Reflections On The Architecture Of Williams College:

Architecture & Academe Bryant Franklin Tolles, 2011 The unique and influential architecture of sixteen New England colleges Williams College Eugene J. Johnson, Michael Lewis, 2018-11-13 Nestled in the Berkshire Mountains in western Massachusetts Williams College routinely ranks atop the best liberal arts colleges in the United States The 450 acre campus master planned by the esteemed Olmsted Brothers is home to 2 000 students and 100 academic and residential buildings some dating back to the late 18th century This beautifully written and illustrated portrait showcases many fine examples of American campus architecture by Cram Goodhue Shepley Bulfinch Richardson Stanford White Mitchell Giurgola Tadao Ando Cambridge Seven Bohlin Cywinski Jackson Einhorn Yaffee Prescott and Polshek Partners Williams College The Campus Guide with newly commissioned color photography and axonometric color maps to engage visitors students and alumni is the newest edition to the acclaimed Campus Guide series of American colleges and universities *Gervase Wheeler* Renée Tribert, James F. O'Gorman, 2012-02-08 Gervase Wheeler was an English born architect who designed such important American works as the Henry Boody House in Brunswick Maine the Patrick Barry House in Rochester New York and the chapels at Bowdoin and Williams colleges But he was perhaps best known as the author of two influential architecture books *Rural Homes* 1851 and *Homes for the People* 1855 Yet Wheeler has remained a little known enigmatic figure Renée Tribert and James F O'Gorman's study sheds new light on the course of Wheeler's career in the states and brings crucial issues to the fore the international movement of ideas the development of the American architectural profession the influence of architectural publications on popular taste and social history as expressed in the changing nature of the American house Wheeler's career is traced chronologically and geographically and the book is lavishly illustrated with over fifty images including building plans and historical photographs **Journal of the Society of Architectural Historians** Society of Architectural Historians, 1993 Includes special issues **Catalogue of the Library of Williams College, Williamstown, Mass** Williams College. Library, 1875 **The Architecture of the British Library at St. Pancras** Roger Stonehouse, Gerhard Stromberg, 2004-08-02 In a series of interrelated essays this book describes the British Library and the issues surrounding its design construction purpose and place in the architectural canon Examining the experience of the building together with its form these essays explore the ideas and aspirations behind its conception and its construction offering insight into this striking controversial and stimulating building For artists architects and building professionals interested in the current debates concerning architecture and our culture The Architecture of the British Library at St Pancras is a stimulating read **Architecture from the Outside** Elizabeth Grosz, 2001-06-22 Essays at the intersection of philosophy and architecture explore how we understand and inhabit space To be outside allows one a fresh perspective on the inside In these essays philosopher Elizabeth Grosz explores the ways in which two disciplines that are fundamentally outside each other architecture and philosophy can meet in a third space to interact free of their internal constraints

Outside also refers to those whose voices are not usually heard in architectural discourse but who inhabit its space the destitute the homeless the sick and the dying as well as women and minorities Grosz asks how we can understand space differently in order to structure and inhabit our living arrangements accordingly Two themes run throughout the book temporal flow and sexual specificity Grosz argues that time change and emergence traditionally viewed as outside the concerns of space must become more integral to the processes of design and construction She also argues against architecture's historical indifference to sexual specificity asking what the existence of at least two sexes has to do with how we understand and experience space Drawing on the work of such philosophers as Henri Bergson Roger Caillois Gilles Deleuze Jacques Derrida Luce Irigaray and Jacques Lacan Grosz raises abstract but nonformalistic questions about space inhabitation and building All of the essays propose philosophical experiments to render space and building more mobile and dynamic

Poetry, Practical Theology and Reflective Practice Mark Pryce, 2019-03-13 This groundbreaking study offers an innovative critical analysis of poetry as a resource for reflective practice in the context of continuing professional development In the contemporary drive in all professions for greater rigour in education training and development little attention is paid to the inner shape of learning and meaning making for individuals and groups especially ways in which individuals are formed for the task of their work Building on empirical research into the author's professional practice the book takes the use of poetry in clergy continuing ministerial development as a case study to examine the value of poetry in professional learning Setting out the advantages and limitations of poetry as a stimulant for imaginative critical reflexivity and formation within professional reflective practice the study develops a practical model for group reflection around poetry distilling pedagogical approaches for working effectively with poetry in continuing professional development Drawing together a number of strands of thinking about poetry Practical Theology and reflective practice into a tightly argued study the book is an important methodological resource It makes available a range of primary and secondary sources offering researchers into professional practice a model of ethnographic research in Practical Theology which embraces innovative methods for reflexivity and theological reflection including the value of auto ethnographic poetry
