Empirical Legal Research Kees van den Bos, 2020-08-28 This exciting textbook introduces the basic tenets and methodologies of empirical legal research Explaining how to initiate and conduct empirical research projects how to evaluate the methods used and how to analyze and engage with the results Kees van den Bos provides a vibrant and reliable primer for students and practitioners looking to engage actively in legal research **Methodologies of Legal Research** Mark Van

Hoecke, 2011-02-28 Until quite recently questions about methodology in legal research have been largely confined to understanding the role of doctrinal research as a scholarly discipline In turn this has involved asking questions not only about coverage but fundamentally questions about the identity of the discipline Is it mainly descriptive hermeneutical or normative Should it also be explanatory Legal scholarship has been torn between on the one hand grasping the expanding reality of law and its context and on the other reducing this complex whole to manageable proportions The purely internal analysis of a legal system isolated from any societal context remains an option and is still seen in the approach of the French academy but as law aims at ordering society and influencing human behaviour this approach is felt by many scholars to be insufficient Consequently many attempts have been made to conceive legal research differently Social scientific and comparative approaches have proven fruitful However does the introduction of other approaches leave merely a residue of legal doctrine to which pockets of social sciences can be added or should legal doctrine be merged with the social sciences What would such a broad interdisciplinary field look like and what would its methods be This book is an attempt to answer some of these questions *Public Procurement and the EU Competition Rules* Albert Sánchez Graells, 2011-01-29

Shortlisted for the 2012 Prix Vogel in Economic Law Public procurement and competition law are both important fields of EU law and policy intimately intertwined in the creation of the internal market Hitherto their close connection has been noted but not closely examined This new work is the most comprehensive attempt to date to explain the many ways in which these fields often considered independent of one another interact and overlap in the creation of the internal market In this process of convergence between competition and public procurement law the need for this joint study is clearly apparent As such the

book asks whether competition law principles inform or condition public procurement rules and whether they are adequate to ensure that competition is not distorted in markets where public procurement is particularly significant The book moves away from the classical focus of public procurement on the activities of private actors developing instead an analytical framework for the appraisal of the market behaviour of the public buyer from a competition perspective The analysis is both legal and economic Proceeding through a careful assessment of the general rules of competition and public procurement the book constantly tests the efficacy of the rules in competition and public procurement against a standard of the proper functioning of undistorted competition in the market for public procurement

Modern Law and Otherness Veronica Corcodel, 2019-12-27 Over the last two decades or so the field of comparative law has been increasingly interested in issues of globalisation and Eurocentrism This book inscribes itself within the debates that have arisen on these issues and aims to provide a greater understanding of the ways in which the non West is constructed in Euro American comparative law Approaching knowledge production from an interdisciplinary and critical perspective the book puts emphasis on the governance implications of the field

Advanced Introduction to Empirical Legal Research Herbert M. Kritzer, 2021-02-26 Herbert Kritzer presents a clear introduction to the history methods and substance of empirical legal research ELR Quantitative methods dominate in empirical legal research but an important segment of the field draws on qualitative methods such as semi structured interviews and observation In this book both methodologies are explored alongside systematic data analysis Offering an overview of the broad ELR literature the institutions of the law the central actors of the law and the subjects of the law are each addressed in this highly readable account that will be essential reading for legal researchers

Empirical Legal Research Frans L. Leeuw, Hans Schmeets, 2016-03-25 Empirical Legal Research describes how to investigate the roles of legislation regulation legal policies and other legal arrangements at play in society It is invaluable as a guide to legal scholars practitioners and students on how to do empirical legal research covering history methods evidence growth of knowledge and links with normativity This multidisciplinary approach combines insights and approaches from different social sciences evaluation studies Big Data analytics and empirically informed ethics The authors present an overview of the roots of this blossoming interdisciplinary domain going back to legal realism the fields of law economics and the social sciences and also to civilology and evaluation studies The book addresses not only data analysis and statistics but also how to formulate adequate research problems to use and test different types of theories explanatory and intervention theories and to apply new forms of literature research to the field of law such as the systematic rapid and realist reviews and synthesis studies The choice and architecture of research designs the collection of data including Big Data and how to analyze and visualize data are also covered The book discusses the tensions between the normative character of law and legal issues and the descriptive and causal character of empirical legal research and suggests ways to help handle this seeming disconnect This comprehensive guide is vital reading for law practitioners as well as for students and researchers
