Cohen, 2003-02-06 Based on years of teaching psychiatry to medical students and residents this single authored textbook offers a conversational yet detailed guide to modern psychiatric theory and practice Exploring various approaches to psychiatric disorders including neurobiology dimensional personality assessment behavioral science and psychodynamic and cognitive theories it lucidly illustrates each approach's strengths and weaknesses and suggests how clinicians can interweave them in working with patients Using clinical vignettes and recent research findings to illustrate the connections between phenomenology pathophysiology and treatment it covers all of the major psychiatric disorders and includes tables listing their DSM IV TR diagnostic criteria The book offers balanced coverage of subjects that receive scant attention in other introductory textbooks including the limitations of the DSM IV categorical approach to psychiatric diagnosis controversies surrounding the dissociative disorders and recovered memories and the prescription of stimulant medications to children with suspected attention deficit hyperactivity disorder Later chapters provide practical guidelines for estimating a patient's risk of suicide and violence and for assessing competence to consent to medical or psychiatric treatment In eschewing a dry recitation of clinical syndromes for an engaging discussion aimed at teaching the reader how to think psychiatrically the book will appeal to medical students psychiatric residents mental health clinicians and primary care physicians Phobic and Anxiety Disorders in Children and Adolescents Thomas H. Ollendick, John S. March, 2004-01-15 This comprehensive interdisciplinary guidebook is designed for the mental health practitioner seeking to utilize proven and effective interventions with children and adolescents suffering from significant anxiety and phobic disorders Each chapter is co authored by a clinical child

psychologist and a child psychiatrist framing the volume's unique and balanced perspective. In addition, each chapter presents state-of-the-art assessment and treatment strategies for a panoply of phobic and anxiety disorders, including both psychosocial and pharmacological interventions. Moreover, the volume addresses important conceptual, epidemiological, and ethical issues in working with children and adolescents. All in all, this guide will help address the wide chasm between clinical research and clinical practice, uniting the forces intrinsic to child psychiatry and clinical child psychology. Unspeakable Harriet Shawcross, 2019-03-07 Compassionate Guardian. Extremely affecting Scotsman. As a teenager, Harriet Shawcross stopped speaking at school for almost a year. As an adult, she became fascinated by the limits of language. From the inexpressible trauma of trench warfare and the aftermath of natural disaster to the taboo of coming out, Harriet examines all the ways in which words scare us. She studies wartime poet George Oppen, interviews the author of *The Vagina Monologues*, meets Nepalese earthquake survivors, and the founders of the Samaritans, and asks what makes us silent. **Clinical Consult to Psychiatric Mental Health Management for Nurse Practitioners** Jacqueline Rhoads, 2025-04-05 Quick Access Evidence-Based Mental Healthcare Protocols for Nurse Practitioners. Helping Children and Families Peter Goldenthal, 2005-04-22 Bridging the gap between child and family therapy. Written by a nationally recognized expert on treatment, *Helping Children and Families: A New Treatment Model Integrating Psychodynamic, Behavioral, and Contextual Approaches* presents a practical approach for helping children and their families work through a diverse array of issues. Goldenthal's clinical model offers specific techniques for working with children and adolescents and shows the important connection that involving families in their treatment can make in therapeutic outcomes. Unlike other books that focus either on children or families, this insightful new work demonstrates how to help children in their own unique family

context The book features detailed advice on How to create a therapeutic environment that supports every person in a family How to reassure an anxious parent How to engage very young children How to determine when a parent needs individual therapeutic work and how to engage the parent in this process The five most effective ways to confront a client and reach a positive outcome When to let a parent decide on the frequency of counseling visits and when to set an agenda When to invite other people to participate in therapy When to refer clients for medication evaluation or neuropsychological testing Goldenthal s integrated model offers a commonsense approach to treating childhood disorders Addressing problems from early childhood to late adolescence Helping Children and Families provides an engaging and accessible guide to putting this approach into practice

Abnormal Child and Adolescent Psychology Linda Wilmschurst, 2017-03-03 Written from a developmental perspective Abnormal Child and Adolescent Psychology is organized around five prominent and recurring themes the course of normal development proceeds in an orderly and predictable direction maladaptive behaviors represent deviations from the normal path maladaptive behavior is represented by a continuum of severity symptoms syndromes disorders based on the degree to which behaviors deviate from the norm individual interpersonal contextual and cultural factors interact in a reciprocal way to influence normal development and abnormal deviations theoretical input from diverse perspectives can guide our understanding of underlying processes that precipitate and maintain behaviors and the different developmental pathways that might result The revision will be divided into 5 sections all integrating the DSM 5 and will include a new chapter on child maltreatment and self injurious behavior
