Congleton, Arye L. Hillman, Kai A. Konrad, 2008-08-01 The last survey of the rent seeking literature took place more than a decade ago Since that time a great deal of new research has been published in a wide variety of journals covering a wide variety of topics The scope of that research is such that very few researchers will be familiar with more than a small part of contemporary research and very few libraries will be able to provide access to the full breadth of that research This two volume collection provides an extensive overview of 40 years of rent seeking research The volumes include the foundational papers many of which have not been in print for two decades They include recent game theoretic analyses of rent seeking contests and also applications of the rent seeking concepts and methodology to economic regulation international trade policy economic history political competition and other social phenomena The new collection is more than twice as large as any previous collection and both updates and extends the earlier surveys Volume I contains previously published research on the theory of rent seeking contests which is an important strand of contemporary game theory Volume II contains previously published research that uses the theory of rent seeking to analyze a broad range of public policy and social science topics The editors spent more than a year assembling possible papers and although the selections fill two large volumes many more papers could have been included

*Phenomenology and the Extreme Sport Experience* Eric Brymer,Robert Schweitzer,2017-03-27 Understanding the motivations behind those who partake in extreme sports can be difficult for some If the popular conception holds that the incentive behind extreme sports participation is entirely to do with risking one s life then this confusion will continue to exist However an in depth examination of the phenomenology of the extreme sport experience yields a much more complex picture This book revisits the definition of extreme sports as those activities where a mismanaged mistake or accident would most likely result in death Extreme sports are not necessarily synonymous with risk and participation may not be about risk taking Participants report deep inner transformations that influence world views and meaningfulness feelings of coming home and authentic integration as well as a freedom beyond the everyday Phenomenologically these experiences have been interpreted as transcendent of time other space and body Extreme sport participation therefore points to a more potent life enhancing endeavour worthy of further investigation This book adopts a broad hermeneutic phenomenological approach to critique the assumed relationship to risk taking the death wish and the concept of No Fear in extreme sports and repositions the experience in a previously unexplored manner This is valuable reading for students and academics interested in Sports Psychology Social Psychology Health Psychology Tourism Leisure Studies and the practical applications of phenomenology

*Institutions and Collective Choice in Developing Countries* Mwangi S. Kimenyi, John Mukum Mbaku, 2019-05-23. First published in 1999, this volume is written by seasoned public choice scholars and is intended to make a significant contribution to the debate on peaceful coexistence and sustainable development in developing countries. The book contains a rich mixture of analytical ideas and views on collective choice and macroeconomic performance in developing countries. This book breaks new ground in that it is the first comprehensive application of the theory of public choice to collective decision making in developing societies. It provides both students of Third World studies and policy makers in developing societies an in-depth analysis for institutions for collective choice. For countries undergoing major reform of their political and economic institutions, public choice theory can provide significant and useful insights and help these societies design and adopt institutional arrangements that enhance peaceful coexistence of groups, the creation of wealth, and sustainable development. Specifically, the book successfully shows that 1) the application of economic theory to the study of public policy in the developing countries can provide important insights into collective decision making; 2) the application of public choice theory to the study of developing societies can significantly improve the efficiency of bureaucratic and governmental systems and consequently promote economic, political, and social development; and 3) public choice can help developing societies design and sustain effective laws and institutions for peaceful coexistence of groups and achieve sustainable development.

**Campaigning in Radical Right Heartland** Oliver Gruber, 2014. Immigration and ethnic diversity are contentious political issues in contemporary Europe. Both increasingly structure the campaigning strategies of political parties. This book provides insights into the processes driving party politicization. It presents findings from the heartland of the radical right, studying competition on migration and diversity in Austria since the 1970s. It reveals how parties adapt their electoral priorities to changes in the party system and the socio-structural conditions. The findings document the evolution of a new dimension of political competition and how niche parties can impact on mainstream party politicization in the electoral arena. Oliver Gruber is post-doctoral researcher and lecturer at the Department of Political Science at the Universities of Vienna and Innsbruck.
