After sensitizing the reader to our sound generating movements and to all human external and environmental sounds for their unquestionable communicative qualities it realistically combines an anatomical physiological auditory approach to voice production identifying many neglected articulations with the analysis of its visual manifestations as the triple reality of speech language paralinguistics kinesics. The primary qualities of speech loudness pitch etc are extensively discussed as are the many voice qualities. The longest chapter in the book deals with paralinguistic differentiators laughter crying sighing yawning coughing sneezing etc. Finally the author presents a model for analyzing paralinguistic alternants word like independent constructs such as Pooh Aah and Brrr. Throughout the discussion of these paralinguistic phenomena extensive attention is given to cultural social and psychological aspects. Nonverbal Communication across Disciplines Fernando Poyatos, 2002-03-22. In a progressive and systematic approach to communication and always through an interdisciplinary and cross cultural perspective this first volume presents culture as an intricate grid of sensible and intelligible sign systems in space and time identifying the semiotic and interactive problems inherent in intercultural and subcultural communication according to verbal nonverbal cultural fluency. The author lays out fascinating complexity of our direct and synesthetic sensory perception of people and artifactual and environmental elements and its audible and visual manifestations through our speaking face to then acknowledge the triple reality of discourse as verbal language paralinguistics kinesics which is applied through two realistic models: a for a verbal nonverbal comprehensive transcription of interactive speech and b for the implementation of nonverbal communication in foreign language teaching. The author presents his exhaustive model of nonverbal categories for a detailed analysis of normal or pathological behaviors in any interactive or noninteractive manifestation and based on all the previous material his equally exhaustive structural model for the study of conversational encounters which suggests many applications in different fields such as the intercultural and multisystem communication situation developed in simultaneous or consecutive interpreting. 956 literary quotations from 103 authors and 194 works illustrate all the points discussed.
