Rediscovering Illinois Fay-Cooper Cole, Thorne Deuel, 1975 *Rediscovering Illinois: Archaeological Explorations in and Around Fulton County*, by Fay-Cooper Cole and Thorne Deuel, Reviewed by Warren K. Moorehead Warren King Moorehead, 1937 Rediscovery Illinois Fay-Cooper Cole, Thorne Deuel, 1937 **The Crable Site, Fulton County, Illinois** Hale Gilliam Smith, 1951-01-01 The Crable site is a late prehistoric site in Fulton County in west central Illinois along the Illinois River In this report Hale Gilliam Smith combines results from the University of Chicago's excavation in 1933 with information from local collectors in order to present a description and analysis of the site Archaeologists uncovered burial mounds fire pits and a cemetery artifacts included ceramics chipped stone tools and shell ornaments *W. C. McKern and the Midwestern Taxonomic Method* R. Lee Lyman, Michael J. O'Brien, 2003 Explores W C McKern's use of Linnaean taxonomy as the model for development of a pottery classification system By the early 20th century North American archaeologists had found evidence of a plethora of prehistoric cultures displaying disparate geographic and chronological distributions But there were no standards or algorithms for specifying when a culture was distinct or identical to another in a nearby or distant region Will Carleton McKern of the Milwaukee Public Museum addressed this fundamental problem of cultural classification beginning in 1929 He modeled his solution known as the Midwestern Taxonomic Method on the Linnaean biological taxonomy because he wanted the ability to draw historical and cultural relationships among cultures McKern was assisted during development of the method by Carl E Guthe Thorne Deuel James B Griffin and William Ritchie This book studies the 1930s correspondence between McKern and his contemporaries as they hashed out the method's nuances It compares the several different versions of the method and examines the Linnaean biological taxonomy as it was understood and used at the time McKern adapted it to archaeological problems Finally this volume reveals how and why the method failed to provide the analytical solution envisioned by McKern and his colleagues and how it influenced the later development of Americanist archaeology Archaeology at Shiloh Indian Mounds, 1899-1999 Paul D. Welch, 2006 One hundred years of archaeological excavations at an important American landmark the Shiloh Indian Mounds archaeological site a National Historic Landmark The Shiloh Indian Mounds archaeological site a National Historic Landmark is a late prehistoric community within the boundaries of the Shiloh National Military Park on the banks of the Tennessee River where one of the bloodiest battles of the Civil War was fought in April 1862 Dating between AD 1000 and 1450 the archaeological site includes at least eight mounds and more than 100 houses It is unique in that the land has never been plowed so visitors can walk around the area and find the collapsed remains of 800 year old houses and the 900 meter long palisade with bastions that protected the village in prehistoric times Although its location within a National Park boundary has protected the area from the recent ravages of man riverbank erosion began to undermine the site in the 1970s In the mid 1990s Paul Welch began a four year investigation culminating in a comprehensive report to the National Park Service on the Shiloh Indian Mounds These published findings

confirm that the Shiloh site was one of at least fourteen Mississippian mound sites located within a 50 km area and that Shiloh was abandoned in approximately AD 1450 It also establishes other parameters for the Shiloh archaeological phase This current volume is intended to make information about the first 100 years of excavations at the Shiloh site available to the archaeological community **The Burial Complexes of the Knight and Norton Mounds in Illinois and Michigan**

James B. Griffin, Richard E. Flanders, Paul F. Titterton, 1970-01-01 In this volume the authors collect data from various sources on the excavations of two groups of prehistoric burial mounds the Knight Mound Group in Calhoun County Illinois and the Norton Mound Group in Kent County Michigan Includes more than 200 b w maps illustrations and photographs

Mississippian Community Organization Michael J. O'Brien, 2005-12-11 The Powers Phase Project was a multiyear archaeological program undertaken in southeastern Missouri by the University of Michigan in the late 1960s and early 1970s The project focused on the occupation of a large Pleistocene age terrace in the Little Black River Lowland a large expanse of lowlying land just east of the Ozark Highland between roughly A D 1250 and A D 1400 The largest site in the region is Powers Fort a palisaded mound center that ceived archaeological attention as early as the late nineteenth century Archa logical surveys conducted south of Powers Fort in the 1960s revealed the pr ence of numerous smaller sites of varying size that contained artifact assemblages similar to those from the larger center Collectively the settlement aggregation became known as the Powers phase Test excavations indicated that at least some of the smaller sites contained burned structures and that the burning had sealed household items on the floors below the collapsed architectural e ments Thus there appeared to be an opportunity to examine a late prehistoric settlement system to a degree not possible previously Not only could the s tial relation of communities in the system be ascertained but the fact that str tures within the communities had burned appeared to provide a unique opp tunity to examine such things as differences in household items between and among structures and where various activities had occurred within a house With these ideas in mind James B Griffin and James E

