Historical Review of Aircrew Selection Robert R. Burwell, 1957 *A New Beginning in Sight* Eric J Arnott, 2006-11-20
Consultant eye surgeon Eric Arnott was one of the original pioneers of small incision surgery. He was the first to perform modern Phaco surgery in Europe and designed lens implants that have restored the sight to millions of patients. The word autobiography is simply insufficient to describe this book which is a remarkable testament to the life works and marriage of a remarkable man. The book details the original invention of the lens implant by Harold Ridley who Eric worked with in his early years of medical training. It goes on to follow the development of small incision Phaco surgery instigated by Charlie Kelman and the disinterest and contempt held by the peers of these ophthalmologic pioneers. The author describes every advance in this field of ophthalmology in fascinating detail. The importance to Eric of religion spirituality family life and helping others less fortunate than himself is reinforced in this enthralling and at times very amusing read. Arnott draws you into his narrative rousing thoughts of disbelief as you are compelled to continue reading each new chapter and event in his life proving as fascinating as the last. Entertaining and illuminating. *A New Beginning in Sight* provides a detailed history of ophthalmology and is essential reading for ophthalmologists other specialists and non specialists alike. *Military Personnel* Derek B. Committee on Appropriations, 1957 *RAF & East German Fast-Jet Pilots in the Cold War* Nigel Walpole, 2020-11-23 You'll learn what these pilots went through knowing that their actions or reactions could trigger a global nuclear war. Historic Aviation RAF and East German Fast Jet Pilots in the Cold War is the result of ten years of research involving many visits to the former German Democratic Republic by a small Anglo German team of military specialists. Their purpose was to explore the lives of RAF and East German fighter and fighter bomber pilots in the air and on the ground at work and play during the Cold War in North Germany. The book is based largely on personal testimony from these pilots coupled with facts drawn from official archives and comment from other historical sources. Where possible, political considerations have been avoided and no outright criticism has been intended, readers being left to draw their own conclusions on the thinking, strategies, equipment and tactics discussed. Far from being an intellectual polemic on the Cold War, the text and photographs merely record a slice of history as seen through the eyes of a select few who took up arms in the defense of their respective homelands and faced each other daily across the Iron Curtain. In an insightful conclusion, Nigel Walpole reassesses the threat that both sides believed was genuine during those tense decades of the Cold War and examines the possible course and nature of a conflict which neither NATO nor the Warsaw Pact wanted but both actively planned for. The writer has avoided politics where possible and in doing so reassesses the threat and uncertainty and ultimately the fears both air forces faced. It's truly fascinating!
