Reading Comprehension Difficulties Processes And Intervention:

Reading Comprehension Difficulties Cesare Cornoldi, Jane V. Oakhill, 2013-04-03 Recognizing the characteristics of children with learning disabilities and deciding how to help them is a problem faced by schools all over the world. Although some disorders are fairly easily recognizable e.g. mental retardation or very specific to single components of performance and quite rare e.g. developmental dyscalculia, schools must consider much larger populations of children with learning difficulties who cannot always be readily classified. These children present high level learning difficulties that affect their performance on a variety of school tasks but the underlying problem is often their difficulty in understanding written text. In many instances despite good intellectual abilities and a superficial ability to cope with written texts and to use language appropriately, some children do not seem to grasp the most important elements or cannot find the pieces of information they are looking for. Sometimes these difficulties are not immediately detected by the teacher in the early school years. They may be hidden because the most obvious early indicators of reading progress in the teacher's eyes do not involve comprehension of written texts or because the first texts a child encounters are quite simple and reflect only the difficulty level of the oral messages, sentences, short stories etc. with which the child is already familiar. However, as years go by and texts get more complex, comprehension difficulties will become increasingly apparent and increasingly detrimental to effective school learning. In turn, studying, assimilating new information and many other situations requiring text comprehension from problem solving to reasoning with linguistic contents could be affected. Problems with decoding, dyslexia and language disorders have attracted more interest from researchers than have specific comprehension problems and have occupied more room in specialized journals. Normal reading comprehension has also been a favorite with researchers. However, scarce interest has been paid to subjects who have comprehension difficulties. This book is an attempt to remedy this situation. In so doing, this volume answers the following questions: Does a reading comprehension problem exist in schools? How important and widespread is the problem? Is the problem specific? How can a reading comprehension difficulty be defined and identified? Does the syndrome have a single pattern or can different subtypes be identified? What are the main characteristics associated with a reading comprehension difficulty? When can other well identified problems add to our understanding of reading comprehension difficulties? Which educational strategies are effective in preventing and treating reading comprehension difficulties? What supplementary information can we get from an international perspective?

Reading Comprehension

Strategies Danielle S. McNamara, 2007 First Published in 2007 Routledge is an imprint of Taylor Francis, an information company. *Problems and Interventions in Literacy Development* P. Reitsma, L. Verhoeven, 2013-03-09 From August 19-23, 1996, an international expert meeting on problems and interventions in literacy development took place in Amsterdam. The meeting was organized by Pieter Reitsma, Paedologisch Instituut, Vrije Universiteit Amsterdam and Ludo Verhoeven, University of Nijmegen and funded by the Dutch National Science Foundation. Various experts in the field of literacy

problems from 12 countries attended the meeting while presenting a paper based on current perspectives and recent research. A selection of the papers being presented is now integrated into a single academic reference after being edited and updated. The editors wish to thank all contributors to this volume for redrafting their original papers. The present volume aims to integrate recent research in the field of literacy problems and interventions into a single academic reference. The volume will capture the state of the art in the rapidly expanding field of literacy problems and interventions. The target group of readers of this volume includes researchers and graduate students in language and literacy development. Moreover, the book is of interest for practitioners working in the field of literacy problems.

Implementing Evidence-Based Academic Interventions in School Settings
 Sylvia Rosenfield, Virginia Wise Berninger, 2009-02-26
 Designed for both researchers and practitioners, this book is a guide to bridging the gap between the knowledge generated by scientific research and application of that knowledge to educational practice. With the emphasis on evidence-based practice in the schools, growing exponentially, school practitioners must learn how to understand, judge, and make use of the research being produced to full effect. Conversely, researchers must understand what is being used in real-world settings and what is still needed. The editors of this book have outlined this process as a series of steps beginning with being a critical consumer of current research literature, followed by concepts to consider in translating research into practice systems issues at local, district, and state levels; the role of teachers in program implementation; evaluation of implementation effectiveness; and preservice and inservice professional development of teachers and psychologists. Each chapter is written by leaders on the topic, and contributors include both researchers and school-based practitioners. With contributing authors from a variety of disciplines, this book is an invaluable treatise on current understanding of the complexities of translating research into educational practice.

