How AI Thinks Nigel Toon, 2024-02-08 THE 2 TIMES BESTSELLER Artificial intelligence is going to have a massive impact on everyone's lives an accessible and sensible read that helps demystify AI Deborah Meaden entrepreneur and star of Dragon's Den Nigel Toon is a visionary leader in the field of artificial intelligence a must read Marc Tremblay Distinguished Engineer Microsoft Those who understand how AI thinks are about to win big We are used to thinking of computers as being a step up from calculators very good at storing information and maybe even at playing a logical game like chess But up to now they haven't been able to think in ways that are intuitive or respond to questions as a human might All that has changed dramatically in the past few years Our search engines are becoming answer engines Artificial intelligence is already revolutionising sectors from

education to healthcare to the creative arts But how does an AI understand sentiment or context How does it play and win games that have an almost infinite number of moves And how can we work with AI to produce insights and innovations that are beyond human capacity from writing code in an instant to unfolding the elaborate 3D puzzles of proteins We stand at the brink of a historic change that will disrupt society and at the same time create enormous opportunities for those who understand how AI thinks Nigel Toon shows how we train AI to train itself so that it can paint images that have never existed before or converse in any language In doing so he reveals the strange and fascinating ways that humans think too as we learn how to live in a world shared by machine intelligences of our own creation *The Age of Spiritual Machines* Ray Kurzweil, 2000-01-01 NATIONAL BESTSELLER Bold futurist Ray Kurzweil author of *The Singularity Is Near* offers a framework for envisioning the future of machine intelligence a book for anyone who wonders where human technology is going next The New York Times Book Review Kurzweil offers a thought provoking analysis of human and artificial intelligence and a unique look at a future in which the capabilities of the computer and the species that invented it grow ever closer BILL GATES Imagine a world where the difference between man and machine blurs where the line between humanity and technology fades and where the soul and the silicon chip unite This is not science fiction This is the twenty first century according to Ray Kurzweil the restless genius The Wall Street Journal ultimate thinking machine Forbes and inventor of the most innovative and compelling technology of our era In his inspired hands life in the new millennium no longer seems daunting Instead it promises to be an age in which the marriage of human sensitivity and artificial intelligence fundamentally alters and improves the way we live More than just a list of predictions Kurzweil s prophetic blueprint for the future guides us through the inexorable advances that will result in Computers exceeding the memory capacity and computational ability of the human brain with human level capabilities not far behind Relationships with automated personalities who will be our teachers companions and lovers Information fed straight into our brains along direct neural pathways Eventually the distinction between humans and computers will have become sufficiently blurred that when the machines claim to be conscious we will believe them Engineering , 1875
