Art of Illusion Dan Karlholm, 2006 To survey art history as a whole was a pressing task for a generation of German scholars around the mid nineteenth century Their projections of a historicist chain of artworks ranged from textual narratives without illustrations to separate picture compendia as well as images of a more allegorical kind Other means with which to picture art history as part of a virtually all encompassing cultural history were the museums of art erected in Germany at the time in Berlin and Munich especially This book deals with practices of representing art history in various media This includes post Hegelian texts and engravings of art history from the 1840s onwards by Franz Kugler Julius Schnorr and others In addition works of art of the late twentieth century by Andy Warhol Anselm Kiefer and others provide opportunities to speculate on the after effects and discursive traces of the old regime Extending the concept of historiography to include not just textual or institutional endeavours but a host of different images as well from reproductive prints to pop paintings and visual archives of the digital era this study is intended to contribute in new ways to a critical historiography of the field of art history and visual culture today

Cultural History After Foucault John Neubauer, 2018-01-18 Both as historian and maker of culture Foucault infused numerous disciplines of study with a new conceptual vocabulary and an agenda for future research His ideas have called central assumptions in Western culture into question and altered the ways in which scholars and social scientists approach such issues as discourse theory theory of knowledge Eros technologies of the Self and Other punishment and prisons and asylums and madness The contributors to this volume indicate Foucault's achievements and the suggestive power of his work as well as his methodological weaknesses historical inaccuracies and ambiguities Above all they attempt to show how one can use Foucault to go beyond him in opening new approaches to cultural history Though comprehensiveness was not attempted their essays broach the major controversial aspects of Foucauldian cultural history the position of the subject the fusion of power and knowledge sexuality the historical structures and changes and they explicitly analyze them with respect to antiquity the Renaissance and the nineteenth century In this collection Neubauer presents analyses by historians literary scholars and philosophers of the entire transdisciplinary range of Foucault's oeuvre emphasizing the rich suggestiveness of its agenda The breadth of the undertaking makes it suitable for seminars and graduate courses in numerous departments

History in Transit Dominick LaCapra, 2018-08-06 History in Transit comprises Dominick LaCapra's explorations of relationships he believes have been insufficiently theorized between experience and identity between history and various theories of subjectivity between extreme events and their representation between institutional structures and the kinds of knowledge produced within them Taken together these discussions form a dialogical encounter positing the links among epistemological questions historicist ones and issues pertaining to disciplinary and institutional politics Reacting against the antitheoretical bias of some prominent historians LaCapra presents an alternative model of historiographical practice one in which emphases on plurality and hybridity are combined with the concept of historical experience For LaCapra experience emerges as a category both theoretically determined and anchored in the facticity of the everyday LaCapra tests the assumptions and implications of the way one approaches the past by looking to psychoanalysis to render more self aware the relationship between the historian and his or her material He offers criticisms of assumptions held by practicing historians and theorists placing the study of history at the center of a larger argument about the role of the contemporary university Contesting both corporatization and claims that the university is in ruins LaCapra writes It is paradoxical that the demand to make the university conform to an ever increasing extent to a market or business model seems oblivious to the fact that the American university has probably been the most successful of its type in the world that students from other countries disproportionately desire to study in it

Educating Leaders in Sustainability using History Elizabeth Summerfield, 2023-03-29 History is not typically the discipline of choice for teaching leadership thought for tackling complex environmental problem solving This book argues for its inclusion in programs for all ages It argues that learning how to think in non linear non binary ways or systems thinking leads to the successful resolution of such problems It argues this through

the use of historical case studies of the innovation of forest management in Australia and the United States of America It argues that such problem solving approaches can be taught from an early age but can also be learned by leaders of any age The particular historical context of such problems obviously changes over time but this book argues that the principles of tackling them do not

