Epilepsy in Our Lives is a collection of stories from women with epilepsy that describe in their own words what life is like with this disorder *Living with Epilepsy* Mel Riebe Jr., 2019-01-03 I don't know why people are afraid of people who have epilepsy It's just a condition It's not something you can catch it is not contagious Epilepsy has to do with the brain Like me I was born perfectly normal However I had one of my blood vessels on the left side of my brain burst That is why I have seizures for the rest of my life Epilepsy is not a bad word It is only a condition Doctors are doing more research on it so they can try out new medication that may control the seizures much better Maybe one day they will find a stronger medication for epilepsy I will do everything in my power to make sure that people with epilepsy will have a better life Maybe one day that would be cool Maybe my life is not perfect People think I can't do anything but they should think again I can do anything when I put my mind to it I can do it **Living and Coping with Epilepsy, My Way** Cara Coles, 2015-02-27 You really can

Richard F. Davis, 2011-07-19 none As I was working on the cover looking at the photos of what our brain neurons look like I began to think it looked like one of my favorite games Asteroids when your goal was to destroy the asteroids before they destroyed your spaceship That was 30 years ago I thought how funny it would be to paint into the cover picture a space ship like that to see if anyone would notice it but the more I thought about it the more it made me laugh So I designed my own game in my imagination station and drew them out here for you to enjoy Ill call it Seizuroids with the goal to destroy all the meteorites called fear stress anxiety worry depression loneliness and anger before it hits the brain causing a seizure and destroying all the electrical neutrons Laughter truly is the best medicine Seized Eve LaPlante, 2016-03-22 *Seized* is a

[The Unpredictable](#) Richard Davis, 2013-01-24 The purpose of The Unpredictable is to share personal and biographical stories and illustrations from my own experiences as well as others whose lives have been impacted by epilepsy or disorders Through the written word and the stroke of a brush the old saying A picture paints a thousand words accurately portrays the special people that have been highlighted in the pages of this book At the completion of this book my thoughts went back to what inspired me to write and paint about seizures and living with epilepsy It was my desire to make a living as an artist and settle down in a country home with my family living the life of an artist with a canvas and brush However I have learned through the years that our plans are often contrary to what God has in store for us Living with epilepsy has brought challenges and storms in life that have changed the course and direction of my life In this book the experiences of life with art and epilepsy are put into paintings that I have visualized from this disease My desire is to educate those unfamiliar with epilepsy encourage the ones living with this disease comfort the loved ones who support and assist those living with seizures and open the eyes of doctors who are educated about seizures but have never experienced the challenges faced in living with a seizure disorder

them From the day she discovered that through many years her life became a journey of personal growth and self discovery Why was this happening What should she do Who was she now that she seized These were only a few of the questions she asked herself in the face of her new reality Holly's walk with chronic illness became one of awakening and healing In it she learned many lessons in life while confronting the flaws failures ignorance and corruption permeating the American medical industry and sensing first hand the resiliency of the human mind and body Daily tending to the chores of chronic illness she scoffed at the paradox between the medical industry's responses and her own life's experiences Over time Holly realized that illness can play important positive roles in a human life Traveling her path where health and illness intertwine it became clear to her that illness can give as much as it takes away This convinced her that when allowed the time and space to be ill a person can find true health again a real life phenomenon rarely discussed by doctors and patients In Seized Searching for Health In the United States Holly tells the story of her journey with illness That well told personal tale provides a lens through which a reader can explore the common experience of searching for health in the United States Who would have imagined that it would be a dance artist who does so well exploring the many dimensions of illness and the failures of the United States healthcare system but that's precisely what happens here in Seized About the Author Holly Eckert grew up in a small town in the mountains of Idaho where she learned to dance from a former ballerina with the New York Ballet who also lived there After high school she took her scholarships and went to The Evergreen State College There she combined dance and social sciences to create her own integrated studies program Her education prepared her to go to Seattle and pursue her artistic mission of exploring substantive topics inside the art of dance Winning awards and praise for her artwork Holly pursued her passion with passion and made choreography about things like the experience of fear and the injustices of the US prison system She was healthy and strong into her mid thirties when one day she suddenly began seizing uncontrollably Epilepsy quickly overwhelmed her life It sent Holly on a diverse personal journey On her travels she discovered many new things about herself and as she did she learned more and more about the potentials for healing that exist inside the human body She also learned a great deal about the tragic failures of the United States medical system that often inhibits these possibilities from being realized Knowing that she liked to write as well as dance Holly decided to tell this story through

Schachter, 2020 To an Outside Observer Psychogenic Non Epileptic Seizures PNES can look like epileptic seizures However unlike epileptic seizures they are not caused by abnormal electrical discharges in the brain Instead most PNES are an automatic psychological and physiological

response to an internal or external trigger perceived as threatening by the individual whether consciously or not Not least because the changes in the brain that underpin PNES cannot be visualized easily with clinical tests there are many uncertainties and controversies surrounding the condition and patients often provoke a mixture of emotions in healthcare professionals While some patients have positive care experiences many are left feeling confused angry and abandoned by the clinicians they have encountered Non Epileptic Seizures in Our Experience presents the perspectives of over 90 members of different healthcare professions from around the world By allowing readers to gain fascinating insights into a broad range of their thoughts and feelings about PNES this book challenges negative attitudes surrounding the condition and helps to improve understanding between members of different professional groups as well as between professionals and patients In doing so it should ultimately advance the quality of care provided for those with PNES Book jacket
