Slusser,2010-09-08 Numerous studies report that ultraviolet UV radiation is harmful to living organisms and detrimental to human health Growing concerns regarding the increased levels of UV B radiation that reach the earth s surface have led to the development of ground and space based measurement programs Further study is needed on the measurement modeling and effects of UV radiation The chapters of this book describe the research conducted across the globe over the past three decades in the areas of 1 current and predicted levels of UV radiation and its associated impact on ecosystems and human health as well as economic and social implications 2 new developments in UV instrumentation advances in calibration ground and satellite based measurement methods modeling efforts and their applications and 3 the effects of global climate change on UV radiation Dr Wei Gao is a Senior Research Scientist and the Director of the USDA UV B Monitoring and Research Program Natural Resource Ecology Laboratory Colorado State University Dr Gao is a SPIE fellow and serves as the Editor in Chief for the Journal of Applied Remote Sensing Dr Daniel L Schmoldt is the National Program Leader for instrumentation and sensors at the National Institute of Food and Agriculture NIFA of the U S Department of Agriculture Dr Schmoldt served as joint Editor in Chief of the journal Computers Electronics in Agriculture from 1997 to 2004 Dr James R Slusser retired in 2007 from the USDA UV B Monitoring and Research Program at Colorado State University He was active in the Society of Photo Optical Instrumentation Engineers the American Geophysical Union and the American Meteorological Society Dr Slusser is currently pursuing his interests in solar energy and atmospheric transmission Improving Seed Conditioning Bill Gregg,2017-02-24 Seed conditioning is the final process that establishes the quality of a seed lot and determines its value It is a complex process involving a significant series of machines each of which must be used in the proper sequence of the entire process and each machine must be carefully and properly adjusted and set up for each lot of seed If the conditioning plant operator does not have sufficient knowledge of how to set up and adjust each of the machines then an excessive amount of good seed is lost during conditioning and not all undesirable materials are removed Therefore the performance of seed

conditioning depends entirely on how effectively the operator sets up and adjusts the machines Much effort has been spent in developing seed technology so as to produce high quality seed but performance of seed conditioning by maximizing the operator s knowledge of getting the best performance from each of his machines has not been carefully and completely developed Improving Seed Conditioning focuses on teaching the conditioning plant operator details of each machine and how to get maximum performance from it in terms of operating efficiency maximum removal of undesirable particles and minimum loss of good seed Organized in a manner that focuses on the specific machine models installed in each operator s specific plant this manual is set up to be used as text material in training classes or as a guide for operators employed by seed companies
