The Inner Planets Clark R. Chapman, 1977 America keeps a fine house Anatol Lieven writes but in its cellar there lives a demon whose name is nationalism In this controversial critique of America s role in the world Lieven contends that U S foreign policy since 9 11 has been shaped by the special character of our national identity which embraces two contradictory features One The American Creed is a civic nationalism which espouses liberty democracy and the rule of law It is our greatest legacy to the world But our almost religious belief in the Creed creates a tendency toward a dangerously messianic element in American nationalism the desire to extend American values and American democracy to the whole world irrespective of the needs and desires of others The other feature populist or what is sometimes called Jacksonian nationalism has its roots in an aggrieved embittered and defensive White America centered largely in the American South Where the Creed is optimistic and triumphalist

Jacksonian nationalism is fed by a profound pessimism and a sense of personal social religious and sectional defeat Lieven examines how these two antithetical impulses have played out in recent US policy especially in the Middle East and in the nature of U S support for Israel He suggests that in this region the uneasy combination of policies based on two contradictory traditions have gravely undermined U S credibility and complicated the war against terrorism It has never been more vital that Americans understand our national character This hard hitting critique directs a spotlight on the American political soul and on the curious mixture of chauvinism and idealism that has driven the Bush administration Earthtrek Geography □ 8 with Map Practice Book Rita Fernandez, Earthtrek a NEW series in Geography for classes 3 8 based on the latest ICSE syllabus aims at introducing and developing concepts of Geography in a captivating style The books attempt to create curiosity and interest in the mind of the learners through interesting activities and map work **Science Made Simple** □ 8 Mansi Punni, Neha Gambhir, A Course Book on Science **The Solar system ; an astronomical unit 1911** George Adam,1911 **Solar Planetary Systems** Asit B.
