**Art of Illusion** Dan Karlholm, 2006 To survey art history as a whole was a pressing task for a generation of German scholars around the mid-nineteenth century. Their projections of a historicist chain of artworks ranged from textual narratives without illustrations to separate picture compendia as well as images of a more allegorical kind. Other means with which to picture art history as part of a virtually all-encompassing cultural history were the museums of art erected in Germany at the time in Berlin and Munich, especially. This book deals with practices of representing art history in various media. This includes post-Hegelian texts and engravings of art history from the 1840s onwards by Franz Kugler, Julius Schnorr, and others. In addition, works of art of the late twentieth century by Andy Warhol, Anselm Kiefer, and others provide opportunities to speculate on the after-effects and discursive traces of the old regime. Extending the concept of historiography to include not just textual or institutional endeavours but a host of different images as well from reproductive prints to pop paintings and visual archives of the digital era, this study is intended to contribute in new ways to a critical historiography of the field of art history and visual culture today.

History in Transit Dominick LaCapra, 2018-08-06 History in Transit comprises Dominick LaCapra's explorations of relationships he believes have been insufficiently theorized between experience and identity between history and various theories of subjectivity between extreme events and their representation between institutional structures and the kinds of knowledge produced within them Taken together these discussions form a dialogical encounter positing the links among epistemological questions historicist ones and issues pertaining to disciplinary and institutional politics Reacting against the antitheoretical bias of some prominent historians LaCapra presents an alternative model of historiographical practice one in which emphases on plurality and hybridity are combined with the concept of historical experience For LaCapra experience emerges as a category both theoretically determined and anchored in the facticity of the everyday LaCapra tests the assumptions and implications of the way one approaches the past by looking to psychoanalysis to render more self-aware the relationship between the historian and his or her material He offers criticisms of assumptions held by practicing historians and theorists placing the study of history at the center of a larger argument about the role of the contemporary university Contesting both corporatization and claims that the university is in ruins LaCapra writes It is paradoxical that the demand to make the university conform to an ever increasing extent to a market or business model seems oblivious to the fact that the American university has probably been the most successful of its type in the world that students from other countries disproportionately desire to study in it

**Critical Social Theory in Public Administration** Richard C Box,2015-03-26 The essential premise of critical social theory is that contemporary society is neither democratic nor free but that modern global capitalism creates a citizenry satiated with consumer goods unaware of alternative ways of living In the public sector critical theory suggests that governing systems are influenced if not controlled by the wealthy and powerful leaving public professionals to decide whether to serve those interests or the interests of a broader public This book provides a framework for the application of critical social theory in public administration Its goal is to encourage awareness among public administration scholars and practitioners of social conditions that tend to shape and constrain scholarship practice teaching and social change At a time when concern for public interest and a civil society have largely been displaced by the goals of economic efficiency and the

**The School of Montaigne in Early Modern Europe** Warren Boutcher, 2017-03-09 This major two volume study offers an interdisciplinary analysis of Montaigne's Essais and their fortunes in early modern Europe and the modern western university Volume one focuses on contexts from within Montaigne's own milieu and on the ways in which his book made him a patron author or instant classic in the eyes of his editor Marie de Gournay and his promoter Justus Lipsius Volume two focuses on the reader writers across Europe who used the Essais to make their own works from corrected editions and translations in print to life writing and personal records in manuscript The two volumes work together to offer a new picture of the book's significance in literary and intellectual history Montaigne's is now usually understood to be the school of late humanism or of Pyrrhonian scepticism This study argues that the school of Montaigne potentially included everyone in early modern Europe with occasion and means to read and write for themselves and for their friends and family unconstrained by an official function or scholastic institution For the Essais were shaped by a battle that had intensified since the Reformation and that would continue through to the pre Enlightenment period It was a battle to regulate the educated individual's judgement in reading and acting upon the two books bequeathed by God to man The book of scriptures and the book of nature were becoming more accessible through print and manuscript cultures But at the same time that access was being mediated more intensively by teachers such as clerics and humanists by censors and institutions by learned authors of past and present and by commentaries and glosses upon those authors Montaigne enfranchised the unofficial reader writer with liberties of judgement offered and taken in the specific historical conditions of his era The study draws on new ways of approaching literary history through the history of the book and of reading The Essais are treated as a mobile transnational work that travelled from Bordeaux to Paris and beyond to markets in other countries from England and Switzerland to Italy and the Low Countries Close analysis of editions paratexts translations and annotated copies is informed by a distinct concept of the social context of a text The concept is derived from anthropologist Alfred Gell's notion of the art nexus the specific types of actions and agency relations mediated by works of art understood as indexes that give rise to inferences of particular kinds Throughout the two volumes the focus is on the particular nexus in which a copy an edition an extract is embedded and on the way that nexus might be described by early modern people

