Marxian Christian Utopianism:

Marxian and Christian Utopianism John Joseph Marsden, 1991 Marxism, Revolution and Utopia Herbert Marcuse, 2014-03-26 This collection assembles some of Herbert Marcuse's most important work and presents for the first time his responses to and development of classic Marxist approaches to revolution and utopia as well as his own theoretical and political perspectives This sixth and final volume of Marcuse's collected papers shows Marcuse's rejection of the prevailing twentieth century Marxist theory and socialist practice which he saw as inadequate for a thorough critique of Western and Soviet bureaucracy and the development of his revolutionary thought towards a critique of the consumer society Marcuse's later philosophical perspectives on technology ecology and human emancipation sat at odds with many of the classic tenets of Marx's materialist dialectic which placed the working class as the central agent of change in capitalist societies As the material from this volume shows Marcuse was not only a theorist of Marxist thought and practice in the twentieth century but also proves to be an essential thinker for understanding the neoliberal phase of capitalism and resistance in the twenty first century A comprehensive introduction by Douglas Kellner and Clayton Pierce places Marcuse's philosophy in the context of his engagement with the main currents of twentieth century philosophy while also providing important analyses of his anticipatory theorization of capitalist development through a neoliberal restructuring of society The volume concludes with an afterword by Peter Marcuse *Marx, Marxism and Utopia* Darren Webb, 2019-07-30 This title was first published in 2000 This engaging book suggests that Marx was right to reject utopian socialism on the grounds that it undermined the principles of proletarian self emancipation and self determination As a theoretician of the proletarian class Marx sought to capture the spirit of revolution in a manner which precluded the need for utopian philanthropy and the messianic elitism which invariably accompanied it In a powerful and original central argument the book suggests that the categories which together define Marx's own utopia were nothing more than theoretical by products of the models employed by Marx in order to supersede the need for utopianism As such Marx was an accidental utopian Rather than legitimating utopianism however the author argues that this conclusion reinforces the need to develop Marx's anti utopian project further Emphasising the contemporary relevance of Marx's original critique the conclusion suggests that the future of socialism lies in its ability to harness not the spirit of utopia but the spirit of adventure **The Annihilation of Hell** Nicholas Ansell, 2014-07-08 This work analyses and evaluates Jurgen Moltmann's model of universal salvation and its relation to his understanding of the redemption or eschatological fulfilment of time For Jurgen Moltmann Hell is the nemesis of Hope The Annihilation of Hell thus refers both to Hell's annihilative power in history and to the overcoming of that power as envisioned by Moltmann's distinctive theology of the cross in which God becomes all in all through Christ's descent into Godforsakenness The negation of Hell and the fulfilment of history are inseparable Attentive to the overall contours and dynamics of Moltmann's thinking especially his *zimzum* doctrine of creation his eschatologically oriented philosophy of time

and his expanded understanding of the nature grace relationship this study asks whether the universal salvation that he proposes can honour human freedom promise vindication for those who suffer and do justice to biblical revelation As well as providing an in depth exposition of Moltmann s ideas *The Annihilation of Hell* also explores how a covenantal universalism might revitalise our web of beliefs in a way that is attuned to the authorising of Scripture and the spirituality of existence If divine and human freedom are to be reconciled as Moltmann believes the confrontation between Hell and hope will entail rethinking issues that are not only at the centre of theology but at the heart of life itself

Marx, Lenin, and the Revolutionary Experience Paul LeBlanc,2014-06-03 *Marx Lenin and the Revolutionary Experience* offers a fresh look at Communism both the bad and good and also touches on anarchism Christian theory conservatism liberalism Marxism and more to argue for the enduring relevance of Karl Marx and V I Lenin as democratic revolutionaries It examines the Red Decade of the 1930s and the civil rights movement and the New Left of the 1960s in the United States as well Studying the past to grapple with issues of war and terrorism exploitation hunger ecological crisis and trends toward deadening de spiritualization the book shows how the revolutionaries of the past are still relevant to today s struggles It offers a clearly written and carefully reasoned thematic discussion of globalization Marxism Christianity and religion in general Communism the history of the USSR and US radical and social movements

Utopia and Revolution Melvin Lasky,2018-04-17 The most comprehensive study of ideology and utopia since Karl Mannheim s work of the 1930s *Utopia and Revolution* can be understood as turning classical political theory on its head or perhaps inside out Instead of the usual summary of how English radical theologies contributed to the revolutionary process Lasky shows how such political theology of the mid seventeenth century became the backbone of the natural history of revolutionary disasters In a remarkable feat of scholarship in intellectual history Lasky charts the course of this historic entanglement over some five turbulent centuries of Western history In so doing he traces the ideological extension of the human personality through the writings of political theorists philosophers poets and historians

