Marxism And Materialism A Study In Marxist Theory Of Knowledge:

Marxism and Materialism David-Hillel Ruben,1979 Karl Marx and Friedrich Engels (RLE Marxism) Cecil L. Eubanks,2015-04-17 The project to publish the works of Marx and Engels continues and this book published in 1984 puts together a comprehensive bibliography of their works either written in or translated into English including books monographs articles chapters and doctoral dissertations together with the works of their interpreters The inclusion of the secondary literature makes this a particularly valuable bibliography and contributes greatly to the understanding of the thought of Marx and Engels **Marx After Marxism** Tom Rockmore,2008-04-30 Marx After Marxism encourages readers to understand Karl Marx in new ways unencumbered by political Marxist interpretations that have long dominated the discussions of both Marxists and non Marxists This volume gives a broad and accessible account of Marx s philosophy and emphasizes his relationship to Hegel *Encyclopaedia of Marxism and Education* ,2022-02-14 This encyclopaedia showcases the explanatory power of Marxist educational theory and practice The entries have been written by 51 leading authors from across the globe The 39 entries cover an impressive range of contemporary issues and historical problematics The editor has designed the book to appeal to readers within the Marxism and education intellectual tradition and also those who are curious newcomers as well as critics of Marxism The Encyclopaedia of Marxism and Education is the first of its kind It is a landmark text with relevance for years to come for the productive dialogue between Marxism and education for transformational thinking and practice **The Hegel-Marx Connection** T. Burns,I. Fraser,2000-07-19 A major and timely re examination of key areas in the social and political thought of Hegel and Marx The editors extensive introduction surveys the development of the connection from the Young Hegelians through the main Marxist thinkers to contemporary debates Leading scholars including Terrell Carver Chris Arthur and Gary Browning debate themes such as the nature of the connection itself scientific method political economy the Hegelian basis to Marx s Doctoral Dissertation human needs history and international relations *Karl Marx and Friedrich Engels* Cecil Eubanks,2015-04-17 The project to publish the works of Marx and Engels continues and this book published in 1984 puts together a comprehensive bibliography of their works either written in or translated into English including books monographs articles chapters and doctoral dissertations together with the works of their interpreters The inclusion of the secondary literature makes this a particularly valuable bibliography and contributes greatly to the understanding of the thought of Marx and Engels **Marx, Methodology and Science** David M. Walker,2017-07-12 This title was first published in 2001 The book aims to give a clear and accessible account of Marx s method and an assessment of its scientific validity and relevance to contemporary social science The key methodological themes of Marx s work and their development are shown with particular attention paid to the elements of dialectics and materialism Four models of science are outlined positivism critical rationalism scientific conventionalism scientific realism and the arguments and evidence both for and against Marx s method corresponding to any of them examined The conclusion

arrived at is that Marx's method is a good example of social scientific practice according to the scientific realist model and that it has a positive contribution to make to social science today realism

Routledge Handbook of Marxian Economics
David M. Brennan, David Kristjanson-Gural, Catherine P. Mulder, Erik K. Olsen, 2017-03-16 Most developed economies are characterized by high levels of inequality and an inability to provide stability or opportunity for many of their citizens. Mainstream economics has proven to be of little assistance in addressing these systemic failures and this has led both scholars and students to seek alternatives. One such alternative is provided by Marxian economics. In recent decades the field has seen tremendous theoretical development and Marxian perspectives have begun to appear in public discourse in unprecedented ways. This handbook contains thirty-seven original essays from a wide range of leading international scholars recognized for their expertise in different areas of Marxian economics. Its scope is broad, ranging from contributions on familiar Marxist concepts such as value theory, the labor process, accumulation, crisis, and socialism to others not always associated with the Marxian canon like feminism, ecology, international migration, and epistemology. This breadth of coverage reflects the development of Marxian economic and social theory and encompasses both the history and the frontiers of current scholarship. This handbook provides an extensive statement of the current shape and future direction of Marxian economics. The Routledge Handbook of Marxian Economics is an invaluable resource for students, researchers, and policy makers seeking guidance in this field. It is designed to serve both as a reference work and as a supplementary text for classroom use with applications for courses in economics, sociology, political science, management, anthropology, development studies, philosophy, and history.

Constructing Marxist Ethics, 2015-02-04 Does Marxism possess an ethical impulse? Is there a moral foundation that underpins the Marxist critique of capitalism and the vision for social progress? The essays collected in *Constructing Marxist Ethics* Critique Normativity Praxis argue that there is such an ethical grounding for Marxist theory. The essays, each from different vantage points, construct what a Marxian ethics should look like, what kind of values should be at the heart of the Marxian enterprise. Contributors are Dan Albanese, Paul Blackledge, Bob Cannon, Tony Burns, Ian Fraser, Ruth Groff, Wadood Hamad, Christoph Henning, Peter Hudis, Lauren Langman, George E. McCarthy, Sean Sayers, Michael J. Thompson, and Lawrence Wilde.

