**Capitalism in Contention** Jonathan Boswell, James Peters, 1997-11-06 Examining the ideas of British business leaders on political economic and ethical issues since 1960 this book draws on hitherto unexplored records wide ranging interviews and biographical narrative and conceptual approaches and aims to shed new light on the Wilson Heath and Thatcher periods the mixed economy and the New Right the peak representative organisations of business and business relationships with government The authors intend to show how three main tendencies of business thinking have struggled for influence with radically differing visions of the role of business in society They argue that although elite business ideas were often obscured they did make a distinctive contribution to public policy business thinking and the development of capitalism in Britain

*Engineers and Management* Gloria L. Lee, Chris Smith, 2018-04-17 Originally published in 1992 In an increasingly competitive climate well trained experienced management is vital for establishing the long term future of industry In response to this need the number of management training courses have been growing in recent years However there is a group of highly skilled professionals who are not always recognized for their management potential Engineers often viewed as nothing more than technicians are a valuable but neglected human resource Their expertise has helped to generate the recent organizational restructuring throughout the manufacturing industry This study compares the situation of engineers in Britain with those in other countries It analyzes the industrial cultures of countries that have developed along very different traditions such as Japan Germany and Hungary as well as countries like Canada and the US where British traditions have prevailed but where the outcomes are different Bringing together leading writers on management who have specialist knowledge of the engineering profession it covers such issues as education employment and labour relations to show how far engineers are undervalued in British culture This book should be of interest to undergraduates MBA students academics and researchers in management engineering new technology industrial sociology and organizational behaviour

**Growth through Competition, Competition through Growth** Hiroyuki Odagiri, 1992-01-23 This book examines two

central aspects of Japanese management growth pursuit by internal investment as opposed to acquisition and intensive competition within and between Japanese firms It also looks at how Japanese firms maintain efficiency and flexibility under the apparently rigid system of lifetime employment The author begins by enquiring in to the financial and human aspects of the firm with a particular emphasis placed on the human side T he motivation behaviour and organization of Japanese management are discussed and the consequences of Japan s management system on its industrial organization and macroeconomy are examined Throughout the book it is emphasized that competition is at the heart of the Japanese economy and management to the same if not to a greater degreee than in the West This competition is enhanced by the growth preference of Japanese management and competition in turn makes growth feasible **Routledge Library Editions:**