Mapping Postcommunist Cultures Vitaly Chernetsky, 2007-01-08 In Mapping Postcommunist Cultures Chernetsky argues that Russia and Ukraine exemplify the principal paradigms of post Soviet cultural development In Russia this has manifested itself in the subversive dismantling of the totalitarian linguistic regime and the foregrounding of previously marginalized subject positions In Ukraine work in these areas shows how the traumas of centuries of colonial oppression are being overcome through the carnivalesque decrowning of ideological dogmas and an affirmation of a new type of community most recently demonstrated in the peaceful Orange Revolution of 2004 Mapping

Postcommunist Cultures also critiques the neglect of the former communist world in current models of cultural globalization

Walter Benjamin and the Demands of History Michael P. Steinberg, 1996 This book is the first to consider the presence of history and the question of historical practice in Walter Benjamin s work Benjamin the critic and philosopher of history was also the practitioner the authors contend and it is in the practice of historical writing that the materialist aspect of his thought is most evident Some of the essays analyze Benjamin s writings in cultural history and the philosophy of history Others connect his historical and theoretical practices to issues in contemporary feminism and post colonial studies and to cultural contexts including the United States Japan and Hong Kong In different ways the authors all find in Benjamin s specific notion of historical materialism a dialectic between textual and cultural analysis which can reinvigorate the relation between literary and historical studies

Trances, Dances and Vociferations Nada Elia, 2002-09-11 Trances Dances and Vociferations provides a compelling feminist analysis of gender politics in the works of four major Africana women writers Toni Morrison Michelle Cliff Assia Djebar and Paule Marshall Nada Elia explores the way in which black women characters use conjuring double entendre and song to empower liberate and determine their own female insurgency She also explains how African and Afrodiasporic women have been forced to rewrite history and substitute a communal and individual wholeness for alienation

and separation in many different settings from Algeria to Oklahoma Ranging over works including Marshall's Praisesong for the Widow, Djébar's A Sister to Scheherazade, Cliff's No Telephone to Heaven and Morrison's Jazz and Beloved, Elia offers essential and provocative insights into the works of some of our most influential African women authors today *Objects of Culture* H. Glenn Penny, 2003-10-16

In the late nineteenth century, Germans spearheaded a worldwide effort to preserve the material traces of humanity, designing major ethnographic museums and building extensive networks of communication and exchange across the globe. In this groundbreaking study, Glenn Penny explores the appeal of ethnology in Imperial Germany and analyzes the motivations of the scientists who created the ethnographic museums. Penny shows that German ethnologists were not driven by imperialist desires or an interest in legitimating putative biological or racial hierarchies. Overwhelmingly antiracist, they aspired to generate theories about the essential nature of human beings through their museums' collections. They gained support in their efforts from boosters who were enticed by participating in this international science and who used it to promote the cosmopolitan character of their cities and themselves. But these cosmopolitan ideals were eventually overshadowed by the scientists' more modern, professional, and materialist concerns, which dramatically altered the science and its goals. By clarifying German ethnologists' aspirations and focusing on the market and conflicting interest groups, Penny makes important contributions to German history, the history of science, and museum studies.
