Developments in Numerical and Experimental Methods Applied to Tribology D. Dowson, C. M. Taylor, M.

Godet, 2014-05-20 Developments in Numerical and Experimental Methods Applied to Tribology contains the proceedings of the 10th Leeds Lyon Symposium on Tribology held at the Institut National des Sciences Appliquées in Lyon France on September 6-9 1983. The papers explore developments in numerical and experimental methods used in tribology and cover topics ranging from ferrography and rheology to bearings and bearing dynamics, hydrodynamics, contact phenomena and plasticity. The papers are organized into 13 sessions. The first two papers examine the use of ferrography in the analysis of non-ferrous particles as well as some of the methods of obtaining approximate numerical solutions to boundary value problems that arise in elastohydrodynamic lubrication. The next session is concerned with rheology and contains papers that describe numerical solutions for power law fluids as applied to slider bearings, grease lubricated finite length bearings and the use of the ball bearing as a rheological test device. The papers that follow discuss bearings and their dynamics, oil films on lubricated surfaces, hydrodynamic lubrication and finite element analysis of transient elastohydrodynamic lubrication. The final session considers plastic deformation, two-body abrasion processes and micropitting and asperity deformation. This monograph will appeal to tribologists.

**Sexuality, Law and Legal Practice and the Reformation in Norway** Anne Riisøy, 2009-02-23 Based on legislation and legal practice from the period c. 1250-1600, the book takes issue with the most important viewpoints in earlier research by early modernists that the Reformation represented a watershed in a development characterized by greater criminalisation of sexual acts, increase in the severity of sentences and deterioration of the position of women. According to this study, in principle all or mostly all factors were already in place in the Middle Ages. In Norwegian historiography the period investigated is characterized by paucity of sources and the period has tended to fall between two stools respectively the medievalist and the early modernist. The ambition of this book has been to bridge the gap.

**Proceedings of the International Conference on Information Engineering and Applications (IEA) 2012** Zhicai Zhong, 2013-04-04 Information engineering and applications is the field of study concerned with constructing information computing intelligent systems, mathematical models, numerical solution techniques and using computers and other electronic devices to analyze and solve natural scientific, social scientific and engineering problems. Information engineering is an important underpinning for techniques used in information and computational science and there are many unresolved problems worth studying. The Proceedings of the 2nd International Conference on Information Engineering and Applications IEA 2012, which was held in Chongqing, China from October 26-28 2012, discusses the most innovative research and developments including technical challenges and social, legal, political and economic issues. A forum for engineers and scientists in academia, industry and government, the Proceedings of the 2nd International Conference on Information Engineering and Applications presents ideas, results, works in progress and experience in all aspects of information

history making are scientifically inseparable and separately unmeaning      **The Vindication of Tradition** Jaroslav Pelikan,1984-01-01 This book clearly constitutes a unified plea that modern society find ways and means to recapture the resources of the past and to overcome its fear of the tyranny of the dead      Lectures on Modern History Baron John Emerich Edward Dalberg Acton,2019-09-25 Reproduction of the original Lectures on Modern History by Baron John Emerich Edward Dalberg Acton      **Reports of the United States Tax Court** United States.
