Lehman, 2005 This introductory textbook is for students who are interested in learning about and establishing healthy marriage family and intimate relationships With divorce rates high and relationships fragile books and courses are needed that help students address important issues regarding relationships The readers of this text examine many important and relevant issues through the lens of theory and research and do so using a written format that is readable understandable and easy to apply to one's life It was written so that each chapter has information that readers will find helpful as they attempt to establish and maintain meaningful healthy relationships There are questions throughout each chapter that help readers focus not only on the material but also on how the material relates to their present and past relationship and family situations The text provides material on the research of John Gottman the object relations theory of Harville Hendrix the solution focused approach of Michele Weiner Davis and the PREP approach to conflict management of Markman Stanley and Blumberg These and other topics discussed are very relevant to students' concerns and are addressed in greater depth than found in most other texts The emphasis is not just on couple relationships but also on family relationships Therefore in this book there is extensive coverage of family systems theory and the influence of family rules and family structure on the development of families There is also material on how change produces transitions in family life that must be assimilated into the family structure for example when a couple has their first child Thus both couple and family issues are addressed throughout the book For instructors who want to focus their courses on marriage family and intimate relationships this book would be an ideal choice A study guide for students and instructional material for instructors can be obtained by visiting www.understandingrelationships.net

Feminism, the Family, and the Politics of the Closet

Cheshire Calhoun, 2000-09-07 *Feminism the Family and the Politics of the Closet* is about placing sexual orientation politics within feminist theorizing It is also about defining the central political issues confronting lesbian and gay men The book brings the study of lesbians from the margins of feminist theory to the centre by critiquing the analytic frameworks employed within feminist theory that renders invisible lesbians' difference from heterosexual women This book also outlines the basic features of lesbian and gay subordination by exploring the differences between heterosexual dominance and gender and race relations Throughout Calhoun aims to re-centre lesbian and gay politics away from concern with sexual regulations and toward concern with the displacement of gays and lesbians from the public sphere of visible citizenship and from the private sphere of romance marriage and family

Religion and Sexuality Lawrence Foster, 1981 Most writers have treated these three groups and the social ferment out of which they grew as simply an American sideshow In this book therefore I have attempted to go beyond the conventional focus on what these groups did I have also sought to explain why they did what they did and how successful they were in terms of their own objectives By trying sympathetically to understand these extraordinary experiments in social and religious revitalization I believe it is possible to come to terms with a broader set of questions that affect all men and women during times of crisis and transition From the preface Winner of the Best Book Award Mormon History Association **Chinese Marriages in Transition**

Xiaoling Shu, Jingjing Chen, 2023-09-15 Outdated models of Chinese gender roles marriage and family transitions portray these changes as streamlined and unidirectional from traditional to modern public to private collective to individual Chinese Marriages in Transition documents the complex nuanced and multidirectional nature of these cultural transformations Using complex and large scale historical national data as well as comprehensive data from multiple countries Xiaoling Shu and Jingjing Chen demonstrate that while the second demographic transition is unfolding in many advanced Western societies it is not necessarily a normative form of societal transition Working instead from a framework of new familism Shu and Chen show that Chinese new familism consists of both old and new values including the persistence of some traditional beliefs and practices accompanied by a transition to modern perceptions of gender and adaption to some modern forms of family formation This book is freely available in an open access edition thanks to TOME Toward an Open Monograph Ecosystem a collaboration of the Association of American Universities the Association of University Presses and the Association of
