Marriage and the Family Suzanne K. Steinmetz, Marvin B. Sussman, 2013-11-11 The lucid straightforward Preface of this Handbook by the two editors and the comprehensive perspectives offered in the Introduction by one of them leave little for a Foreword to add. It is therefore limited to two relevant but not intrinsically related points: *vis à vis* research on marriage and the family in the interval since the first Handbook Christensen 1964 appeared, namely the impact on this research of the politicization of the New Right and of the Feminist Enlightenment beginning in the mid sixties about the time of the first Handbook. In the late 1930s Willard Waller noted: Fifty years or more ago about 1890 most people had the greatest respect for the institution called the family and wished to learn nothing whatever about it. Everything that concerned the life of men and women and their children was shrouded from the light. Today much of that has been changed. Gone is the concealment of the way in which life begins; gone the irrational sanctity of the home. The aura of sentiment which once protected the family from discussion clings to it no more. We want to learn as much about it as we can and to understand it as thoroughly as possible for there is a rising recognition in America that vast numbers of its families are sick from internal frustrations and from external buffeting. We are engaged in the process of reconstructing our family institutions through criticism and discussion. 1938 pp 3-4

From Parent to Child Jere R. Behrman, Robert A. Pollak, Paul Taubman, 1995-08-15 How do parents allocate human capital among their children? To what extent do parental decisions about resource allocation determine children's eventual economic success? The analyses in *From Parent to Child* explore these questions by developing and testing a model in which the earnings of children with different genetic endowments respond differently to investments in human capital. Behrman, Pollak, and Taubman use this model to investigate issues such as parental bias in resource allocations based on gender or birth order, the extent of intergenerational mobility in income, earnings and schooling in the United States, the relative importance of environmental and genetic factors in determining variations in schooling, and whether parents' distributions offset the intended effects of government programs designed to subsidize children. In allocating scarce resources, parents face a trade-off between equity and efficiency between the competing desires to equalize the wealth of their children and to maximize the sum of their earnings. Building on the seminal work of Gary Becker, *From Parent to Child* integrates careful modeling of household behavior with systematic empirical testing and will appeal to anyone interested in the economics of the family.
