Redeeming The Time A Political Theology Of The Environment:

Redeeming the Time Stephen Bede Scharper, 1998-06-01 A thoughtful and interesting contribution to environmental theology literature Choice Richly informative and provocative Review for Religious Stephen Bede Scharper has added a significant new book to the growing collection of Christian ecotheological offerings an admirable job of summarizing the main strands of Christian environmental theologies and highlighting the most valuable contributions of each heartfelt There is much to celebrate in this book presents a comprehensible and accessible guide to the major varieties of what Scharper calls Christian ecological theology In this book he succeeds not just in coherently summarizing a number of the most important voices in ecotheology but also in giving us a blueprint for the changed consciousness necessary to motivate a conversion from our destructive earth damaging behavior to a more earth friendly way of living Worldviews *A Political Theology of Nature* Peter Scott, 2003-03-06 This book argues that the modern separation of humanity from nature can be traced to the displacement of the triune God Locating the source of our current ecological crisis in this separation Peter Scott argues that it can only be healed within theology through a revival of a Trinitarian doctrine of creation interacting with political philosophies of ecology Drawing insights from deep ecology ecofeminism and social and socialist ecologies Scott proposes a common realm of God nature and humanity Both Trinitarian and political the theology of this common realm is worked out by reference to Christ and Spirit Christ s resurrection is presented as the liberation and renewal of ecological relations in nature and society the movement of the Holy Spirit is understood as the renewal of fellowship between humanity and nature through ecological democracy and the Eucharist is proposed as the principal political resource Christianity offers for an ecological age **Redeeming the time : a political theology of the environment** Stephen B. Scharper, 1998 Various current paradigms and remedying or redeeming their inadequacies **Environment** Glenn Adelson, James Engell, Kevin P. Van Anglen, Brent Ranalli, 2008-01-01 This major anthology is the first to apply a fully interdisciplinary approach to environmental studies A comprehensive guide to environmental literacy the book demonstrates how the sciences social sciences and humanities all contribute to understanding our interrelationships with the natural world Though not specialized Environment is a book that even specialists can learn from Ten innovative case studies climate shock species endangerment nuclear power biotechnology sustainable development deforestation environmental security globalization wilderness and the urban environment are followed by readings from specific disciplines These can be integrated with the case studies to shape individual interests and teaching strategies The volume presents an imaginative array of texts from scientific papers to poetry legal decisions to historical accounts personal essays to economic analysis Taken together these selections provide a balanced authoritative and up to date treatment of key issues in environmental studies *The Relevance of Bernard Lonergan's Notion of Self-appropriation to a Mystical-political Theology* Ian B. Bell, 2008 In *The Relevance of Bernard Lonergan's Notion of Self Appropriation to a Mystical Political Theology* Ian Bell takes on the issue of

the separation of the interior and exterior lives that has come to dominate mystical theology over the years The mystical life he claims is necessarily involved in the establishment of social structures and institutions that govern human living and the work of Bernard Lonergan on the human subject provides a means by which the connection between the interior and exterior lives may be established Because human persons operate in a consistent pattern regardless of a given moment s particularities mystical experience is no longer relegated to so called spiritual matters and the insights of mystics may be applied to the Christian call to live as agents of love With this connection in place mystical theology and political theology come together in a theology that is both mystical and political **The Ecological Life** Jeremy Bendik-Keymer,2006-01-19

Written as a series of lectures this open access title offers a humanistic perspective on environmental philosophy that challenges some of the dogmas of deep ecology and radical environmentalism while speaking for their best desires The book argues that being human centered leaves us open to ecological identifications rather than the opposite Bendik Keymer draws on analytic and continental traditions of philosophy as well as literature and visual media He argues for a sense of ecological justice consonant with human rights and shows how humanistic thinking is committed to deepening respect for life and our ecological orientation In a clear jargon free and conversational tone The Ecological Life presents a timely and important contribution to civic engagement in an ecological century The ebook editions of this book are available open access under a CC BY NC ND 4 0 licence on bloomsburycollections com [Saving Beauty](#) Kathryn B. Alexander,2014-08-01 Kathryn B

