Referential Practice Language And Lived Space Among The Maya:

Referential Practice William F. Hanks, 1990-11-29 Referential Practice is an anthropological study of language use in a contemporary Maya community. It examines the routine conversational practices in which Maya speakers make reference to themselves and to each other to their immediate contexts and to their world. Drawing on extensive fieldwork in Oxkutzcab, Yucatán, William F. Hanks develops a sociocultural approach to reference in natural languages. The core of this approach lies in treating speech as a social engagement and reference as a practice through which actors orient themselves in the world. The conceptual framework derives from cultural anthropology, linguistic pragmatics, interpretive sociology, and cognitive semantics. As his central case, Hanks undertakes a comprehensive analysis of deixis, linguistic forms that fix reference in context, such as English I, you, this, that, here, and there. He shows that Maya deixis is a basic cultural construct linking language with body space, domestic space, agricultural and ritual practices, and other fields of social activity. Using this as a guide to ethnographic description, he discovers striking regularities in person reference and modes of participation, the role of perception in reference, and varieties of spatial orientation, including locative deixis. Traditionally considered a marginal area in linguistics and virtually untouched in the ethnographic literature, the study of referential deixis becomes in Hanks's treatment an innovative and revealing methodology. Referential Practice is the first full-length study of actual deictic use in a non-Western language, the first in-depth study of speech practice in Yucatec Maya culture, and the first detailed account of the relation between routine conversation, embodiment, and ritual discourse.

The Oxford Handbook of Historical Ecology and Applied Archaeology Christian Isendahl, Daryl Stump, 2019-01-10 The Oxford Handbook of Historical Ecology and Applied Archaeology presents theoretical discussions, methodological outlines, and case studies describing the field of overlap between historical ecology and the emerging sub-discipline of applied archaeology to highlight how modern environments and landscapes have been shaped by humans. Historical ecology is based on the recognition that humans are not only capable of modifying their environments but that all environments on earth have already been directly or indirectly modified. This includes anthropogenic climate change, widespread deforestations, and species extinctions, but also very local alterations, the effects of which may last a few years or may have legacies lasting centuries or more. With contributions from anthropologists, archaeologists, human geographers, and historians, this volume focuses not just on defining human impacts in the past but on the ways that understanding these changes can help inform contemporary practices and development policies. Some chapters present examples of how ancient or current societies have modified their environments in sustainable ways, while others highlight practices that had unintended long-term consequences. The possibilities of learning from these practices are discussed, as is the potential of using the long history of human resource exploitation as a method for building or testing models of future change. The volume offers overviews for students, researchers, and professionals with an interest in conservation or development projects who want to understand what practical insights can be drawn from history and who

Levinson, Sarah Cutfield, Michael J. Dunn, N. J. Enfield, Sérgio Meira, 2018-07-19 The definitive guide to demonstratives which play a key role in language acquisition and use The Order of Days David Stuart, 2011-05-17 The world s foremost expert on Maya culture looks at 2012 hysteria and explains the truth about what the Maya meant and what we want to believe Apocalypse 2012 An Investigation into Civilizations End The World Cataclysm in 2012 2012 The return of Quetzalcoatl According to many of these alarmingly titled books the ancient Maya not only had a keen insight into the mystical workings of our planet and the cosmos but they were also able to predict that the world will end in the year 2012 David Stuart the foremost scholar of the Maya and recipient of numerous awards for his work takes a hard look at the frenzy over 2012 and offers a fascination and accurate trip through Mayan culture and belief Stuart shows how the idea that the end of the Mayan calendar which supposedly heralds the end of our own existence says far more about our culture than about the ancient Maya The Order of Days

explores how the real intellectual achievement of ancient Maya timekeeping and worldview is far more impressive and remarkable than any of the popular and often outrageous claims about this advanced civilization As someone who has studied the Maya for nearly all of his life and who specializes in reading their ancient texts Stuart sees the 2012 hubbub as the most recent in a long chain of related ideas about Mesoamericans the Maya in particular that depicts them as somehow oddball not of this world or as having some strong mystical link to other realms Because the year 2012 has no prominent role in anything the ancient Maya ever actually wrote Stuart takes a wider look at the Maya concepts of time and their underlying philosophy as we can best understand them The ancient Maya Stuart contends were worthy of study and admiration not because they were strange but because they were altogether human and they developed a compelling vision of time unlike any other civilization before or since

Manual of Deixis in Romance Languages Konstanze Jungbluth, Federica Da Milano, 2015-10-16 Deixis as a field of research has generated increased interest in recent years It is crucial for a number of different subdisciplines pragmatics semantics cognitive and contrastive linguistics to name just a few The subject is of particular interest to experts and students philosophers teachers philologists and psychologists interested in the study of their language or in comparing linguistic structures The different deictic structures not only the items themselves but also the oppositions between them reflect the fact that neither the notions of space time person nor our use of them are identical cross culturally This diversity is not restricted to the difference between languages but also appears among related dialects and language varieties This volume will provide an overview of the field focusing on Romance languages but also reaching beyond this perspective Chapters on diachronic developments language change comparisons with other non European languages and on interfaces with neighboring fields of interest are also included The editors and authors hope that readers regardless of their familiarity with Romance languages will gain new insights into deixis in general and into the similarities and differences among deictic structures used in the languages of the world

