Thoreau's Country David R. Foster, Henry David Thoreau, 2009-06-30 In 1977 David Foster took to the woods of New England to build a cabin with his own hands Along with a few tools he brought a copy of the journals of Henry David Thoreau Foster was struck by how different the forested landscape around him was from the one Thoreau described more than a century earlier The sights and sounds that Thoreau experienced on his daily walks through nineteenth century Concord were those of rolling farmland small woodlands and farmers endlessly working the land As Foster explored the New England landscape he discovered ancient ruins of cellar holes stone walls and abandoned cartways all remnants of this earlier land now largely covered by forest How had Thoreau's open countryside shaped by ax and plough divided by fences and laneways become a forested landscape Part ecological and historical puzzle this book brings a vanished countryside to life in all its dimensions human and natural offering a rich record of human imprint upon the land Extensive excerpts from the journals show us through the vividly recorded details of daily life a Thoreau intimately acquainted with the ways in which he and his neighbors were changing and remaking the New England landscape Foster adds the perspective of a modern forest ecologist and landscape historian using the journals to trace themes of historical and social change Thoreau's journals evoke not a wilderness retreat but the emotions and natural history that come from an old and humanized landscape It is with a new understanding of the human role in shaping that landscape Foster argues that we can best prepare ourselves to appreciate and conserve it today From the journal I have collected and split up now quite a pile of driftwood rails and riders and stems and stumps of trees perhaps half or three quarters of a tree Each stick I deal with has a history and I read it as I am handling it and last of all I remember my adventures in getting it while it is burning in the winter evening That is the most interesting part of its history It has made part of a fence or a bridge perchance or has been rooted out of a clearing and bears the marks of fire on it Thus one half of the value of my wood is enjoyed before it is housed and the other half is equal to the whole value of an equal quantity of the wood which I buy October 20 1855

Of Gardens Paula Deitz,2011-11-29 Paula Deitz has delighted readers for more than thirty years with her vivid descriptions of both famous and hidden landscapes Her writings allow readers to share in the experience of her extensive travels from the waterways of Britain s Castle Howard to the Japanese gardens of Kyoto and home again to New York City s Central Park Collected for the first time the essays in *Of Gardens* record her great adventure of continual discovery not only of the artful beauty of individual gardens but also of the intellectual and historical threads that weave them into patterns of civilization from the modest garden for family subsistence to major urban developments Deitz s essays describe how people over many centuries and in many lands have expressed their originality by devoting themselves to cultivation and conservation During a visit to the Abby Aldrich Rockefeller Garden in Seal Harbor Maine Deitz first came to appreciate the notion that landscape architecture can be as intricately conceived as any major structure and is indeed the means by which we redeem the natural environment through design Years later as she wandered through the gardens of Versailles she realized that because gardens give structure without confinement they encourage a liberation of movement and thought In *Of Gardens* we follow Deitz down paths of revelation viewing A Bouquet of British Parks Liverpool Edinburgh and London the parks and promenades of Jerusalem the Moonlight Garden of the Taj Mahal a Tuscan style villa in southern California and the rooftop garden at Tokyo s Mori Center among many other sites Deitz covers individual landscape architects and designers including Andr Le N tre Frederick Law Olmsted Beatrix Farrand Russell Page and Michael Van Valkenburgh She then features an array of parks public places and gardens before turning her attention to the burgeoning business of flower shows
