environmental law By some indicators this body of regulation has matured greatly We can point to statutes and codes at the federal state and local levels which address almost every conceivable form of pollution and environmental insult Yet despite the existence of this large body of law despite considerable expenditures on enforcement and despite the energetic efforts of people sympathetic to environmental objectives violations are numerous Serious pollution problems are commonplace Love Canal the Valley of the Drums Times Beach and Stringfellow Acid Pits epitomize the national environmental quality challenge Daily a major illegal disposal of hazardous waste is recorded a new mismanaged dump site is discovered a toxic substance is found in our drinking water or a failure to meet a water or air quality standard is identified Many of these violations involve American business Failures to comply are of several types A small businessman in Pennsylvania mistakenly allows a spillover of a pollutant into a protected stream An industrialist in the Midwest adds to his fortune by illegally dumping dangerous chemicals A series of errors by several firms some of which no longer exist combine to create a health threatening conflagration on the West Coast An automobile company interprets one of the almost innumerable air pollution rules differently from government It produces a car which the government says fails to comply with the Clean Air Act