Marx' Critique of Science and Positivism G. McCarthy, 2012-12-06 political economy With this in mind, the reader will be taken through three meta-theoretical levels of Marx's method of analysis of the structures of capitalism: 1. the clarification of critique and method from Kant's epistemology, Hegel's phenomenology to Marx's political economy; Chapter One; 2. the analysis of critique and time, that is, the temporal dimensions of the critical method as they evolve from Hegel's *Logic* to Marx's *Capital*, and the difference between the use of the future in explanatory positivist science and critique; Chapter Two; 3. and finally, critique and materialism: a study of the complexity of the category of materialism, the ambivalence and ambiguity of its use in Marx's critical method, and the ontological and logical dilemmas created by the Schelling-Feuerbach turn toward materialism in their critique of Hegel; Chapter Three. The critique of political economy is

therefore examined at the levels of methodology temporality and ontology To what do the categories of political economy really refer when the positivist interpretations of Marx have been shattered and critique becomes the method of choice What kind of knowledge do we have if it is no longer scientific in the traditional sense of both epistemology and methodology And what kind of applicability will it have when its format is such as not to produce predictive technical knowledge but practical knowledge in the Greek sense of the word Praxis What becomes of the criterion of truth when epistemology itself like science is

Historical Dictionary of Marxism Elliott Johnson, David Walker, Daniel Gray, 2014-09-09 The second edition of the Historical Dictionary of Marxism covers the basics of Karl Marx's thought the philosophical contributions of later Marxist theorists and the extensive real world political organizations and structures his work inspired that is the myriad political parties organizations countries and leaders who subscribed to Marxism as a creed This text includes a chronology an introductory essay and an extensive bibliography The dictionary section has over 500 cross referenced entries on important personalities both thinkers and doers political parties and movements and major communist or ex communist countries This book is an excellent access point for students researchers and anyone wanting to know more about Marxism

Critical Realism and Marxism Andrew Brown, Steve Fleetwood, John Michael Roberts, 2003-09-02 This book examines the relationship between critical realism and Marxism The authors argue that critical realism and Marxism have much to gain from each other This is the first book to address the controversial debates between critical realism and Marxism and it does so from a wide range of disciplines The authors argue that whilst one book cannot answer all the questions about the relationship between critical realism and Marxism this book does provide some significant answers In doing so Critical Realism and Marxism reveals a potentially fruitful relationship deepens our understanding of the social world and makes an important contribution towards eliminating the barbarism that accompanies contemporary capitalism

The State and the Tributary Mode of Production John F. Haldon, 1993 In this groundbreaking critique of both traditional and Marxist notions of feudalism and of the pre capitalist state John Haldon considers the configuration of state and social relations in medieval Europe and Mughal India as well as in Byzantium and the Ottoman Empire He argues that a Marxist reading of the pre capitalist state can take account of the autonomy of power relations and avoid economic reductionism while still focusing on the forms of tribute which sustained the ruling power Haldon explores the conflicts to which these gave rise and shows the Ottoman state elite often held to be a clear example of independence from underlying social relations to be deeply enmeshed in economic relationships and the extraction of tribute Haldon argues that feudalism was the specifically European form of a much more widely diffused tributary mode whose characteristic social relations and structural constraints can be seen at work in the Byzantine Ottoman and Mughal empires as well While acknowledging the range of ideological and cultural variation within and between these examples of the tributary mode Haldon denies the thesis that such superstructural variations themselves yielded fundamentally contrasting social relations

Marx and Education in Late Capitalism R. F.