Christianity and Culture Santosh Thomas,2005 *The Westminster Dictionary of Christian Theology* Alan Richardson,John Bowden,1983-01-01 The Westminster Dictionary of Christian Theology is an important reference for any pastor scholar or student of theology The articles are clearly written historically informative and conceptually clarifying The entries are arranged alphabetically for ease of use

World Christianity and Marxism Denis R. Janz,1998-04-09 Denis Janz argues that the encounter with Marxism has been the defining event for twentieth century Christianity No other worldview shook Christianity more dramatically and no other movement had as profound an impact on so many Now the Cold War is over and as we approach the end of the century we need Janz says to ask ourselves what happened This book is the first unified and comprehensive attempt to analyze this historic meeting between these two antagonistic worlds of thought and action The intellectual foundation of this antagonism is to be found in Karl Marx himself and thus the book begins with an account of Marx s assault on Christianity All the diverse philosophical and political

manifestations of Marxism were ultimately rooted in Marx's thought and supporters based their greater or lesser hostilities toward Christianity on their reading of his critique Janz follows this with an overview of Christian responses to Marx extending from the mid 19th century to the onset of the Cold War He argues that within this time frame Christianity's negation of Marx was not absolute the loud no to Marx bore with it an important if muted yes With this intellectual groundwork in place Janz turns to an examination of the encounter as it unfolded in specific national contexts the United States the Soviet Union Poland Nicaragua Cuba China and Albania The experiences of these countries varied widely from Poland where Christianity maintained its strongest independence to Nicaragua where a Christian alliance with Marxism contributed to revolutionary change to Albania where a Stalinist government attempted to abolish religion entirely From this survey emerges the evidence that world Christianity has clearly internalized some of the prominent features of its antagonist suggesting that the Marxist project is not as utterly defunct as many have assumed

[An Introduction to Liberation Theology](#) J. David Turner, 1994 Liberation theology is one of the most influential theologies of the twentieth century in its attempt to ground social economic political and religious structures with Jesus second commandment to love your neighbor as yourself In this introductory text Turner explains Liberation Theologians fight for democratic socialism demands for radical economic structural change attempts to raise the consciousness of the poor and their challenge to traditional roles within the Catholic Church with the goal of giving the laity a stronger voice

[The Utopian Dilemma in the Western Political Imagination](#) John Farrell, 2023-03-31 In this volume John Farrell shows that political utopias societies with laws and customs designed to short circuit the foibles of human nature for the benefit of our collective existence have a perennial opponent the honor based culture of aristocracy that dominated most of the world from ancient times into early modernity and whose status based competitive psychology persists to the present day While utopias aim at equality the heroic imperative defends the need for personal and collective dignity It asks the utopian Do we really want to live in a world without struggle without heroes and without the stories they create Because the utopian dilemma pits essential values against each other equity versus freedom dignity versus justice few who confront it can simply take sides Rather the dilemma itself has been a generative stimulus for classic authors from Plato and Thomas More to George Orwell and Aldous Huxley Farrell follows their struggles with the utopian dilemma and with each other providing a deepened understanding of the moral and emotional dynamics of the western political imagination Introduction Chapter 8 Chapter 9 Chapter 15 Chapter 16 and Conclusion of this book are freely available as a downloadable Open Access PDF at <http://www.taylorfrancis.com> under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 4.0 license

[Marxism, Orientalism, Cosmopolitanism](#) Gilbert Achcar, 2013-08-08 In this collection of essays Gilbert Achcar examines the controversial relationship of Marxism to religion to Orientalism and its critique by Edward Said and to the concept of cosmopolitanism A compelling range of issues is discussed within these pages including a comparative assessment of Christian liberation theology and Islamic

fundamentalism Orientalism in reverse which can take the form of an apology for Islamic fundamentalism the evolution of Marx's appraisal of non Western societies and the vagaries of cosmopolitanism up to our present era of globalisation Erudite and incisive these essays provide a major contribution to the critical discussion of Marxism Orientalism and cosmopolitanism and illuminate the relationships between all three Socialism and American Life, Volume I Donald Drew Egbert, 2015-12-08 Easily the most comprehensive and useful work on American socialism including its history theories and impact on life culture and economic and political parties in the United States is as important a contribution as the essays Hereafter students of practically all phases of American life will turn to it for help and guidance U S Quarterly Book Review Originally published in 1952 The Princeton Legacy Library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of Princeton University Press These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905 **Socialism**, 1915 The Socialist Emigre Brian Donnelly, 2003 Paul Tillich never abandoned the Marxist ideas he developed during the political upheaval of his native Germany in the 1920s and 1930s Indeed he subsumed and incorporated Marxism into the construction of his post German religious thinking and theology which he pioneered after fleeing to the USA in 1933 In the Socialist Emigre Brian Donnelly deals with the philosophical foundations of Tillich's theology specifically the important thread of Marxism and argues that Tillich's later and highly acclaimed theology cannot be divorced from his earlier Marxist views This makes for a seminal work which examines Tillich in a new and critical light and furthers the debate as to the structure of his philosophical theology and the nature of his eclectic thought This unique study features Tillich's boundary thought regarding Marxism and religion faith and culture history and supernaturalism and emphasizes Tillich the philosopher rather than Tillich the theologian