Critical Social Theory in Public Administration Richard C Box,2015-03-26 The essential premise of critical social theory is that contemporary society is neither democratic nor free but that modern global capitalism creates a citizenry satiated with consumer goods unaware of alternative ways of living In the public sector critical theory suggests that governing systems are influenced if not controlled by the wealthy and powerful leaving public professionals to decide whether to serve those interests or the interests of a broader public This book provides a framework for the application of critical social theory in public administration Its goal is to encourage awareness among public administration scholars and practitioners of social conditions that tend to shape and constrain scholarship practice teaching and social change At a time when concern for public interest and a civil society have largely been displaced by the goals of economic efficiency and the New Public

Management Critical Social Theory in Public Administration presents a viable alternative that incorporates the latest views of postmodern thinking with the central elements of critical social theory

The School of Montaigne in Early Modern Europe Warren Boutcher, 2017-03-09 This major two volume study offers an interdisciplinary analysis of Montaigne's Essais and their fortunes in early modern Europe and the modern western university Volume one focuses on contexts from within Montaigne's own milieu and on the ways in which his book made him a patron author or instant classic in the eyes of his editor Marie de Gournay and his promoter Justus Lipsius Volume two focuses on the reader writers across Europe who used the Essais to make their own works from corrected editions and translations in print to life writing and personal records in manuscript The two volumes work together to offer a new picture of the book's significance in literary and intellectual history Montaigne's is now usually understood to be the school of late humanism or of Pyrrhonian scepticism This study argues that the school of Montaigne potentially included everyone in early modern Europe with occasion and means to read and write for themselves and for their friends and family unconstrained by an official function or scholastic institution For the Essais were shaped by a battle that had intensified since the Reformation and that would continue through to the pre Enlightenment period It was a battle to regulate the educated individual's judgement in reading and acting upon the two books bequeathed by God to man The book of scriptures and the book of nature were becoming more accessible through print and manuscript cultures But at the same time that access was being mediated more intensively by teachers such as clerics and humanists by censors and institutions by learned authors of past and present and by commentaries and glosses upon those authors Montaigne enfranchised the unofficial reader writer with liberties of judgement offered and taken in the specific historical conditions of his era The study draws on new ways of approaching literary history through the history of the book and of reading The Essais are treated as a mobile transnational work that travelled from Bordeaux to Paris and beyond to markets in other countries from England and Switzerland to Italy and the Low Countries Close analysis of editions paratexts translations and annotated copies is informed by a distinct concept of the social context of a text The concept is derived from anthropologist Alfred Gell's notion of the art nexus the specific types of actions and agency relations mediated by works of art understood as indexes that give rise to inferences of particular kinds Throughout the two volumes the focus is on the particular nexus in which a copy an edition an extract is embedded and on the way that nexus might be described by early modern people

Mapping Postcommunist Cultures Vitaly Chernetsky, 2007-01-08 In Mapping Postcommunist Cultures Chernetsky argues that Russia and Ukraine exemplify the principal paradigms of post Soviet cultural development In Russia this has manifested itself in the subversive dismantling of the totalitarian linguistic regime and the foregrounding of previously marginalized subject positions In Ukraine work in these areas shows how the traumas of centuries of colonial oppression are being overcome through the carnivalesque decrowning of ideological dogmas and an affirmation of a new type of community most recently demonstrated in the peaceful Orange Revolution of 2004 Mapping Postcommunist Cultures also critiques the

neglect of the former communist world in current models of cultural globalization

NASA Activities, 1988 *Walter Benjamin and the Demands of History* Michael P. Steinberg, 1996 This book is the first to consider the presence of history and the question of historical practice in Walter Benjamin's work Benjamin the critic and philosopher of history was also the practitioner the authors contend and it is in the practice of historical writing that the materialist aspect of his thought is most evident Some of the essays analyze Benjamin's writings in cultural history and the philosophy of history Others connect his historical and theoretical practices to issues in contemporary feminism and post colonial studies and to cultural contexts including the United States Japan and Hong Kong In different ways the authors all find in Benjamin's specific notion of historical materialism a dialectic between textual and cultural analysis which can reinvigorate the relation between literary and historical studies
