Reflective Teaching Kenneth M. Zeichner, Daniel P. Liston, 2013-05-13 This volume outlines the assumptions and beliefs that distinguish the concept of the reflective teacher from the view of the teacher as passive and a mere technician a view that teacher education programs and schools have historically promoted The authors demonstrate how various conceptions of reflective teaching differ from one another They believe that it is only through teachers reflections on their own teaching that they become more skilled more capable and in general better teachers This is the first volume in the Reflective Teaching and the Social Conditions of Schooling series The major goal of both this book and of all of the volumes to follow in this series is to help teachers explore and define their own positions with regard to the topics and issues at hand within the context of the aims of education in a democratic society

Conceptualising Reflection In Teacher Development James Calderhead, Peter Gates, 2003-09-02 Reflection has become widely recognised as a crucial element in the professional growth of teachers Terms such as reflective teaching enquiry orientated teacher education teachers as researchers and reflective practitioner have become quite prolific in discussions of classroom practice and professional development It is frequently presumed that reflection is an intrinsically good and desirable aspect of teaching and teacher education and that teachers in becoming more reflective will in some sense be better teachers though such claims have been rarely subject to detailed scrutiny Each of the chapters in this book is concerned with exploring the concept of reflection and considering its contributions to teacher education The papers range across different stages of professional development some focusing in particular on pre service education others on in service or professional development generally Some of the papers are concerned with particular

strategies for promoting reflection and how they might operate in a teacher education context others dwell more upon a theoretical appreciation of how reflection facilitates in the processes of professional development and how it relates to issues of quality in teacher education

Reflective Teacher Education Linda Valli,1992-09-01 An increasing number of educators are arguing for conceptually sound reflective or inquiry oriented teacher education programs The argument is based on the fact that reflective teaching is possible and the belief that teachers should develop habits of consciously informed action Those who promote reflective teaching argue for teacher empowerment within a self renewing profession *Reflective Teacher Education* offers case studies from seven universities that have organized teacher education programs around the concept of reflection The cases represent public and private institutions and alternative and traditional models of teacher preparation The studies represent efforts to transform the entire professional education component rather than individual courses or isolated strategies The volume also considers reflection as a conceptual orientation commenting on its power to inform and improve teacher education and assessing the implementation of reflection in these specific programs The six critiques raise intriguing questions about the possibility and desirability of reflective reform efforts by viewing the cases from varying perspectives development cognitive feminist social reconstructionist and post modern

The Purposes, Practices, and Professionalism of Teacher Reflectivity Edward G. Pultorak,2010-03-16 Very little information about the impact of reflection on teacher performance teacher retention and student learning is available in teacher preparation programs This book provides practical and research based chapters that offer greater clarity about the particular kinds of reflection that matter and avoids talking about teacher reflection generically which implies that all kinds of reflection are of equal value This book addresses five very pertinent concepts 1 teacher reflectivity in theory and research 2 teacher reflectivity in teacher education programs 3 teacher reflectivity with teacher candidates 4 teacher reflectivity in schools and classrooms and 5 teacher reflectivity and international perspectives

(Re)learning as Reflective Practitioners Linley Cornish,2024-07-15 This book examines significant developments in reflective practice delving into research conducted with novice teachers It fills a gap in existing literature by examining the how of reflective practice How do professionals learn reflective practice fostering relearning How do they guide students mentees and novices in adopting reflective practices Stemming from teacher education the focus is extended beyond this field emphasizing the relevance of these strategies across professions It is divided into three parts thinking about reflection learning to reflect and becoming a reflective practitioner It offers fresh perspectives on conceptualizing reflective practice and suggests practical strategies for integrating it into pre service coursework assessment training and development Intended for academics practitioners and educators across disciplines this book serves as a comprehensive guide for anyone committed to fostering reflective practice within their professional sphere

An Educator's Guide to Teacher Reflection Barbara Larrivee,James M. Cooper,2006 This guide explains the importance of developing the habit and skills of reflective practice in order to meet student needs and grow continuously as a

professional teacher **Reflection in Teacher Education** Peter Philip Grimmett,1988 **Conceptualizations of Reflection in Teacher Education** Erika Chrobak-Muñoz,2001 Video Reflection in Literacy Teacher Education and Development Evan Ortlieb,Mary B. McVee,Lynn E. Shanahan,2015-05-06 Within education there is a growing body of research focused on the use of video as a mediational tool for reflection The purpose of this volume is to bring together research and research based practices from a wide array of literacy scholars and practitioners who are using video in educational research and teaching **Teachers who Teach Teachers** Tom Russell,Fred Korthagen,Fred A. J. Korthagen,1995 Teachers Who Teach Teachers is a major contribution to an emerging literature in which teacher educators are beginning to explore the new challenges facing those who care about the quality of teaching in schools and in teacher education programmes In this volume the contributors consider the personal development of both new and experienced teacher educators illustrating just how strongly teacher educators are influenced by their visions and by the challenge to prove themselves in the university setting They look at ways in which teacher educators have acted to promote their own professional development and study their own practices including writing as a tool for reflection Finally the contributors take a broader look at the professional development of teacher educators and the challenge to all teacher educators to consider the tension between rigour and relevance *Reflective Theory and Practice in Teacher Education* Robyn Brandenburg,Kathryn Glasswell,Mellita Jones,Josephine Ryan,2017-03-30 This book offers a detailed examination of reflective practice in teacher education In the current educational context where reflective practice has been mandated in professional standards for teachers in many countries it analyses research based evidence for the power of reflective practice to shape better educational outcomes The book presents multiple theoretical and practical views of this often taken for granted practice so that readers are challenged to consider how factors such as gender and race shape understandings of reflective practice Documenting approaches that enhance learning the contributions discuss reflective practice across the globe with a focus on pre service in service and university teachers At a time when there is pressure to measure teachers work through standardised tests the book highlights the professional thinking that is integral to teaching and demonstrates ways it can be encouraged in beginning teachers Aimed at the international community of teacher educators in schools and universities it also includes a critical examination of methodological issues in analysing and evaluating reflective practice and showcases the kind of reflective practice that empowers teachers and pre service teachers to make a difference to students