Alexander argues that natural beauty is a source of religious insight into the need and way of salvation and this project develops a theological aesthetics of nature and beauty with an aim toward cultivating a theological and ethical framework for redeemed life as participation in ecological community With interdisciplinary verve engaging systematic philosophical and art theory systems of aesthetics the volume fosters the cultivation of the sense of beauty through creative religious and sacramental experience **Cause for Hope** Bill Phipps,2007 Global society stands at a crossroads one of those critical moments in the history of humankind The simple fact is that the Earth cannot support our rampant overuse and misuse of its abundant gift of resources Not only are we depleting the forests oceans soil we are also poisoning the air and polluting our rivers lakes and oceans We are living far beyond our means Life as we are creating it is measurably and extravagantly unsustainable Bill Phipps All societies live by their stories This provocative book from one of the most provocative leaders in the Canadian church challenges the governing story that has shaped and defined Western culture and society a story that has manifested itself in ecological destruction war and the obscene military expenditures that go with it unprecedented consumerism economic disparity between rich and poor mistreatment of non white cultures and races sexism and fear Clearly it is time for a new story Bill Phipps takes on the task of outlining the core themes of this new story with the passion and vision of a modern day prophet He shows us the deeply spiritual nature of the issues and choices that confront us Recognizing that the challenges we face are inherently interconnected and can no longer be treated in isolation from each

other his approach is multi faceted touching on all aspects of life including the role of the arts in bringing about transformation As a culture and as a society we do indeed stand at a crossroads one of those rare grace moments when we are granted the opportunity to choose our future So the question remains before us Will we choose the way of death or the way of new life Cause for Hope is part warning cry part visionary exploration part encouragement for the journey As such it is itself a cause for hope Each chapter concludes with questions for discussion making this book a valuable resource for study group use

Consecrating Science Lisa H. Sideris,2017-08-15 In Consecrating Science Lisa Sideris offers a searing critique of The New Cosmology a complex network of overlapping movements that claim to bring together science and spirituality all in the name of saving our planet from impending ecological collapse Highly regarded in many academic circles these movements have been endorsed by numerous prominent scholars scientists historians and educators Their express goal popularized in numerous books films TED talks YouTube videos podcasts and even introductory courses at places like Harvard or Washington University is to instill in readers and audiences a profound sense of being at home in the universe thereby fostering environmentally responsible behavior Whether promoted as The New Story The Universe Story or The Epic of Evolution they all offer humanity a new sacred story

a common creation myth for modern times and for all people the evolutionary unfolding of the universe from the Big Bang to the present Evolutionary science and religious cosmology together at last But as Sideris shows however the New Cosmology actually underwrites a staggeringly anthropocentric vision of the world Instead of cultivating an ethic of respect for nature the project of consecrating science only increases human arrogance and indifference to nonhuman life Going back to the work of Rachel Carson and other naturalists the author shows how a sense of wonder rooted in the natural world and our own ethical impulses helps foster environmental attitudes and policies that protect our planet Provided by publishe

the environmental crisis has been reiterated numerous times in this vast corpus of literature also in South Africa The Routledge Handbook of International Law and Anthropocentrism Vincent Chapaux, Frédéric Mégret, Usha Natarajan, 2023-06-15 This handbook explores contextualises and critiques the relationship between anthropocentrism the idea that human beings are socially and politically at the centre of the cosmos and international law While the critical study of anthropocentrism has been under way for several years it has either focused on specific subfields of international law or emanated from two distinctive strands inspired by the animal rights movement and deep ecology This handbook offers a broader study of anthropocentrism in international law as a global legal system and academic field It assesses the extent to which current international law is anthropocentric contextualises that claim in relation to broader critical theories of anthropocentrism and explores alternative ways for international law to organise relations between humans and other living and non living entities This book will interest international lawyers environmental lawyers legal theorists social theorists and those concerned with the philosophy and ethics of ecology and the non human realms Chapter 6 of this book is freely available as a downloadable Open Access PDF at <http://www.taylorfrancis.com> under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 4.0 license Funded by University of Gothenburg and Lund University
