Cranford,2011-03-01 Written in an informal manner this account tells the incredible story of the birth of an entirely new field
of science called Astrobiology a field that is now investigating whether life might exist on other worlds From the discovery
that other stars in our galaxy are circled by planets to the detection of single cell organisms found living on Earth in
extremely hostile environments this account details the recent breakthroughs made by astronomers and earth scientists over
the last few decades Based on these findings it argues that scientists now have the technology they need to move from
speculating or fantasizing about extraterrestrials to possibly providing mankind with the first definitive proof that we are not
