**Pursuing the American Dream** Calvin C. Jillson, 2004 Marked by continuity renewal and expansion the image of the Dream Jillson contends has been remarkably constant since well before the American Revolution an image of a nation offering a better chance for prosperity than any other His book reveals how that Dream has motivated our nation s leaders and common citizens to move sometimes grudgingly toward a more open diverse and genuinely competitive society **The Lever of Riches** Joel Mokyr, 1992-04-09 In a world of supercomputers genetic engineering and fiber optics technological creativity is ever more the key to economic success But why are some nations more creative than others and why do some highly innovative societies such as ancient China or Britain in the industrial revolution pass into stagnation Beginning with a

fascinating concise history of technological progress Mokyr sets the background for his analysis by tracing the major inventions and innovations that have transformed society since ancient Greece and Rome What emerges from this survey is often surprising the classical world for instance was largely barren of new technology the relatively backward society of medieval Europe bristled with inventions and the period between the Reformation and the Industrial Revolution was one of slow and unspectacular progress in technology despite the tumultuous developments associated with the Voyages of Discovery and the Scientific Revolution What were the causes of technological creativity Mokyr distinguishes between the relationship of inventors and their physical environment which determined their willingness to challenge nature and the social environment which determined the openness to new ideas He discusses a long list of such factors showing how they interact to help or hinder a nation s creativity and then illustrates them by a number of detailed comparative studies examining the differences between Europe and China between classical antiquity and medieval Europe and between Britain and the rest of Europe during the industrial revolution He examines such aspects as the role of the state the Chinese gave up a millennium wide lead in shipping to the Europeans for example when an Emperor banned large ocean going vessels the impact of science as well as religion politics and even nutrition He questions the importance of such commonly cited factors as the spill over benefits of war the abundance of natural resources life expectancy and labor costs Today an ever greater number of industrial economies are competing in the global market locked in a struggle that revolves around technological ingenuity The Lever of Riches with its keen analysis derived from a sweeping survey of creativity throughout history offers telling insights into the question of how Western economies can maintain and developing nations can unlock their creative potential

*Experiencing Philosophy - Second Edition* Anthony Falikowski, Susan Mills, 2022-11-22

Experiencing Philosophy begins with the assumption that philosophy is not merely something you know but also something you experience and participate in The book presents philosophical theories and ideas with reference to their practical relevance to the lives of student readers To this end a number of engaging features and inserts are provided

Original Sources Numerous primary readings are included introducing students directly to the philosophical work of diverse thinkers ranging from Plato to Martin Luther King Jr Each reading is thoughtfully excerpted and is followed by reflective questions

Philosopher Profiles Abstract ideas are connected to the lives of real historical figures through fascinating biographical profiles

Take It Personally To illustrate how philosophy can be useful and relevant each chapter begins by placing the material in a personal context

Know Thyself Diagnostics This book takes seriously as did Socrates the Delphic Oracle s dictum to know thyself Students are given self diagnostics to explore their own philosophical values ideals and beliefs

Philosophers in Action Philosophy is something you do not just something you know Prompts are provided throughout the text inviting students to conduct thought experiments analyze concepts and discuss and debate controversial points

Thinking about Your Thinking These metacognitive prompts require students to engage in higher order thinking not only about the presented readings and ideas

but also with respect to their own values assumptions and beliefs Plus Built in study guides diagrams famous philosophical quotations comics feature boxes and more      The Catalog of Music Written in Honor of Martin Luther King, Jr Anthony McDonald, 1996
