The Effective Teaching of Secondary Science John Parkinson, 2014-06-03 The Effective Teaching of Secondary Science encourages the trainee teacher to develop effective skills for teaching science to secondary school pupils. The comprehensive coverage of topics and issues provides good foundations for trainee teachers who are encouraged to test and evaluate different techniques. Practical advice is offered in areas such as lesson planning, the preparation of worksheets, planning practical activities and safety in the laboratory. The book also discusses the use of information technology as well as multicultural and gender issues and the teaching of pupils with special needs. Much of the work covered is underpinned by areas of educational research such as educational theory and psychology and sociology of education. Information on the requirements of the national curriculum and on post 16 science courses is given and includes a number of assessment techniques for the problematic area of assessing science attainment target 1.

Assessment in Physical Education Bob Carroll, 2003-09-02 In the past assessment was underplayed or neglected in the training of physical education teachers. With the introduction of the GCSE Routes of Assessment (ROA) and the National Curriculum assessment has become an important part of the teaching of PE. This book examines in detail the issues as they affect teachers.

Physics Jim Breithaupt, 1994 This teacher's guide accompanies a textbook written for the co-ordinated science syllabuses under the National Curriculum and for Science Physics. There are companion volumes on biology and chemistry. Topics are differentiated into core material for Double Single Science and extension material for Science Physics. These topics are linked to related ones in the companion volumes but the links are optional, allowing the physics book to stand alone.
