acknowledges the vital importance of reference skills in school libraries. It focuses on new reference skills for school librarians and includes more online materials such as Webliographies and a glossary. Teaching reference skills and providing reference services to students and staff in schools are extremely important tasks and are required of librarians on a regular basis. Aimed at pre-service and in-service school librarians, this book covers all types of reference materials including almanacs, dictionaries, encyclopedias, atlases, and other standard information sources, giving extra emphasis to the online sources to which students increasingly turn. This edition addresses more online reference resources than previous editions and offers practical suggestions for use in K-12 student instruction. *The Organization of Information* Daniel N. Joudrey, Arlene G. Taylor, 2017-11-27

This fourth edition provides an updated look at information organization featuring coverage of the Semantic Web, linked data, and EAC/CPF new metadata models such as IFLA LRM and RiC, and new perspectives on RDA and its implementation. This latest edition of *The Organization of Information* is a key resource for anyone in the beginning stages of their LIS career as well as longstanding professionals and paraprofessionals seeking accurate, clear, and up-to-date guidance on information organization activities across the discipline. The book begins with a historical look at information organization methods covering libraries, archives, museums, and online settings. It then addresses the types of retrieval tools used throughout the discipline: catalogs, finding aids, indexes, bibliographies, and search engines, before describing the functionality of systems, explaining the basic principles of system design, and defining how they affect information organization. The principles and functionality of metadata is next, with coverage of the types, functions, tools, and models, particularly FRBR, IFLA LRM, RDF, and how encoding works for use and sharing, for example, MARC, XML, schemas, and linked data approaches. The latter portion of the resource describes specific activities related to the creation of metadata for resources. These chapters offer an overview of the major issues, challenges, and standards used in the information professions, addressing topics such as resource description, including standards found in RDA, DACS, and CCO, access points, authority control, subject analysis, controlled vocabularies, notably LCSH, MeSH, Sears, and AAT, and categorization systems such as DDC and LCC. Introduction to Cataloging and Classification Daniel N. Joudrey, Arlene G. Taylor, David P.

Miller, 2015-09-29. A new edition of this best-selling textbook reintroduces the topic of library cataloging from a fresh, modern perspective. Not many books merit an eleventh edition, but this popular text does. Newly updated, *Introduction to Cataloging and Classification* provides an introduction to descriptive cataloging based on contemporary standards, explaining the basic tenets to readers without previous experience as well as to those who merely want a better understanding of the process as it exists today. The text opens with the foundations of cataloging, then moves to specific details and subject matter such as Functional Requirements for Bibliographic Records (FRBR), Functional Requirements for Authority Data (FRAD), the International Cataloging Principles (ICP), and RDA. Unlike other texts, the book doesn't presume a close familiarity with the MARC bibliographic or authorities formats, ALA's Anglo-American Cataloging Rules 2nd Edition revised (AACR2R), or the

International Standard Bibliographic Description ISBD Subject access to library materials is covered in sufficient depth to make the reader comfortable with the principles and practices of subject cataloging and classification In addition the book introduces MARC BIBFRAME and other approaches used to communicate and display bibliographic data Discussions of formatting presentation and administrative issues complete the book questions useful for review and study appear at the end of each chapter

The Complete Guide to Acquisitions Management Frances C. Wilkinson, Linda K. Lewis, Rebecca L. Lubas, 2015-07-28 Updated and enhanced the second edition of this text provides both library students and practitioners with a thorough understanding of procedural and philosophical approaches in acquisitions management Since the last edition of this text was published over a decade ago library acquisitions practices have changed dramatically in response to economic and industry changes and the introduction and maturation of new technologies An essential tool kit this updated edition covers every aspect of current acquisitions management from organization of acquisitions departments to professional ethics The step by step guide takes you through acquisitions department activities from the beginning of the ordering process through making materials available to the public You ll learn about the latest acquisitions systems negotiating bids and RFPs gifts and exchange and decisions of permanence In addition the book provides expert guidance on relationships with vendors as well as on the publishing industry in general Key among the updates to this second edition is information about major changes that have occurred recently including what s new in integrated library systems electronic resource management and patron and demand driven acquisitions An appendix offers a wealth of resources on topics related to acquisitions and includes a comprehensive glossary
