Cultural Studies and American Studies who approach the subject from a variety of different theories and methodologies However all of them share the fundamental assumption that conspiracy theories must not be dismissed out of hand or ridiculed Usually wrong and frequently dangerous they are nevertheless articulations of and distorted responses to needs and anxieties that must be taken seriously Focusing on individual case studies and displaying a high sensitivity for local conditions and the cultural environment the essays offer a nuanced image of the workings of conspiracy theories in the United States and the Middle East **Conspiracy,**

Revolution, and Terrorism from Victorian Fiction to the Modern Novel Adrian Wisnicki, 2013-01-11 Drawing on critical and theoretical work by Miller Boone Foucault Jameson and others as well as cultural history affect theory and contemporary psychiatric literature the author defines and explores what he calls the Victorian conspiracy narrative tradition a tradition which embraces classic Victorian works like Bleak House Great Expectations Vilette and The Moonstone as well as later Victorian and Edwardian novels by James Conrad and Chesterton and early spy thrillers such as The Riddle of the Sands and The Thirty Nine Steps In reading these works as instances of a single literary tradition the conspiracy narrative tradition the author traces how the representation of conspiracy changes in nineteenth century British literature and argues that many of these changes occur in response to significant Victorian era developments such as the European revolutions of 1848 49 the rise of British law enforcement agencies the growth of Irish Fenian terrorism and the fin de si cle waning of the British Empire The book also explores the roles that conspiratorial indeterminacy and irony play in shaping the Victorian conspiracy narrative tradition and examines how modern works by Proust Kafka and Pynchon appropriate elements from Victorian conspiracy narratives Finally in using recent work on affect theory as well as studies of paranoia by Freud Shapiro and Meissner the book traces how Victorian works fashion the paranoid subject a discursive process that ultimately leads to the emergence of the modern fictional conspiracy theorist **Paradigms of Personality Assessment** Jerry S.