Developmental Disorders and Interventions, 2010-11-26
 Volume 39 of the Advances in Child Development and Behavior series is concerned with Developmental Disorders and Interventions. This volume provides an overview of contemporary research into cognitive, neurodevelopmental, and genetic disorders of learning. The social, emotional, and cognitive functioning of children with Williams syndrome, Down syndrome, Fragile X, and autism, reading difficulties, mathematical difficulties, and working memory problems are discussed by some of the leading researchers in the field. Within each chapter, the authors consider current interventions and methods for remediating difficulties associated with each disorder, which will be of particular interest to clinical and educational practitioners. Goes in depth to address contemporary research into neurodevelopmental and genetic disorders of learning. A necessary resource for both psychology researchers

and students The authors are either leaders in their chosen fields or have worked in some of the leading research teams in the world This volume covers a broad range of developmental disorders of learning from genetic disorders such as Down syndrome to cognitive problems such as poor working memory function The focus on interventions within each chapter will be of particular interest both to academics and clinical and educational practitioners *Handbook of Learning Disabilities, Second Edition* H. Identification of Learning Disabilities Renee Bradley,Louis Danielson,Daniel P. Hallahan,2002-12-18 Identification of Learning Disabilities Research to Practice is the remarkable product of a learning disabilities summit conference convened by the Office of Special Education Programs OSEP in August 2001 and the activities following that summit Both the conference and this book were seen as important preludes to congressional reauthorization of the historic Individuals With Disabilities Education Act IDEA scheduled for 2002 and subsequent decision making surrounding implementation The OSEP conference brought together people with different perspectives on LD parents researchers practitioners and policymakers and resulted in this book which examines the research on nine key issues concerning the identification of children with learning disabilities Coverage includes alternative responses to treatment classification approaches processing deficit models and approaches to decision making Chapter Structure Each of the first nine chapters is organized around a lengthy issue oriented paper which presents the most current research on that topic These primary papers are then followed by four respondent papers that reflect a variety of viewpoints on the topic Summarizing Chapter A

small group of researchers listed in the final chapter dedicated an enormous amount of time to summarizing the research and developing key consensus statements regarding the identification of children with learning disabilities Their work is sure to have a tremendous impact on future discussions in this area Expertise The following well known scholars have helped summarize the vast amount of research presented in this book as well as the consensus statements derived therefrom Lynne Cook Don Deshler Doug Fuchs Jack M Fletcher Frank Gresham Dan Hallahan Joseph Jenkins Kenneth Kavale Barbara Keogh Margo Mastopieri Cecil Mercer Dan Reschley Rune Simeonsson Joe Torgesen Sharon Vaughn and Barbara Wise

Trends and Prospects in Metacognition Research Anastasia Efklides, Plousia Misailidi, 2010-09-08 Trends and Prospects in Metacognition presents a collection of chapters dealing principally with independent areas of empirical Metacognition research These research foci such as animal metacognition neuropsychology of metacognition implicit learning metacognitive experiences metamemory young children s Metacognition theory of mind metacognitive knowledge decision making and interventions for the enhancement of metacognition have all emerged as trends in the field of metacognition Yet the resulting research has not converged precluding an integration of concepts and findings Presenting a new theoretical framework Trends and Prospects in Metacognition extends the classical definitions offered by Flavell and Nelson to carry the prospect of more integrated work into the future By opening the possibility to cross the boundaries posed by traditionally independent research areas this volume provides a foundation for the integration of research paradigms and concepts and builds on the relationship between metacognition and consciousness while integrating basic with applied research

Expository Discourse in Children, Adolescents, and Adults Marilyn A. Nippold, Cheryl M. Scott, 2013-03-07 School success in the 21st century requires proficiency with expository discourse the use and understanding of informative language in spoken and written modalities This occurs for example when high school students read their textbooks and listen to their teachers lectures and later are asked to demonstrate their knowledge of this complex topic through oral reports and essay examinations Although many students are proficient with the expository genre others struggle to meet these expectations This book is designed to provide information on the use and understanding of expository discourse in school age children adolescents and young adults Recently researchers from around the world have been investigating the development of this genre in typical students and in those with language disorders Although many books have addressed the development of conversational and narrative discourse by comparison books devoted to the topic of expository discourse are sparse This crossdisciplinary volume fills that gap in the literature and makes a unique contribution to the study of language development and disorders It will be of interest to a range of professionals including speech language pathologists teachers linguists and psychologists who are concerned with language development and disorders

Developmental Dyslexia and Anaphora Resolution in English L1/L2 Nicoletta Simi,2021-06-15 This book presents the results of three experimental studies focusing on the ability of people with dyslexia to resolve ambiguous anaphoric sentences where concrete and abstract referents are present Each study represents a step in the ongoing investigation of this issue and stems from questions left unanswered by previous research This work is primarily inspired by the desire to gain a better understanding of the role of syntactic and lexical knowledge in text comprehension and more specifically of the effects of word concreteness and abstractness in anaphora resolution contexts for readers with dyslexia The book also investigates the resources necessary to process ambiguous anaphoric sentences The innovative methodology implemented here comprises both experimental techniques such as eye tracking and the use of questionnaires and standardised tests to answer specific research questions It also puts forward a hypothesis that explains the different deficits manifesting in people with dyslexia and suggests that in reading comprehension tasks the known impairment in people with dyslexia s working memory may hinder their ability to efficiently and accurately perform tasks involving procedural memory resources As a consequence this impairment would emerge as disruptions of people with dyslexia s semantic and syntactic competence as well as their functioning in complex tasks which are particularly demanding in terms of working memory resources
