Ownership of Knowledge Dagmar Schafer,Annapurna Mamidipudi,Marius

Buning, 2023-07-18 A framework for knowledge ownership that challenges the mechanisms of inequality in modern society. Scholars of science, technology, medicine, and law have all tended to emphasize knowledge as the sum of human understanding and its ownership as possession by law. Breaking with traditional discourse on knowledge property as something that concerns mainly words and intellectual history, or science and law, Dagmar Sch fer, Annapurna Mamidipudi, and Marius Buning propose technology as a central heuristic for studying the many implications of knowledge ownership. Toward this end, they focus on the notions of knowledge and ownership in courtrooms, workshops, policy, and research practices while also shedding light on scholarship itself as a powerful tool for making explicit the politics inherent in knowledge practices and social order. The book presents case studies showing how diverse knowledge economies are created and how inequalities arise from them. Unlike scholars who have fragmented this discourse across the disciplines of anthropology, sociology, and history, the editors highlight recent developments in the emerging field of the global history of knowledge as science, as economy, and as culture. The case studies reveal how notions of knowing and owning emerge because they reciprocally produce and determine each other's limits and possibilities: that is, how we know inevitably affects how we can own what we know, and how we own always impacts how and what we are able to know.

This edition carries forward from the prior edition the recent major amendments to the Copyright Act and the Lanham Act, the Copyright Alternative in Small Claims Enforcement (CASE) Act of 2020, which set out procedures for the newly created Copyright Claims Board to resolve copyright claims voluntarily brought before it rather than in federal court, and the Trademark Modernization Act of 2020, which among other changes created procedures for ex parte expungement and ex parte reexamination of trademark registrations. Other major changes carried forward in this edition are the Music Modernization Act of 2018, the federal Defense Trade Secrets Act of 2016, the Patent Law Treaties Implementation Act of 2012, and the Leahy-Smith America Invents Act (AIA), which substantially rewrote the U.S. Patent Act. Transnational Intellectual Property Law Robert P. Merges, Seagull Haiyan Song, 2018-04-27 As companies and organisations increasingly operate across national boundaries so the incentive to understand how to acquire, deploy and protect IP rights in multiple national jurisdictions has rapidly increased. Transnational Intellectual Property Law meets the need for a book that introduces contemporary intellectual property as it is practiced in today's global context. Focusing on three major IP regimes: the United States, Europe and China, the unique transnational approach of this textbook will help law students and lawyers across the world understand not only how IP operates in different national contexts but also how to coordinate IP protection across numerous national jurisdictions. International IP treaties are also covered but in the context of an overall emphasis on transnational coordination of legal rights and strategies.
