The Development of China's Stockmarket, 1984-2002 Stephen Green,2004-07-31 As China's government manages a transition away from the socialist plan how does it build the regulatory institutions it needs to manage the new market economy Without the correct institutions laws and agencies that implement the laws in place the remarkable growth witnessed in China over the last two decades will falter Financial sector reform lies at the heart of China's economic transition and China's stock market has become critical to the reform of state owned industry the supply of fiscal revenues and in building a modern pension system The Development of China's Stockmarket takes a close look at the policy making and regulatory institutions the government has created to manage equity development and shows how in contrast to neo institutional and economic theories of regulatory development public actors have controlled institutional development Based on extensive field research in Shanghai Shenzhen and Beijing and over forty interviews with regulators and market players The Development of China's Stockmarket provides the first detailed academic analysis of the country's stockmarket With a comprehensive review of Chinese language literature available on the subject this book is essential reading for all scholars with an interest in Asian Business and China's transition from socialism

Financialization and the Economy Agata Gemzik-Salwach,Krzysztof Opolski,2017-07-14 There can be no doubt that the influence of the financial sphere has intensified rapidly in recent years but there is much debate about the effect of that influence The aftermath of the Financial Crisis has led to numerous discussions of the phenomenon of so called financialization the increasing impact of financial institutions on the activity of all business entities emerging threats related with dynamically developing financial markets and the growing importance of financial themes In light of these issues which appear in all economies and touch all entities and every area of economic activity there is a need for a summary and evaluation of the role of financialization in the world today This monograph presents the role of financialization in the modern world It shows positive as well as negative effects of financialization on the stability of the whole economy the functioning of different types of markets activity of enterprises state institutions and behaviours of households Written by expert contributors this book plays an important role in the debate concerning future directions of development of the financial sector and financial markets Financialization and the Economy is of great importance to those who study political economy macroeconomics and banking

Transatlantic Policymaking in an Age of Austerity Flor Aarts,2004-11-11 Transatlantic Policymaking in an Age of Austerity integrates the study of politics and public policy across a broad spectrum of regulatory and social welfare policies in the United States and several nations of Western Europe The editors and a sterling list of contributors look at policymaking in the 1990s through the present

providing a comparative politics framework stressing both parallel development and the differences between and among the nations Similar prevailing ideas and political factors can be identified and transatlantic comparisons made providing for a clearer understanding of the policymaking process Faith in regulated markets and the burden of rising welfare costs are concerns found on both sides of the Atlantic Western democracies also share political climates colored by economic austerity low trust in government pressures from interest groups and a sharply divided electorate Because of differing political processes and differing policy starting points a variety of disparate policy decisions have resulted Real world policymaking in the areas of welfare health labor immigration reform disability rights consumer and environmental regulation administrative reforms and corporate governance are compared Ultimately the last decade is best characterized as one of drift sluggish changes with little real innovation and much default to the private sector In general policymakers on both sides of the ocean constrained by economic necessity have been unable to produce policy outcomes that satisfy the key segments of the electorate The contributors examine the United States Great Britain France and Germany as well as a number of other European countries and study the European Union itself as a policymaking institution Transatlantic Policymaking in an Age of Austerity distills the prominent issues politics and roles played by governmental institutions into a new understanding of the dynamics of policymaking in and among transatlantic nations

The Politics of Equity Finance in Emerging Markets
Kathryn C. Lavelle, 2004-10-14 Emerging market stock issuance relative to GDP rose in the late twentieth century to levels that roughly matched that of advanced industrial markets Nonetheless the connection between owning shares of emerging market stock and the ability to influence the management of these firms remains fundamentally different from the analogous institutional connection that has evolved in industrial markets The reasons for the differences in emerging markets are both historical and political in nature That is local equity markets have had the objective of providing for some degree of local ownership and control of large economic entities since the late nineteenth century However local markets have operated under different global political structures since that time ranging from imperialism to world wars to sovereign developmental states to neo liberal states Shares issued under these different structures have been reconfigured over time resulting in a lack of convergence along either the Anglo American or Continental models of corporate governance The author uses a political science paradigm to explain the growth of emerging equity markets She departs from conventional economic explanations and examines politics at the micro level of large issues of emerging market stock The second half of the book presents case studies dealing with emerging market countries in Latin America Asia Russia and Eastern Europe Africa and the Middle East The case studies connect the regional state and firm levels to detail the multiple ownership and control arrangements and to dispel the notion that mere quantitative growth of these markets will lead to a convergence in financial institutional structures along the lines of the industrial core of the world economy

Financial Resources for Development in Myanmar Myat Thein, 2000 Much attention has been paid to the increasingly substantial inflows of foreign

direct investment into Myanmar since the country opened its doors to overseas investors in late 1988. In addition to bringing capital in the form of cash, such investment has also introduced new technology, training and skills, business and management acumen, as well as various other inputs that Myanmar undoubtedly requires if the country is to develop. However, there is a growing realization that FDI inflows alone will not enable the country to meet the ambitious economic growth targets. As evidenced by the Asian Tiger economies, there is also a need for considerable amounts of domestic capital, and in order to attain substantial levels of domestic investment, a system of domestic savings vehicles that the state and industry can harness must be developed. Hence, this volume seeks to examine ways in which domestic savings and investment capital can be encouraged and increased. The contributors include not only Myanmar economists and policy makers but also experts from ASEAN and Japan who share their experiences.

Capital Market Development and Investor's Response Dr. Manjri Damele, 2021-08-05. Indian capital market has undergone fast changes particularly since the initiation of new economic and financial reforms in the year 1992. In the Indian economy moving in the direction of privatization, deregulation, liberalization and globalization, the role of capital and capital market can be overemphasized. A well-organized capital market is supposed to perform disciplinary, allocative and investor protective functions effectively and efficiently. This will lead to effective channelization of foreign as well as domestic capital flow for the overall economy's growth and development. However, few studies that have been done on the Indian Capital Market have left many essential issues untouched. This book, in its attempt to fill this vacant, empirically investigates the role of the capital market in economic development, various indicators of the development of the capital market in India, efficiency and seasonality in the capital market, volatility in the market and investors' perception about Indian capital market, etc. The book has been divided into eight chapters.

Redefining Security David T. Graham, Nana Poku, 1998-10-30 International migration has become a major domestic political issue in many countries and a major topic of international debate Thus far most of the attention has centered on the plight of refugees or on ways to curb the flow of illegal immigrants As more and more migrants cross interstate boundaries however governments are realizing that immigration and asylum problems cannot be separated from broader socio economic and political issues nor can they be resolved by countries acting unilaterally Even with this understanding attempts to develop multilateral strategies to ease international tensions arising from uncontrolled migration will be complicated by economic disparities regional political tensions and mounting population and ecological pressures Internal migration particularly in terms of forced resettlement and urbanization also gives rise to a myriad of problems relating to aspects of security The increase in other major population movements such as tourism and business travel also has implications for security Until recently the question what is security was rarely asked in the context of these developments This was because there was a perceived consensus on what the nature of security was The nature of security was held to mean national political and military security Thus security was virtually synonymous with defense The theoretical claim of this volume is that these developments are necessitating a redefinition of security This volume provides major theoretical analyses of these trends as well as in depth case studies that explore specific developments of major concern to scholars and other researchers involved with international relations migration and development issues