Engaging Ancient Maya Sculpture at Piedras Negras, Guatemala Megan E. O'Neil, 2014-02-25 Now shrouded in Guatemalan jungle the ancient Maya city of Piedras Negras flourished between the sixth and ninth centuries when its rulers erected monumental limestone sculptures carved with hieroglyphic texts and images of themselves and family members advisers and captives In Engaging Ancient Maya Sculpture at Piedras Negras Guatemala Megan E O Neil offers new ways to understand these stelae altars and panels by exploring how ancient Maya people interacted with them These monuments considered sacred were one of the community's important forms of cultural and religious expression Stelae may have held the essence of rulers they commemorated and the objects remained loci for reverence of those rulers after they died Using a variety of evidence O Neil examines how the forms compositions and contexts of the sculptures invited people to engage with them and the figures they embodied looks at these monuments not as inert bearers of images but as palpable presences that existed in real space at specific historical moments Her analysis brings to the fore the material and affective force of these powerful objects that were seen touched

and manipulated in the past O Neil investigates the monuments not only at the moment of their creation but also in later years and shows how they changed over time She argues that the relationships among sculptures of different generations were performed in processions through which ancient Maya people integrated historical dialogues and ancestral commemoration into the landscape With the help of more than 160 illustrations O Neil reveals these sculptures continuing life histories which in the past century have included their fragmentation and transformation into commodities sold on the international art market Shedding light on modern day transposition and display of these ancient monuments O Neil s study contributes to ongoing discussions of cultural patrimony

Unmaking Waste Sarah Newman,2023-05-26 In Unmaking Waste Sarah Newman asks what happens when there are disagreements about what constitutes waste and what one should do with it both at singular moments in time for example when ideas about waste collide in emerging colonial contexts and across time such as between those who left things behind in the past and the archaeologists who recover them Newman examines ancient Mesoamerican understandings of waste Euro American perceptions of waste in New Spain and early modern European ideals of civility and Christian understandings of good and bad expressed metaphorically through cleanliness and filth These differing perceptions Newman argues demands that we rethink centuries of assumptions imposed on other places times and peoples so long as waste remains a category misunderstood to be common sensical and stable archaeological methods will prove unequal to their task Newman instead proposes anamorphic archaeology an approach that emphasizes the possibility that archaeological objects have multiple physical and conceptual lives

In the Maw of the Earth Monster James E. Brady,Keith M. Prufer,2013-04-01 As portals to the supernatural realm that creates and animates the universe caves have always been held sacred by the peoples of Mesoamerica From ancient times to the present Mesoamericans have made pilgrimages to caves for ceremonies ranging from rituals of passage to petitions for rain and a plentiful harvest So important were caves to the pre Hispanic peoples that they are mentioned in Maya hieroglyphic writing and portrayed in the Central Mexican and Oaxacan pictorial codices Many ancient settlements were located in proximity to caves This volume gathers papers from twenty prominent Mesoamerican archaeologists linguists and ethnographers to present a state of the art survey of ritual cave use in Mesoamerica from Pre Columbian times to the present Organized geographically the book examines cave use in Central Mexico Oaxaca and the Maya region Some reports present detailed site studies while others offer new theoretical understandings of cave rituals As a whole the collection validates cave study as the cutting edge of scientific investigation of indigenous ritual and belief It confirms that the indigenous religious system of Mesoamerica was and still is much more terrestrially focused that has been generally appreciated

Dwelling, Identity, and the Maya Scott R. Hutson, 2009-11-16 Dwelling Identity and the Maya offers a new perspective on the ancient Maya that emphasizes the importance of dwelling as a social practice Contrary to contemporary notions of the self as individual and independent the identities of the ancient Maya grew from their everyday relations and interactions with other people the houses and temples they built and the objects they created exchanged cherished and left behind Using excavations of ancient Chunchucmil as a case study it investigates how Maya personhood was structured and transformed in and beyond the domestic sphere and examines the role of the past in the production of contemporary Maya identity

Relationship Thinking N. J. Enfield, 2013-11-26 In Relationship Thinking N J Enfield outlines a framework for analyzing social interaction and its linguistic cultural and cognitive underpinnings by focusing on human relationships This is a naturalistic approach to human sociality grounded in the systematic study of real time data from social interaction in everyday life Many of the illustrative examples and analyses in the book are a result of the author s long term field work in Laos Enfield promotes an interdisciplinary approach to studying language culture and mind building on simple but powerful semiotic principles and concentrating on three points of conceptual focus The first is human agency the combination of flexibility and accountability which defines our possibilities for social action and relationships and which makes the fission and fusion of social units possible The second is enchrony the timescale of conversation in which our social relationships are primarily enacted The third is human sociality a range of human propensities for social interaction and enduring social relations grounded in collective commitment to shared norms Enfield s approach cuts through common dichotomies such as cognitive versus behaviorist or public versus private arguing instead that these are indispensable sides of single phenomena The result is a

set of conceptual tools for analyzing real time social interaction and linking it with enduring relationships and their social contexts The book shows that even or perhaps especially the most mundane social interactions yield rich insights into language culture and mind
