Kindred Voices Michael Pifer, 2021-06-29 The fascinating story of how premodern Anatolia s multireligious intersection of cultures shaped its literary languages and poetic masterpieces By the mid thirteenth century Anatolia had become a place of stunning cultural diversity Kindred Voices explores how the region s Muslim and Christian poets grappled with the multilingual and multireligious worlds they inhabited attempting to impart resonant forms of instruction to their intermingled communities This convergence produced fresh poetic styles and sensibilities native to no single people or language that enabled the period s literature to reach new and wider audiences This is the first book to study the era s major Persian Armenian and Turkish poets from roughly 1250 to 1340 against the canvas of this broader literary ecosystem

Voices in Black Political Thought Ricky K. Green,2005 The Black community has historically suffered stasis on the political level W E B Du Bois originally identified the source of the stasis as a contradiction of political goals within individuals and Black culture During the last century the development of African American political organizations has institutionalized this contradiction of double aims That institutionalization is largely due to the energy and resources of two distinct and often contradicting political traditions Black nationalism and the Black American Jeremiad It is within a third tradition Black cultural pluralism that a possible discourse exists that can address the stasis within the Black community This book attempts to reconstruct the development of this third tradition and posits it as the most viable source of Black political development

Nonhuman voices in Anglo-Saxon literature and material culture James Paz,2017-07-07 This electronic version has been made available under a Creative Commons BY NC ND open access license This book is available as an open access ebook under a CC BY NC ND licence *Nonhuman voices in Anglo Saxon literature and material culture* uncovers the voice and agency possessed by nonhuman things across Anglo Saxon literature and material culture It makes a new contribution to thing theory and rethinks conventional divisions between animate human subjects and inanimate nonhuman objects in the early Middle Ages Anglo Saxon writers and craftsmen describe artefacts and animals through riddling forms or enigmatic language balancing an attempt to speak and listen to things with an understanding that these nonhumans often elude defy and withdraw from us But the active role that things have in the early medieval world is also linked to the Germanic origins of the word where a *thing* is a kind of assembly with the ability to draw together other elements creating assemblages in which human and nonhuman forces combine
