

3 Crucial Elements of a Fire Safety Plan

To create an effective fire safety plan, think about the following three areas of fire safety:

1. Environmental Planning

A safe environment with extinguishers, well-marked fire exits, and accessible pathways is the first priority in minimizing a fire's impact on your business.

EXIT

2. Training

- If a fire breaks out, your people need to know where to go and what to do. The best time to learn effective response procedures is well before a fire occurs.
- Equally important is training to avoid the common causes of fires to prevent one from starting in the first place.

3. Communication

- Fires are hyper-local events, so information on active fires should be sent to employees at home or a different location so they can stay clear of the danger.
- Emergency notification systems can aid in the rapid and accurate deployment of fire updates throughout your organization.
- Two-way communication is crucial to determine who needs help during an emergency.
