Boxes interspersed in the text are used to present scenarios for discussion to highlight key concepts or to present excerpts from important documents. Discussions of sources in Part II place more emphasis on designing effective search strategies using both print and digital resources. The chapter on selection and evaluation of sources addresses the changing nature of reference collections and how to evaluate new types of sources. Each chapter concludes with an updated list of additional readings to guide further study. A new companion website will provide links to Web accessible readings and resources as well as additional scenarios for discussion and example search strategies to supplement those presented in the text.

Evolution in Reference and Information Services Linda S Katz, 2013-05-13 Explore ways to bring and keep your library's electronic services up to date. From editor Di Su: Some years ago if you were told that a library's catalog would be available on a 24/7/365 basis you'd think it was just another fiction. Perhaps as influential as Johannes Gutenberg's invention of movable type printing, the Internet is one of the most significant happenings in the information world in modern times. In addition to showing you how library services have been influenced and enhanced by the advent of the Internet, Evolution in Reference and Information Services: The Impact of the Internet will enable you to make the most of the new opportunities that current technologies offer. This valuable book will also help you and your library avoid the pitfalls and new challenges to professional competency that come along with electronic research. Evolution in Reference and Information Services gives you a review of the history of electronic reference, looks at the increasing role of librarians as teachers and providers of technical help for users, provides case studies and ways to evaluate electronic research methods, suggests strategies for providing effective electronic services, examines government Web sites, explores Internet sources of health information, shows you how to establish electronic services through your library's portal site, looks at how to manage a library computer lab, and much more.