Becoming Utopian Tom Moylan, 2020-11-26 A dream of a better world is a powerful human force that inspires activists artists and citizens alike In this book Tom Moylan one of the pioneering scholars of contemporary utopian studies explores the utopian process in its individual and collective trajectory from dream to realization Drawing on theorists such as Fredric Jameson Donna Haraway and Alain Badiou and science fiction writers such as Kim Stanley Robinson and China Miéville **Becoming Utopian** develops its argument for sociopolitical action through studies that range from liberation theology ecological activism and radical pedagogy to the radical movements of 1968 Throughout Moylan speaks to the urgent need to confront and transform the global environmental economic political and cultural crises of our time **Utopianism for a Dying Planet** Gregory Claeys, 2024-12-10 How the utopian tradition offers answers to today's environmental crises In the face of Earth's environmental breakdown it is clear that technological innovation alone won't save our planet A more radical approach is required one that involves profound changes in individual and collective behavior Utopianism for a Dying Planet

examines the ways the expansive history of utopian thought from its origins in ancient Sparta and ideas of the Golden Age through to today's thinkers can offer moral and imaginative guidance in the face of catastrophe. The utopian tradition which has been critical of conspicuous consumption and luxurious indulgence might light a path to a society that emphasizes equality, sociability and sustainability. Gregory Claeys unfolds his argument through a wide-ranging consideration of utopian literature, social theory and intentional communities. He defends a realist definition of utopia focusing on ideas of sociability and belonging as central to utopian narratives. He surveys the development of these themes during the eighteenth and nineteenth centuries before examining twentieth and twenty-first century debates about alternatives to consumerism. Claeys contends that the current global warming limit of 1.5°C (2.7°F) will result in cataclysm if there is no further reduction in the cap. In response, he offers a radical Green New Deal program which combines ideas from the theory of sociability with proposals to withdraw from fossil fuels and cease reliance on unsustainable commodities. An urgent and comprehensive search for antidotes to our planet's destruction. *Utopianism for a Dying Planet* asks for a revival of utopian ideas not as an escape from reality but as a powerful means of changing it.

Comrades and Partners Janet Lee, 2000. With intense passion and commitment, labor reformers and Communist Party activists Grace Hutchins and Anna Rochester dedicated themselves both to the cause of economic justice and to each other. Janet Lee traces Hutchins and Rochester's extraordinary ideological journey from Christianity to Communism in this engaging joint biography, regendering the history of the intellectual left at the same time that she shares the interwoven life stories of these remarkable women. This is a biography that explores the complex and multiple contexts that produced Hutchins and Rochester as political subjects and focuses on the tensions and contradictions of their public and private lives. Methodologically ground-breaking, *Comrades and Partners* attempts to disrupt the realist frame of research and writing in relation to both subject and author, subject in terms of the myth of an unfolding coherent self and author in terms of highlighting the boundaries between fact and fiction. Lee has produced an invaluable addition to the study of women's history, a volume which will prove indispensable to scholars of history, gender studies and the postmodern approach.

The City Cultures Reader Malcolm Miles, Tim Hall, Iain Borden, 2004. Cities are products of culture and sites where culture is made. The Totalitarian Paradigm after the End of Communism, 2022-06-08. Concepts of totalitarianism have undergone an academic revival in recent years, particularly since the breakdown of communist systems in Europe in 1989-91. The totalitarian paradigm, so it seems to many scholars today, had been discarded prematurely in the heat of the Cold War. The demise of communism as a social system is, however, not only an important cause of the recurring attractiveness of the totalitarian paradigm but provides at the same time new evidence and correspondingly new problems of explanation for all approaches in communist studies and totalitarianism theory. In particular, this book contains articles by philosophers, social scientists and historians who

reassess the validity of the totalitarian approach in the light of the recent historical developments in Eastern Europe. A first group of authors focus on the analytical usefulness and explanatory power of classic concepts of totalitarianism after having observed the failed reforms of the Gorbachev era and the collapse of Europe's communist systems in 1989/91. In these contributions the totalitarian paradigm is contrasted with other approaches with respect to cognitive power as well as normative implications. In the second group of contributions the focus is on the reassessment of methodological and theoretical problems of the classic concepts of totalitarianism. The authors attempt to reinterpret the classic concepts so as to meet the objections which have been put forward against those concepts during the last decades. The study thereby traces some of the intellectual roots of the totalitarian paradigm that precede the outbreak of the Cold War such as the work of Sigmund Neumann and Franz Borkenau. It also focuses on the most famous authors in the field: Hannah Arendt and Carl Joachim Friedrich. In addition it discusses theorists of totalitarianism like Juan Linz whose contributions to totalitarianism theory have too often been overlooked.