Archaeology of the Lower Ohio River Valley Jon Muller, 2016-12-05 Although it has been occupied for as long and possesses a mound building tradition of considerable scale and interest Muller contends that the archaeology of the lower Ohio River Valley from the confluence with the Mississippi to the falls at Louisville Kentucky remains less well known than that of the elaborate mound building cultures of the upper valley This study provides a synthesis of archaeological work done in the region emphasizing population growth and adaptation within an ecological framework in an attempt to explain the area s cultural evolution A New Deal for Southeastern Archaeology Edwin A. Lyon, 1996 Utilizing primary sources that include correspondence and unpublished reports Lyon demonstrates the great importance of the New Deal projects in the history of southeastern and North American archaeology New Deal archaeology transformed the practice of archaeology in the Southeast and created the basis for the discipline that exists today The Steuben Village and Mounds Dan F.

Morse,1963-01-01 The Steuben Village sits on the bank of the Illinois River in Marshall County Illinois Nearby are nine burial mounds In 1955 and 1956 researchers dug five test pits in the village and excavated several of the mounds In addition to burials the crew found thousands of artifacts including pottery chipped and ground stone tools and items made from copper bone and shell The artifacts and radiocarbon dates indicate two Hopewell occupations the earliest about 2 000 years ago

Late Woodland Societies Thomas E. Emerson,Dale L. McElrath,Andrew C. Fortier,2000-01-01 Archaeologists across the Midwest have pooled their data and perspectives to produce this indispensable volume on the Native cultures of the Late Woodland period approximately A D 300 1000 Sandwiched between the well known Hopewellian and Mississippian eras of monumental mound construction the Late Woodland period has received insufficient attention from archaeologists who have frequently characterized it as consisting of relatively drab artifact assemblages The close connections between this period and subsequent Mississippian and Fort Ancient societies however make it especially valuable for cross cultural researchers Understanding the cultural processes at work during the Late Woodland period will yield important clues about the long term forces that stimulate and enhance social inequality Late Woodland Societies is notable for its comprehensive geographic coverage exhaustive presentation and discussion of sites artifacts and prehistoric cultural practices and critical summaries of interpretive perspectives and trends in scholarship The vast amount of information and theory brought together examined and synthesized by the contributors produces a detailed coherent and systematic picture of Late Woodland lifestyles across the Midwest The Late Woodland can now be seen as a dynamic time in its own right and instrumental to the emergence of complex late prehistoric cultures across the Midwest and Southeast

Archaic Societies Thomas E. Emerson,Dale L. McElrath,Andrew C. Fortier,2012-02-01 Sweeping and detailed this long awaited volume is an indispensable guide to the Archaic period across the midcontinent Archaeologists throughout the region share the latest excavation results and analytical perspectives to reveal and reinterpret the worlds of those Native peoples who lived there for some 9 000 years up to about 3 000 years ago Of particular concern is the establishment of relative and absolute chronologies for the Archaic period the relationships between the artifacts left behind and the peoples who made and used them and the changing interactions between cultures climate and landscape Archaeologists offer useful up to date overviews of Archaic societies assessment of stratigraphic sequences and detailed discussions of finds and interpretations from the Mississippi and Ohio river regions and the Great Lakes Comprehensive and accessible this landmark book is a must for anyone wanting to understand a crucial but little understood period in North America s prehistory

The Lithic Industries of the Illinois Valley in the Early and Middle Woodland Period Anta Montet-White,1968 Anta Montet White analyzes chipped stone tools from more than 30 Woodland and Hopewell sites in the Illinois Valley including Steuben Weaver Havana Klunk and Snyders Contains more than 65 drawings and photographs of various tools including preforms projectile points celts and hoes