Developing Reflective TESOL Practitioners Through Teacher Education Andrzej Cirocki,Mark Wyatt,Xuesong (Andy) Gao,2024-07-26 This textbook provides insights from Asian contexts into how reflective practice is nurtured in Teaching English to Speakers of Other Languages TESOL and English Language Teaching ELT teacher education programmes There is increasing recognition worldwide that given the centrality of reflective practice to teachers ongoing professional development supporting teachers to become reflective practitioners should be integral to teacher education

programmes Consequently tertiary and master s level courses in areas such as TESOL and ELT tend to promote reflective practice supported by theoretical input from the burgeoning literature on reflection much of which is produced in the West Relatively under represented in the literature are global perspectives on reflective practice there are consequently relatively few accounts as to how reflective practice is embedded in teacher education programmes in different parts of the world including Asia Contributing authors from fourteen countries provide insights into the ways in which teachers are helped to grow as reflective practitioners on their teacher education programmes in their unique contexts This textbook showcases how reflective teaching practices are developed supported by frameworks for critical reflection and in interaction with local educational policies These distinctive accounts aid readers in reflecting on the ways in which reflective practice is supported in their own teacher education contexts and in considering ways of enhancing the reflective dimension of their programmes This textbook showcases innovative reflective activities and can be used as a principal text or as supplemental reading in a range of TESOL and ELT teacher education courses

Teaching As A Reflective Practice Ian Westbury,Stefan Hopmann,Kurt Riquarts,2012-08-06 This volume presents a mix of translations of classical and modern papers from the German Didaktik tradition newly prepared essays by German scholars and practitioners writing from within the tradition and interpretive essays by U S scholars It brings this tradition which virtually dominated German curricular thought and teacher education until the 1960s when American curriculum theory entered Germany and which is now experiencing a renaissance to the English speaking world where it has been essentially unknown The intent is to capture in one volume the core at least of the tradition of Didaktik and to communicate its potential relevance to English language curricularists and teacher educators It introduces a theoretical tradition which although very different in almost every respect from those we know offers a set of approaches that suggest ways of thinking about problems of reflection on curricular and teaching praxis the core focus of the tradition which the editors believe are accessible to North American readers with appropriate translation These ways of thinking and related praxis are very relevant to notions such as reflective teaching and the discourse on teachers as professionals By raising the possibility that the new tradition of Didaktik can be highly suggestive for thinking through issues related to a number of central ideas within contemporary discourse and for exploring the implications of these ideas for both teacher education and for a curriculum theory appropriate to these new contexts for theorizing this book opens up a gold mine of theoretical and practical possibilities

Developing Reflective Practice J. John Loughran,2002-11-01 This text presents a research study into the development of reflective practitioners in a pre service teacher education programme The teacher educator in the study modelled his own reflections on practice in the hope that it would help students to apply reflection to their own teaching The results of the author s research demonstrate that reflection on practice occurs in three distinct periods before anticipatory during contemporaneous and after retrospective a pedagogical experience The book concludes that when student teachers own learning situations both within their university coursework

and their school experiences become the focus for their learning about teaching and learning their understanding of and practice in teaching is enhanced

Images of Reflection in Teacher Education Hersholt C. Waxman, 1988

Action and Reflection in Teacher Education Gareth Rees Harvard, Phil Hodgkinson, 1994 Throughout the world teacher education is once more in the spotlight This book focuses on recent trends and experiences in England and Wales where external pressures have caused tension between the technician model of teacher education in which teachers learn primarily on the job alongside colleagues and traditional forms of teacher education based in higher education institutions This tension superficially replicates an old dichotomy between practice and theory The contributors to this volume reflect on ideas and attempts to integrate theory and practice Key questions and themes recur the balance and relationship between work done in school on the job and work away from the workplace such as in universities teacher education as a partnership activity and the need to critically examine the institutional cultural and historical context in which they work

Teachers And Teaching Hugh Munby, 2004-08-02 This work offers a new analysis of reflection and of the significance of framing in teachers thinking The book encapsulates recent developments in the field in the UK USA Canada and Australia Case studies and research results are cited in support of the reflective process
