Redefining Comparative Politics Promise Versus Performance:

Redefining Comparative Politics Lawrence C. Mayer, 1989-01-01 **Redefining Comparative Politics** Lawrence C. Mayer, 1989-10 Over the past three decades comparative politics has undergone significant change. It has been transformed from geographically defined studies to comparative analysis and the construction of explanatory theory. This book evaluates the current state of and trends within comparative politics. The author reviews the literature in the field and the major topics of research. He argues that the transformation of the discipline, the revolution in comparative politics, fell well short of its expectations. *Comparative Politics* Daniele Caramani, 2011-02-17 *Comparative Politics* provides a comprehensive introduction to political systems around the world. It covers methods and theories, the nation state, institutions, actors, and processes, policies, and recent changes. Comparing Apples and Mangoes S. N. Sangmpam, 2012-02-01 Two competing approaches currently dominate the debate about the state and institutions in developing countries. The first projects a picture of transnational vertical uniformity descending from the West to developing countries and views liberal democracy as the only game in town. In this view, the state and institutions resemble or ought to resemble those in the West. The second, by contrast, explains political outcomes by local idiosyncrasies and regional variations in institutions. In his original approach to third world politics, S. N. Sangmpam challenges both views by uncovering important similarities in the political features of developing countries. He shows that they share political behaviors and features unaccounted for in either local idiosyncratic or liberal democratic theories. These behaviors converge toward a common property: overpoliticization that defies political compromise, leading to an overpoliticized state. Sangmpam provides a wealth of empirical, historical, and quantitative evidence from Latin America, Asia, Africa, and the West and demonstrates that the overpoliticized state constitutes the cornerstone of an integrated theory of politics in developing countries. *Political Parties and Party Systems* Moshe Maor, 2005-08-10 This comprehensive textbook outlines and illuminates the main theories of political parties and party systems. Applying these theoretical approaches to British party politics, Moshe Maor covers all the key subjects of study, including classification of party definitions, party systems, change, party institutionalization, cohesion, and dissent, intraparty conflicts, and legislative bargaining, multiparty electoral competition. Maor's study highlights the importance of the intraparty arena and actors in understanding the shape and behaviour of political parties, providing essential reading to students of party systems and of British politics. Research Methods in Politics Roger Pierce, 2008-04-09 Packed with features to promote learning, this text is ideal for use on an introductory methods course or for readers carrying out their own research project. It presents an overview of the philosophy and principles of research, qualitative and quantitative research methods, and research design, a critical review of selected methods, methods of gathering information such as interviews and focus groups, and discusses issues associated with ensuring quality of information, appropriate methods for analysing and interpreting data, and covers the process of communicating research. Comparative Analysis Of Nations Robert Perry, 2019-03-01 The comparative method is fundamental and critical for political scientists and especially those interested in comparative politics Such questions as how democratic is the United States how rich is Germany and how ethnically complex is Nigeria and what effects these attributes have on important political phenomena cannot be analyzed except comparatively To understand politics we need to think in terms of concepts processes behavior and authority patterns that transcend specific regions or nation states Comparative Analysis of Nations is designed to address three questions confronting the study of politics 1 What do I do once I have identified a question that I want to explore within a cross national perspective 2 How do I proceed so I adequately address this question 3 Why should I proceed with this particular study plan Perry and Robertson examine how to conceptualize operationalize measure sample analyze and evaluate these research questions In clear language they stress the logic behind basic techniques of quantitative analysis issues of measurement and hypothesis testing basic techniques of hypothesis testing tabular analysis ANOVA scatterplots bivariate regression and advanced bivariate analysis curvilinear and multiple regression The book requires no previous training in statistics or math Cross national data sets accompany the book on a CD ROM and are compatible with the popular SPSS package The data sets enable the instructor the opportunity to engage the students directly in devising their own modified models of analysis to complement and extend the demonstrations within the text In sum the text integrates the core tools and strategies of social science analysis within a framework that highlights the quantitative study of comparative politics

Constructing Genocide and Mass Violence Maureen S. Hiebert, 2017-03-16 This book addresses two closely related questions what is the process by which the relatively short and violent genocides of the twentieth century and beyond have occurred Why have these instances of mass violence been genocidal and not some other form of state violence repression or conflict Hiebert answers these questions by exploring the structures and processes that underpin the decision by political elites to commit genocide focusing on a sustained comparison of two cases the Nazi Final Solution and the Cambodian genocide The book clearly differentiates the structures and processes contained within a larger overall process that leads to genocidal violence Uncovering the mechanisms by which societies at least in the contemporary era come to experience genocide as a distinct form of destruction and not some other form of mass or political violence Hiebert is able to highlight a set of key process that lead to specifically genocidal violence Providing an insightful contribution to the burgeoning literature in this area this book will be of interest to students and scholars of genocide international relations and political violence

The Economic Sources of Social Order Development in Post-socialist Eastern Europe Richard Connolly, 2013 Nearly twenty years after the collapse of socialism the countries of post socialist Eastern Europe have experienced divergent trajectories of political development This book looks at why this is the case based on the assumption that societies or social orders can be distinguished by the extent to which competitive tendencies contained within them economic political social and cultural are resolved according to open rule based processes The book explores which economic conditions allow for increased levels of political competition and it tests the hypothesis that the nature of a country s ties with the international economy and the level of competition within a country s economic system will shape the trajectory of political competition within that society The book goes on to argue that after several decades of relative bloc autarky during the socialist period the ongoing process of reintegration with the international economy across the post socialist region has resulted in distinct patterns of structural

economic development and that that these patterns are of crucial importance in explaining the variation in social order type across the post socialist region By offering a more precise analysis of the causal mechanisms that link economic and political competition the book makes a useful contribution to research on the different patterns of political behaviour that have been observed across the post socialist region since the collapse of the socialist regimes
