Urban Regeneration in Europe Uwe Altrock, Detlef Kurth, 2024-11-25 We understand urban regeneration as all efforts managed funded or at least guided to some extent by public authorities that aim at improving stabilizing or revitalizing existing neighborhoods. This comprises area based strategies improvements of public infrastructure and interventions into the physical structure of the built environment. Their strategies may be redevelopment renewal careful regeneration socially integrative management and others. Those efforts aim at dealing with reurbanization trends recently challenged by new suburbanization due to overheated development sharp increases in house prices and more and more professionals working from home. The major objective of the book is to give an overview of the variety of approaches applied in European countries. Therefore it takes a particular look at the systems of urban regeneration that build upon an interplay of specific legal frameworks policies public funding schemes physical planning tools partnerships and governance arrangements applied with the intention of solving urban problems. For this purpose chapters present case studies of those national or regional systems or outstanding examples of long term efforts by major cities.