Price,1986-01-01 The major premise of this book is that efforts to construct a Marxist analysis of education centered on schools and schooling are misdirected Instead the author contends that explorations of education must more importantly focus on the valuable learning experiences that occur outside the classroom Using Marx s own writings as a guide to interpreting past and present events the author explores how education should be conceptualized in order to liberate working people He identifies those aspects of education linked with the specifically capitalist nature of our societies and those that give hope of the cooperative responsible society that Marx anticipated **Marx and Social Justice** George E. McCarthy,2017-11-01 In Marx and Social Justice George E McCarthy presents a detailed and comprehensive overview of the ethical political and economic foundations of Marx s theory of social justice in his early and later writings What is distinctive about Marx s theory is that he rejects the views of justice in liberalism and reform socialism based on legal rights and fair distribution by balancing ancient Greek philosophy with nineteenth century political economy Relying on Aristotle s definition of social justice grounded in ethics and politics virtue and democracy Marx applies it to a broader range of issues including workers control and creativity producer associations human rights and human needs fairness and reciprocity in exchange wealth distribution political emancipation economic and ecological crises and economic democracy Each chapter in the book represents a different aspect of social justice Unlike Locke and Hegel Marx is able to integrate natural law and natural rights as he constructs a classical vision of self government of the people by the people **Marx, Engels and the Philosophy of Science** David Bedford,Thomas Workman,2022-12-31 This book expounds the dialectical conception of science largely implicit in the writings of Marx and Engels offering a sympathetic reconstruction of a philosophy of science commensurate with Marx s thought Drawing on a reading of dialectics found in Plato and Hegel it recasts Marx s implicit ontology in terms of dialectical conceptions of the world as these conceptions have responded to the growing sophistication of modern science It thus deepens our understanding of materialist philosophy as it relates to science and draws out Marx s logic of science in light of continuing discussions As such it will appeal to philosophers with interests in the nature and development of science and Marxist thought **The Cambridge History of Science: Volume 7, The Modern Social Sciences** David C. Lindberg,Theodore M. Porter,Roy Porter,Ronald L. Numbers,2003-08-04 This volume provides a history of the concepts practices institutions and ideologies of social sciences including behavioural and economic sciences since the eighteenth century It offers original synthetic accounts of the historical development of social knowledge including its philosophical assumptions its social and intellectual organization and its relations to science medicine politics bureaucracy philosophy religion and the professions Its forty two chapters include inquiries into the genres and traditions that formed social science the careers of the main social disciplines psychology economics sociology anthropology political science geography history and statistics and international essays on social science in Eastern Europe Asia Africa and Latin America It also includes essays that examine the involvement of the social sciences in government business education culture and social policy This is

a broad cultural history of social science which analyzes from a variety of perspectives its participation in the making of the modern world

Creativity in Social Revolutions Bronislaw Czarnocha, 2025-08-23 This book offers a new perspective on the structure of contemporary social revolutions and wars It analyzes the actions of the participants and looks at possible solutions from the perspective of bisociativity The book elaborates on this concept originally formulated by Arthur Koestler which sees the underlying human creativity in finding a solution as a spontaneous leap of insight connecting previously unconnected matrices of discourse Drawing from Marxist theory the author discerns bisociative frames in contemporary revolutions such as the Bolivian revolution of 2000 2003 2005 or between different uprisings in Poland which led to the independent workers union solidarity One of the central aims of the book is the search for a bisociative frame that includes historical materialism as one of its two components It suggests that historical materialism is not a sufficient but necessary condition for understanding the complexity of contemporary struggles Discussions in different chapters point to the missing component of Marxist revolutionary theory individual self identity as the second component of the bisociative frame The author brings this analysis to the table from his background in mathematics education and teaching and points to how using mathematical generalization may help identify bisociative frames and therefore help find innovative solutions to conflicts This book offers an innovative theoretical framework for current problems from a Marxist perspective and is an interesting read for social scientists historians and anyone critically examining contemporary social revolutions or wars

Post-Marxism Stuart Sim, 2013-04-15 This book traces the crystallisation of post Marxism as a specific theoretical position in its own right and considers the role played in its development by post structuralism postmodernism and second wave feminism It examines the history of dissenting tendencies within the Marxist tradition and considers what the future prospects of post Marxism are likely to be

Blackness Visible Charles W. Mills, 1998-04-09 Charles Mills makes visible in the world of mainstream philosophy some of the crucial issues of the black experience Ralph Ellison s metaphor of black invisibility has special relevance to philosophy whose demographic and conceptual whiteness has long been a source of wonder and complaint to racial minorities Mills points out the absence of any philosophical narrative theorizing and detailing race s centrality to the recent history of the West such as feminists have articulated for gender domination European expansionism in its various forms Mills contends generates a social ontology of race that warrants philosophical attention Through expropriation settlement slavery and colonialism race comes into existence as simultaneously real and unreal ontological without being biological metaphysical without being physical existential without being essential shaping one s being without being in one s shape His essays explore the contrasting sums of a white and black modernity examine standpoint epistemology and the metaphysics of racial identity look at black Jewish relations and racial conspiracy theories map the workings of a white supremacist polity and the contours of a racist moral consciousness and analyze the presuppositions of Frederick Douglass s famous July 4 prognosis for black political inclusion Collectively they demonstrate what exciting new philosophical terrain

can be opened up once the color line in western philosophy is made visible and addressed
